Rohent B0CF27J5LK

Rohent Baby Car Camera with Display: HD 1080P Instruction Manual

Model: B0CF27J5LK

1. PRODUCT OVERVIEW

The Rohent Baby Car Camera with Display is designed to provide parents with a clear view of their child in the back seat while driving. This system features HD 1080P picture quality, automatic night vision, and a wide-angle camera to monitor infants and toddlers in rear-facing car seats. The display can be mounted on the dashboard or windshield for convenient viewing.

2. KEY FEATURES

- **Easy Installation:** Designed for quick setup, typically within 5 minutes, by strapping the camera to a headrest and connecting the monitor to the car's cigarette lighter.
- **Clear HD 1080P Picture Quality:** Provides high-definition video feed for optimal visibility of your child.
- **Automatic Night Vision:** Equipped with 940 nm IR LEDs that automatically activate in low-light conditions, offering clear visibility without disturbing the child.
- **Wide View Angle:** A 150-degree wide-angle lens allows monitoring of multiple children in the back seat simultaneously.
- **Stable and Secure Mounting:** The camera is fixed vertically with two straps to the headrest, ensuring a stable and clear picture during vehicle movement.
- **Versatile Display Mounting:** The display unit can be mounted on the windshield using a suction cup or placed on the dashboard.
- **Peace of Mind:** Enables parents to monitor their child in real-time without turning around, enhancing travel safety.

Clear Picture Quality

Night vision automatically turns on

940nm IR LEDs Light Features:
Totally invisible to baby's eyes ❤️
NOT blinding to our baby ❤️
Baby, Mommy loves you ❤️

4. SETUP AND INSTALLATION

Follow these steps for quick and easy installation:

1. **Mount the Camera:** Securely strap the baby car camera to the headrest of the seat where your child is located. Ensure the camera lens is pointed towards your child. The camera features 360-degree rotation for optimal positioning.
2. **Mount the Monitor:** Attach the display monitor to your desired location on the dashboard or windshield using the provided suction cup mount.
3. **Connect Cables:** Run the video cable from the camera to the monitor. Connect the car charger (cigarette lighter adapter) to the monitor and plug it into your vehicle's 12V power outlet.
4. **Power On:** Press the power button on the car charger to activate the system. The monitor should display the camera feed.

Super Easy Set Up, Only Takes 3 Minutes

Plug and play, every mothers can do it easily

5. OPERATING INSTRUCTIONS

Once installed, operating the Rohent Baby Car Camera is straightforward:

- **Power On/Off:** Use the switch on the car charger to turn the system on or off. The monitor will automatically display the camera feed when powered on.
- **Adjusting View:** The camera unit can be manually adjusted to achieve the optimal viewing angle of your child.
- **Night Vision:** The system automatically switches to night vision mode in low-light conditions, providing a clear black and white image.

- **Mirror/Normal Image:** The monitor allows switching between mirror image and normal L-R image display modes. This is useful depending on whether the camera is fixed on a front car seat (child facing front) or rear seats (child facing back).

Every Mother Can Easily Install N06 Baby Car Camera

Switchable Mirror/ Normal Image

6. TROUBLESHOOTING

If you encounter issues with your Rohent Baby Car Camera, refer to the following common solutions:

• No Picture on Display:

- Ensure all cables are securely connected between the camera, monitor, and car charger.
- Verify the car charger is properly plugged into the 12V power outlet and the power switch on the charger is in the 'On' position (indicated by a red light).
- Check if the camera lens is obstructed or dirty.

- **Fuzzy or Unstable Picture:**

- Ensure the camera is firmly strapped to the headrest and not shaking.
- Check for any obstructions between the camera and the child.
- Clean the camera lens and monitor screen.

- **Night Vision Issues:**

- Confirm there is sufficient darkness for automatic night vision activation.
- Ensure no direct light sources are interfering with the camera's IR sensors.

- **Suction Cup Not Holding:**

- Clean the mounting surface (dashboard or windshield) thoroughly before attaching the suction cup.
- Ensure the suction cup lever is fully engaged to create a strong vacuum seal.
- Avoid mounting on textured or porous surfaces.

7. SPECIFICATIONS
