6. Maintenance

To ensure the longevity and appearance of your nanoblock figures, follow these simple maintenance guidelines:

- **Cleaning:** Dust your figures regularly with a soft, dry brush or a can of compressed air. For stubborn dirt, gently wipe with a slightly damp cloth, then dry immediately. Avoid harsh chemicals or abrasive cleaners.
- **Storage:** If disassembling or storing, keep blocks in a sealed container to prevent loss and protect them from dust and direct sunlight.
- **Handling:** Handle figures carefully to avoid accidental disassembly, especially with delicate parts.

7. Troubleshooting

If you encounter any issues during assembly or with your nanoblock kit, consider the following:

- **Missing Pieces:** Double-check your work area and packaging. Due to the small size, blocks can be easily overlooked. If pieces are genuinely missing, refer to the warranty and support section for contact information.
- **Difficulty Assembling:** Ensure you are following the instructions precisely. Sometimes rotating a block or re-examining the previous steps can resolve the issue. The blocks are designed for a tight fit.
- **Figure Instability:** Verify that all blocks are firmly pressed together. Loose connections can lead to an unstable figure.
