ZGZUXO T5

ZGZUXO Baby Car Camera and Monitor User Manual

Model: T5

1. INTRODUCTION

This user manual provides comprehensive instructions for the installation, operation, and maintenance of your ZGZUXO Baby Car Camera and Monitor system. This system is designed to provide a clear view of your child in the backseat, enhancing safety and peace of mind while driving. Please read this manual thoroughly before using the product.

Package Contents:

- Baby Car Camera x 1
- Baby Car Monitor (5-inch IPS Screen) x 1
- 10ft Car Charging Cable x 1
- 18ft Camera Connection Cable x 1
- Anti-Slip Pad x 1
- 3M Adhesive x 2
- Velcro Strap x 2
- User Manual x 1

Figure 1: ZGZUXO Baby Car Camera and Monitor System. This image displays the 5-inch monitor with a live feed of a baby in a car seat, along with the camera unit and an illustration of its placement.

2. SAFETY INFORMATION

- Ensure the monitor and camera are securely installed and do not obstruct the driver's view or interfere with vehicle controls.
- Do not attempt to operate or adjust the system while driving. Always pull over to a safe location before making any adjustments.
- Keep cables away from airbags and other safety equipment.
- This device is an aid for monitoring and does not replace direct supervision of a child.
- Use only the provided power cables and accessories.

3. SETUP AND INSTALLATION

The ZGZUXO Baby Car Camera and Monitor system is designed for easy installation without the need for special tools. The installation process can typically be completed in approximately 3 minutes.

3.1 Camera Installation

- Mount the Camera:** Secure the baby car camera to the headrest of the backseat, facing the child's car seat. Use the provided Velcro straps to firmly attach the camera. Ensure the camera has a clear line of sight to the child. The camera features a 120° adjustable angle for optimal positioning.
- Connect the Camera Cable:** Route the 18ft camera connection cable from the camera to the front of the vehicle where the monitor will be placed. Ensure the cable is tucked away safely and does not interfere with passengers or vehicle operation.

No Tools Needed for Installation

Safe Driving & Convience

0-90° Foldable display screen design

With Children

Without Children

Figure 3: Wide viewing angle of the camera. This image shows the camera mounted on a headrest, demonstrating its 150° wide viewing angle capable of monitoring multiple backseat occupants.

3.2 Monitor Installation

- 1. Position the Monitor:** Place the 5-inch IPS monitor on your car's dashboard. Use the provided anti-slip mat to prevent the monitor from sliding. Alternatively, use the 3M adhesive pads for a more permanent fixture.
- 2. Connect Power:** Plug the 10ft car charging cable into the monitor and then into your car's cigarette lighter socket. Alternatively, a USB power cord can be used for power.
- 3. Connect Camera to Monitor:** Connect the 18ft camera connection cable from the camera to the designated input port on the monitor.

Wide Viewing Angle

Monitor three backseats simultaneously

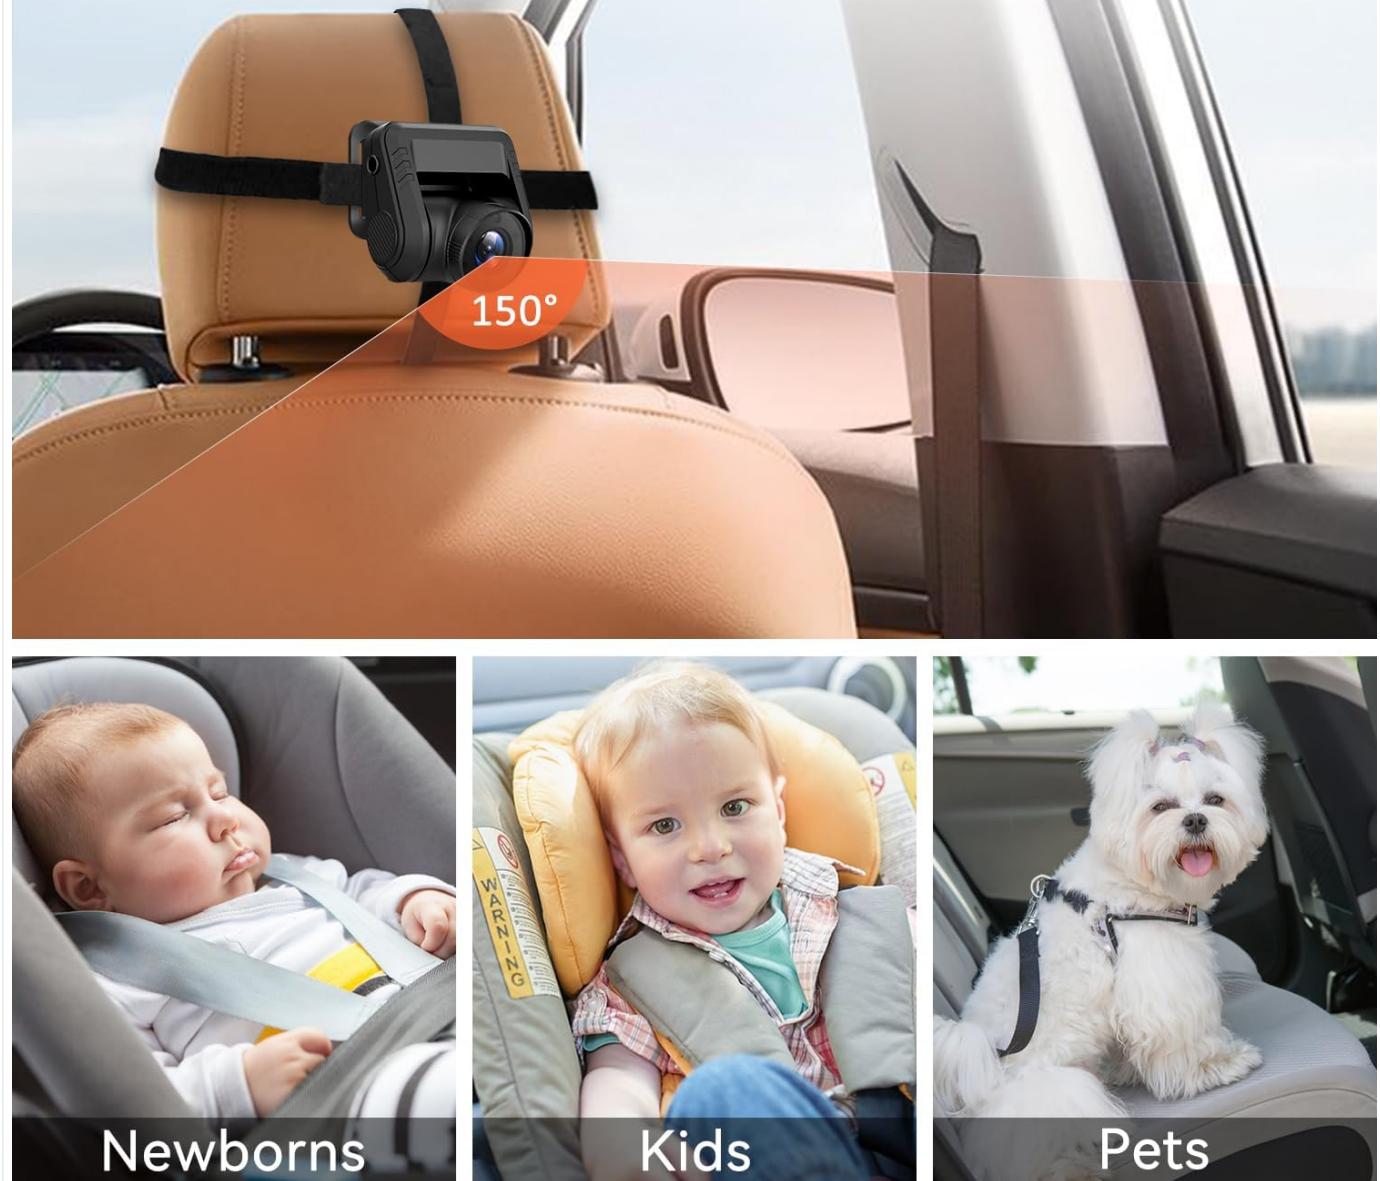

Figure 4: Monitor placement on dashboard. This image shows the monitor positioned on the car dashboard, demonstrating its foldable design for convenience.

The monitor features a 0-90° foldable display screen design for convenient storage and adjustment.

4. OPERATING INSTRUCTIONS

4.1 Powering On/Off

- The system will automatically power on when the car's ignition is turned on (if connected to the cigarette lighter).
- To manually power on/off, press and hold the power button located on the monitor.

4.2 Real-Time Monitoring

Once powered on, the 5-inch IPS screen will display a live 1440P HD video feed from the camera. This provides real-time monitoring of your child in the backseat.

Real-Time Monitoring without TF Card

Easy to watch your baby and drive with peace of mind

Loop Recording with TF Card

Capture every precious moment of your baby in the car

Figure 5: Real-time monitoring display. This image shows the monitor displaying a live feed of a child in a car seat, highlighting the real-time monitoring capability.

4.3 Night Vision Function

The baby car camera automatically switches to infrared (IR) night vision mode in low-light conditions. This feature ensures a clear view of your child even when driving at night, providing full-color night vision.

CONVENIENT DESIGN FOR SAFE DRIVING

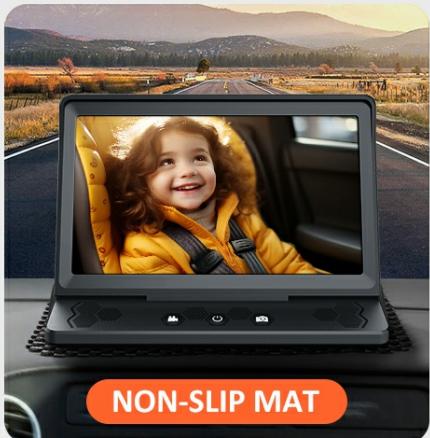

Figure 6: Day and Night Vision comparison. This image displays two monitors side-by-side, one showing a clear image in daylight and the other showing a clear image in night vision mode, demonstrating the automatic IR night vision feature.

4.4 Recording and Photography

The system supports photography and video recording. To utilize these features, a TF card (not included) must be inserted into the monitor's TF card slot. The system supports up to a U3 128GB TF card.

- **Recording Mode:** Press the designated button on the monitor to start or stop video recording. The system supports loop recording, overwriting the oldest video files when the TF card is full. Loop recording intervals can be set to 1, 2, 3, or 5 minutes.
- **Photograph Mode:** Press the designated button to capture still images.
- **Review Footage:** Recorded videos and photos can be reviewed directly on the monitor or by removing the TF card and viewing on a computer.

One Key into Recording/Menu/Photograph Mode

Figure 7: Recording and Photography modes. This image illustrates the monitor's interface for accessing recording, photography, and menu settings, showing a child's image in various modes.

Figure 8: Loop recording feature. This image shows a filmstrip of various baby moments, indicating the loop recording functionality with TF card support.

4.5 Menu Settings

Access the menu settings to adjust various parameters such as loop recording duration, frequency, date stamp, sequence, beep sound, and language (supports 12 languages).

5. MAINTENANCE

- Cleaning:** Use a soft, dry cloth to clean the monitor screen and camera lens. Do not use liquid cleaners or abrasive materials.
- Cable Management:** Periodically check all cables for wear or damage. Ensure they are securely connected and not pinched or exposed to excessive heat.
- Storage:** When not in use for extended periods, store the system in a cool, dry place away from direct sunlight and extreme temperatures. The monitor's foldable design aids in compact storage.

6. TROUBLESHOOTING

Problem	Possible Cause	Solution
No image on monitor	Power cable not connected or loose. Camera connection cable not connected or loose. Car ignition off.	Ensure power cable is securely plugged into monitor and cigarette lighter/USB port. Verify camera connection cable is firmly attached to both camera and monitor. Turn on car ignition.
Image is blurry or unclear	Camera lens is dirty. Camera is not focused or improperly positioned. Low light conditions (night vision should activate).	Clean the camera lens with a soft, dry cloth. Adjust the camera angle (120° adjustable) to ensure a clear view. Ensure night vision is functioning correctly in dark environments.

Problem	Possible Cause	Solution
Recording not working	TF card not inserted or improperly inserted. TF card is full. TF card is not compatible or corrupted.	Insert a compatible TF card (U3, max 128GB) correctly. Format the TF card or replace it with an empty one. Try a different TF card.

7. SPECIFICATIONS

Feature	Detail
