4. SETUP

1. Place the footbath on a firm, level surface.
2. Ensure the power cord is easily accessible but not in a position where it can be tripped over.
3. Fill the footbath with warm water up to the indicated maximum fill line. Do not overfill.
4. If desired, add bath salts or herbs to the designated tray.
5. Plug the power cord into a suitable electrical outlet.

5. OPERATING INSTRUCTIONS

Follow these steps for an effective and relaxing foot massage session:

1. After setup, sit comfortably and place your feet into the footbath.

2. Turn the control knob to select your desired settings. The knob allows you to activate the heat function, massage rollers, and bubble function.
3. Adjust the heat setting as per your comfort. The device is designed to maintain a comfortable water temperature.
4. Allow the massage rollers to stimulate the soles of your feet. You can gently move your feet back and forth over the rollers for varied intensity.
5. Enjoy your foot spa for a recommended duration of 15-30 minutes.
6. To turn off the device, rotate the control knob to the 'OFF' position.
7. Unplug the device from the electrical outlet after use.

6. MAINTENANCE

Proper maintenance ensures the longevity and hygiene of your footbath:

- **Cleaning:** After each use, unplug the device. Drain the water using the hidden water drain. Wipe the interior and exterior surfaces with a soft, damp cloth. Do not use abrasive cleaners or immerse the unit in water.
- **Storage:** Ensure the footbath is completely dry before storing. Store in a cool, dry place away from direct sunlight. Utilize the integrated cord storage and fold the handle for compact storage.

7. TROUBLESHOOTING

If you encounter any issues with your Lunasea Footbath, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Device does not turn on.	Not plugged in, power outlet issue, or device malfunction.	Check if the plug is securely inserted. Test the outlet with another appliance. If the problem persists, contact customer support.
No heat or insufficient heat.	Heat function not activated, or water level too low.	Ensure the control knob is set to a heat setting. Check that the water level is above the minimum fill line.
Massage rollers not working.	Massage function not activated.	Turn the control knob to activate the massage function.
