## WHAT'S IN THE BOX

---

- CHUWI GemiBook Plus Laptop
- 38Wh Li-ion Battery (integrated)
- Power Adapter
- Documentation (User Manual, Warranty Card)

## SETUP GUIDE

---

### 1. Initial Charging

Before first use, connect the power adapter to the laptop's charging port and a power outlet. Charge the laptop until the battery indicator shows a full charge. This ensures optimal battery performance.

### 2. Powering On

Press the power button located on the keyboard to turn on the laptop. The power button is typically found in the top right corner of the keyboard area.

Image: Top-down view of the CHUWI GemiBook Plus laptop, showing the full keyboard layout and touchpad, indicating the power button location.

### 3. Windows 11 Setup

Follow the on-screen prompts to complete the Windows 11 initial setup. This includes selecting your region, language, connecting to a Wi-Fi network, and creating a user account. Ensure you have an active internet connection for this process.

## OPERATING INSTRUCTIONS

---

### Keyboard and Touchpad

The laptop features a full-sized keyboard and a responsive touchpad for navigation. The touchpad supports multi-touch gestures for enhanced control.

# Full-Size Keyboard

Designed for compactness, GemiBook Plus features a full-sized borderless keyboard that provides a comfortable typing

Image: A hand demonstrating the use of the touchpad on the CHUWI GemiBook Plus laptop, highlighting its multi-touch capabilities.

## Connecting Peripherals

The laptop is equipped with various ports for connecting external devices:

- **USB Ports:** Connect USB devices such as mice, keyboards, or external storage drives. The laptop has 1 USB 2.0 port.
- **HDMI Port:** Connect to an external monitor or TV for a larger display.
- **Audio Jack:** Connect headphones or external speakers.

## Wireless Connectivity

The CHUWI GemiBook Plus supports Wi-Fi 6 (802.11ax) for high-speed internet access and Bluetooth 5.2 for connecting wireless accessories like headphones or speakers.

## Webcam Privacy Switch

For enhanced privacy, the laptop includes a physical switch to block the webcam lens. Slide the switch to cover or uncover the camera as needed.

# Say Goodbye To Battery Anxiety

GemiPro's 2MP webcam means whether you're in a live meeting or video chatting, you're guaranteed to look your best. With a physical switch for privacy protection, you can feel confident your personal space is always secure.

## MAINTENANCE

---

### Cleaning the Laptop

Use a soft, lint-free cloth to clean the screen and exterior surfaces. For stubborn marks, slightly dampen the cloth with water or a screen-cleaning solution. Avoid harsh chemicals or abrasive materials.

### Battery Care

The laptop is equipped with a 38Wh Li-ion battery. To prolong battery life, avoid extreme temperatures and fully discharging the battery frequently. It takes approximately 3 hours for a full recharge.

# Say Goodbye To Battery Anxiety

With a 38Wh capacity and only 3 hours for a full recharge, the GemiBook XPro lets you work anytime, anywhere without worrying about running out of power.

Image: The CHUWI GemiBook Plus laptop with an overlay indicating its 38Wh battery capacity, emphasizing its power endurance.

## Software Updates

Regularly check for and install Windows updates and driver updates to ensure optimal performance and security.

## TROUBLESHOOTING

---

### Laptop Not Powering On

- Ensure the power adapter is securely connected to both the laptop and a working power outlet.
- Check if the power outlet is functional by plugging in another device.
- If the battery is completely drained, it may take a few minutes of charging before the laptop can power on.

### No Wi-Fi Connection

- Verify that Wi-Fi is enabled in Windows settings.
- Restart your Wi-Fi router and the laptop.
- Ensure you are within range of a Wi-Fi network and have entered the correct password.

### Slow Performance

- Close unnecessary applications running in the background.
- Check for and install any pending Windows updates.
- Run a disk cleanup and defragmentation (for HDD) or optimize drives (for SSD).
- Ensure sufficient free space on the SSD.
