Jura ENA 4

Jura ENA 4 Automatic Espresso Machine User Manual

Model: ENA 4 | Brand: Jura

1. INTRODUCTION

This manual provides essential information for the safe and efficient operation, setup, and maintenance of your new Jura ENA 4 Automatic Espresso Machine. Please read this manual thoroughly before first use and keep it for future reference.

The Jura ENA 4 espresso machine's compact design is sleek and stylish, making it the perfect addition to your kitchen or office countertop.

The Jura ENA 4 espresso machine features a compact and elegant design, making it a suitable addition to various kitchen or office environments.

2. SAFETY INFORMATION

Always observe the following safety precautions to prevent injury or damage to the appliance:

- Ensure the appliance is placed on a stable, level surface.
- Do not immerse the appliance, power cord, or plug in water or other liquids.
- Keep children and pets away from the appliance during operation.
- Unplug the machine from the power outlet before cleaning or if it will not be used for an extended period.
- Do not operate the appliance with a damaged cord or plug.
- Only use original Jura accessories and cleaning products.
- Hot surfaces: Avoid contact with hot parts of the machine during and immediately after operation.

3. PACKAGE CONTENTS

Verify that all items are present in the package:

- Jura ENA 4 Automatic Espresso Machine (Nordic White)

- Jura CLEARYL Smart+ Filter Cartridge
- East Coast Blend Whole Bean Coffee (1-Pound)
- Jura 3-Phase 6 Cleaning Tablets
- Instruction Manual (this document)

The complete bundle includes the Jura ENA 4 machine, CLEARYL Smart+ filter, East Coast Blend coffee, and Jura cleaning tablets, providing everything needed to start brewing.

A 1-pound bag of Capresso East Coast Blend whole bean coffee is included to begin your brewing experience.

The CLEARYL Smart+ water filter ensures optimal water quality for your coffee and protects the machine from limescale.

4. SETUP

4.1 Unpacking and Placement

1. Carefully remove all components from the packaging.
2. Place the Jura ENA 4 on a clean, stable, and level surface, away from heat sources and direct sunlight.
3. Ensure adequate ventilation around the machine.

4.2 Water Tank and Filter Installation

The Jura ENA 4 features an Intelligent Water System (I.W.S.) with RFID technology that automatically detects the CLEARYL Smart+ water filter.

1. Remove the water tank from the machine.
2. Insert the CLEARYL Smart+ filter cartridge into the water tank, ensuring it clicks into place.
3. Fill the water tank with fresh, cold tap water up to the MAX mark.

4. Reinsert the water tank into the machine.

The CLEARYL Smart+ filter is designed for easy installation into the water tank, ensuring filtered water for every brew.

4.3 Filling the Bean Container

1. Open the aroma preservation cover of the bean container.
2. Fill the bean container with fresh whole coffee beans. The bean capacity is 4.4 oz.
3. Close the aroma preservation cover.

The Aroma^{G3} grinder has now been improved to grind twice as fast, while still preserving the full aroma of the coffee.

The Aroma G3 grinder ensures that the full aroma of the beans is preserved during the grinding process.

4.4 Power Connection

1. Plug the power cord into a suitable grounded electrical outlet.
2. Press the main power button to turn on the machine. Follow any on-screen prompts for initial setup and rinsing cycles.

5. OPERATING INSTRUCTIONS

5.1 Overview of Controls

The Jura ENA 4 features a symbol display for intuitive operation. Preselected functions are easily accessible with a touch of a button.

Experience a hassle-free operation with our symbol display that features preselected functions. Operating your device has never been easier - simply touch a button and you're good to go!

The symbol display provides clear indications for various functions, simplifying the brewing process.

5.2 Brewing Coffee Specialties

The ENA 4 offers four brewing types: Espresso, Coffee, Espresso doppio, and Caffè doppio. It utilizes Pulse Extraction Process (P.E.P.) for optimized extraction time and intelligent pre-heating.

The ENA 4 is a sleek and compact machine that fits easily in any space. Its Full Nordic White model with a diamond-shaped water tank exudes elegance.

The machine is capable of preparing four distinct coffee beverages, with a bean capacity of 4.4 oz and a water tank capacity of 37.2 oz.

1. Ensure the water tank is filled and the bean container has sufficient coffee beans.
2. Place a cup under the coffee spout.
3. Select your desired coffee specialty by pressing the corresponding button on the symbol display.
4. The machine will automatically grind the beans, pre-heat, and brew your coffee.

5.3 Adjusting Coffee Intensity and Amount

The ENA 4 allows for programmable and individually adjustable amounts of water and offers eight different intensity levels.

- **Intensity:** Refer to the machine's display or specific menu options to adjust the coffee strength before brewing.
- **Amount of Water:** During the brewing process, it may be possible to stop the flow manually or program the desired volume for future brews through the machine's settings. Consult the on-screen menu for detailed instructions.

5.4 Using Ground Coffee

The machine includes a powder chute for ground coffee, allowing you to use pre-ground coffee for single servings.

1. Open the cover of the powder chute.
2. Add one level scoop of pre-ground coffee into the chute. Do not overfill.
3. Close the cover.
4. Select the desired coffee specialty. The machine will recognize the ground coffee.

6. MAINTENANCE

Regular maintenance ensures the longevity and optimal performance of your Jura ENA 4 machine.

6.1 Cleaning Tablets

The Jura 3-Phase cleaning tablets are designed to clean and protect your machine's brewing unit and coffee system.

- The machine will prompt you when a cleaning cycle is required.
- Follow the on-screen instructions to initiate the cleaning program.
- Insert one Jura cleaning tablet into the designated opening when prompted by the machine.

6.2 Water Filter Replacement

The CLEARYL Smart+ filter needs to be replaced regularly to maintain water quality and prevent limescale buildup.

- The machine will indicate when the filter needs to be replaced.
- Remove the old filter from the water tank.
- Insert a new CLEARYL Smart+ filter cartridge as described in the Setup section (4.2).
- Confirm the filter replacement on the machine's display to reset the filter counter.

6.3 General Cleaning

- Wipe the exterior of the machine with a soft, damp cloth. Do not use abrasive cleaners.
- Empty and clean the coffee grounds container and drip tray daily or as needed.
- Rinse the water tank regularly.

7. TROUBLESHOOTING

This section provides solutions to common issues. For more complex problems, please refer to the official Jura support resources.

Problem	Possible Cause	Solution
Machine does not turn on.	Not plugged in; power outlet issue.	Check power cord connection; try a different outlet.
No coffee is dispensed.	Water tank empty; bean container empty; brewing unit blocked.	Fill water tank; fill bean container; run a cleaning cycle.
Coffee tastes weak.	Incorrect grind setting; low coffee intensity; stale beans.	Adjust grind setting (finer); increase coffee intensity; use fresh beans.
"Fill Water Tank" message.	Water tank is empty or not properly seated.	Fill water tank and ensure it is correctly inserted.
