## Kinomap Kinomap TV

# Kinomap TV - Early Access User Manual

Model: Kinomap TV

## 1. INTRODUCTION

This manual provides essential information for the installation, operation, and maintenance of the Kinomap TV - Early Access application. Kinomap TV offers an immersive virtual training experience directly on your smart TV, allowing you to connect compatible fitness equipment and explore a wide range of interactive videos.

Please read this manual thoroughly before using the application to ensure proper setup and optimal performance.

## 2. SETUP AND INSTALLATION

To begin using Kinomap TV, follow these steps to install the application on your compatible smart TV device (e.g., Amazon Fire TV):

- Ensure Compatibility:** Verify that your smart TV device is compatible with the Kinomap TV application.
- Access App Store:** Navigate to the app store or application marketplace on your smart TV device. This is typically found on the home screen.
- Search for Kinomap TV:** Use the search function within the app store to find "Kinomap TV".
- Download and Install:** Select the Kinomap TV application and choose the "Download" or "Install" option. The application will download and install automatically.
- Launch Application:** Once installation is complete, launch the Kinomap TV application from your device's app library.
- Log In or Create Account:** Upon first launch, you will be prompted to log in with your existing Kinomap account or create a new one. Follow the on-screen instructions.

**Note:** An active internet connection is required for download, login, and streaming content.

## 3. OPERATING THE KINOMAP TV APPLICATION

After successful installation and login, you can begin using Kinomap TV:

### 3.1 Connecting Fitness Equipment

1. **Enable Bluetooth:** Ensure Bluetooth is enabled on your fitness equipment (e.g., exercise bike, treadmill, elliptical) and that it is in pairing mode.
2. **Access Connection Menu:** Within the Kinomap TV app, navigate to the "Sensors" or "Equipment" section, typically found in the settings or main menu.
3. **Scan for Devices:** The app will scan for nearby compatible Bluetooth fitness equipment.
4. **Select and Connect:** Select your equipment from the list of detected devices. The app will attempt to establish a connection.
5. **Verify Connection:** Once connected, the app should display the status of your equipment (e.g., speed, power, cadence).

**Important:** Some fitness equipment may require specific pairing procedures. Refer to your equipment's manual for details.

### 3.2 Browsing and Starting a Workout

1. **Explore Content:** Use your TV remote or connected controller to navigate through the various categories of videos (e.g., cycling, running, rowing).
2. **Select a Video:** Choose a video that matches your desired workout type and intensity.
3. **Start Workout:** Confirm your selection to begin the workout. The video will start playing, and your equipment data will be displayed.

**Note:** The "Early Access" version may have limited features or ongoing development. Feedback is often encouraged during this phase.

## 4. MAINTENANCE

---

To ensure the Kinomap TV application functions correctly and provides the best user experience, consider the following maintenance practices:

- **Keep App Updated:** Regularly check for and install updates for the Kinomap TV application through your smart TV's app store. Updates often include performance improvements, bug fixes, and new features.
- **Maintain Internet Connection:** Ensure a stable and strong internet connection for uninterrupted streaming and data synchronization.
- **Clear Cache (If Available):** If the app experiences performance issues, clearing its cache (if your smart TV platform allows this for individual apps) can resolve minor glitches. Refer to your smart TV's operating system settings for instructions.
- **Restart Application/Device:** If the app becomes unresponsive, try closing and reopening it. If the issue persists, restart your smart TV device.

## 5. TROUBLESHOOTING

---

This section addresses common issues you might encounter with the Kinomap TV application.

- **App Not Installing or Launching:**
  - Verify your smart TV device is compatible and has sufficient storage space.
  - Ensure your device's operating system is up to date.

- Restart your smart TV device and attempt installation again.
- Check your internet connection.
- **Fitness Equipment Not Connecting:**
  - Confirm Bluetooth is enabled on both your fitness equipment and your smart TV device (if applicable for direct connection, otherwise the app handles it).
  - Ensure your fitness equipment is in pairing mode and not already connected to another device (e.g., a smartphone).
  - Move your smart TV device closer to your fitness equipment to improve Bluetooth signal strength.
  - Restart both the Kinomap TV app and your fitness equipment.
  - Consult your fitness equipment's manual for specific Bluetooth pairing instructions.
- **Video Streaming Issues (Buffering, Low Quality):**
  - Check your internet connection speed and stability. A strong Wi-Fi signal or wired connection is recommended.
  - Close other applications or devices that might be consuming bandwidth on your network.
  - Reduce the video quality setting within the Kinomap TV app, if available.
- **App Freezing or Crashing:**
  - Close the application and reopen it.
  - Restart your smart TV device.
  - Clear the app's cache (if supported by your device).
  - Ensure the app is updated to the latest version.

## 6. SPECIFICATIONS

<b>Application Name</b>	Kinomap TV - Early Access
<b>Brand</b>	Kinomap
<b>Model Identifier</b>	Kinomap TV (ASIN: B0CF1XVT1Q)
<b>Compatibility</b>	Compatible smart TV devices (e.g., Amazon Fire TV) with internet access.
<b>Connectivity</b>	Bluetooth (for fitness equipment), Wi-Fi/Ethernet (for internet).
