Sector No Limits Men's Watch R3223161012 User Manual

Model: R3223161012 | Brand: Sector No Limits

INTRODUCTION

Thank you for choosing the Sector No Limits Men's Watch R3223161012. This timepiece combines robust design with reliable functionality, featuring a unique orange dial and a durable recycled steel construction. This manual provides essential information for the proper setup, operation, maintenance, and care of your watch to ensure its longevity and performance.

PRODUCT OVERVIEW

The Sector No Limits R3223161012 is a special edition watch from the 230 Hero collection, celebrating the brand's 50th anniversary. It features a 43mm case and bracelet made from recycled steel, an aluminum bezel, and an eye-catching orange dial with a wave pattern. The watch is equipped with a quartz movement and offers an analog display.

Key Features:

- **Material:** Recycled steel case and bracelet, aluminum bezel.
- **Movement:** Analog display with quartz movement and automatic function.
- **Case Dimensions:** 43mm diameter, 14mm thickness.
- **Dial:** Orange with wave pattern, protected by mineral glass with sapphire treatment.
- **Water Resistance:** 200 meters (20 ATM), suitable for diving.
- **Clasp:** Hidden deployant clasp for secure wear.

- **Special Edition:** Part of the 230 Hero collection, commemorating Sector No Limits' 50th anniversary.

SETUP

Setting the Time:

1. Gently pull the crown out to the second click position. The second hand will stop.
2. Rotate the crown to set the hour and minute hands to the desired time.
3. Push the crown back into the normal position. The second hand will resume movement.

Setting the Date:

1. Gently pull the crown out to the first click position.
2. Rotate the crown clockwise or counter-clockwise (depending on the movement) to set the date. Avoid setting the date between 9 PM and 3 AM, as this can interfere with the automatic date change mechanism.
3. Push the crown back into the normal position.

Adjusting the Bracelet:

The stainless steel bracelet can be adjusted by adding or removing links to achieve a comfortable fit. It is recommended to have this adjustment performed by a professional watchmaker to prevent damage to the bracelet or clasp.

OPERATING THE WATCH

Your Sector No Limits R3223161012 watch features a reliable quartz movement, powered by a battery. While the product description mentions an 'automatic function', this typically refers to the date change mechanism in quartz watches, or a general term for self-winding in mechanical watches. For this quartz model, consistent timekeeping is maintained by the battery.

Water Resistance (200 Meters / 20 ATM):

This watch is water-resistant up to 200 meters, making it suitable for professional marine activity and serious surface water sports, but not for saturation diving. Always ensure the crown is fully pushed in before exposing the watch to water. Do not operate the crown or pushers while the watch is wet or submerged.

MAINTENANCE

Cleaning:

To maintain the appearance of your watch, regularly wipe the case and bracelet with a soft, dry cloth. For stubborn dirt, a slightly damp cloth can be used, followed by immediate drying. Avoid using harsh chemicals or abrasive materials.

Battery Replacement:

As a quartz watch, it is powered by a battery. When the watch stops or the second hand starts skipping (indicating a low battery), it's time for a battery replacement. This should be performed by a qualified watch technician to ensure the water resistance seal is properly maintained.

Water Resistance Check:

It is recommended to have the water resistance of your watch checked annually, especially if you frequently expose it to water or if the case has been opened for battery replacement or service.

TROUBLESHOOTING

- **Watch Not Running:** Check if the crown is fully pushed in. If it is, the battery may need replacement. Contact a professional watch service.
- **Incorrect Time/Date:** Refer to the 'Setting the Time' and 'Setting the Date' sections. Ensure the crown is securely pushed back after adjustment.
- **Condensation Under Crystal:** If you notice condensation, this indicates a breach in the water resistance. Immediately take the watch to a professional for inspection and repair to prevent further damage.
- **Bracelet Discomfort:** If the bracelet is too tight or too loose, it may need adjustment. Seek professional assistance for link removal or addition.

SPECIFICATIONS

Model Number	R3223161012
Brand	Sector No Limits
Display Type	Analog
Movement Type	Quartz
Case Material	Recycled Alloy Steel
Case Diameter	43 mm

Case Thickness	14 mm
