### 3. RGB Lighting

The keyboard features built-in and side-LED RGB backlighting with customizable light animation effects. Per-key RGB is supported and can be configured through the Akko Cloud Driver software.

### 4. Knob Functionality

The multi-function knob allows for quick adjustments. By default, it controls audio volume. It can also be re-mapped via the Akko Cloud Driver for other functions, such as adjusting RGB brightness.

## 5. Programmable Features (Akko Cloud Driver)

All keys and the knob can be re-mapped, and macros can be set using the Akko Cloud Driver software. This software provides extensive customization options for lighting effects, key assignments, and more.

Download the Akko Cloud Driver from the official Akko website ([www.akkogear.com](http://www.akkogear.com)) to unlock full customization capabilities.

## MAINTENANCE

---

### 1. Cleaning

Regular cleaning helps maintain the keyboard's performance and appearance. Use a soft brush or compressed air to remove dust and debris from between the keycaps. For deeper cleaning, carefully remove the keycaps using the provided keycap puller and wipe them with a damp cloth.

## 2. Switch and Keycap Replacement

Thanks to the hot-swappable design, individual switches can be replaced if they become faulty or if you wish to try different switch types. Use the switch puller to gently remove switches. Ensure new switches are aligned correctly before pressing them into place. Keycaps can be removed and replaced using the keycap puller.

## TROUBLESHOOTING

If you encounter issues with your keyboard, please refer to the following common solutions:

- **Connectivity Issues:** Ensure the keyboard is in the correct mode (Wired, 2.4GHz, or Bluetooth) for your device. For wireless connections, check battery level and ensure the receiver is properly plugged in or Bluetooth is paired.
- **RGB Lighting Problems:** Verify that the keyboard is connected via USB for full RGB customization through the Akko Cloud Driver. Adjust brightness using the knob or software.
- **Key Not Responding:** If a specific key is not responding, it may be a faulty switch. Utilize the hot-swappable feature to replace the switch.
- **Software Recognition:** Ensure the keyboard is connected via USB when attempting to use the Akko Cloud Driver for firmware updates or extensive customization.
