USTELLAR UT88876

Ustellar RGBW Flood Light Outdoor Instruction Manual

MODEL: UT88876

Brand: USTELLAR

Introduction

Thank you for choosing the Ustellar RGBW Flood Light Outdoor system. This smart lighting solution is designed to enhance your outdoor spaces with vibrant colors and convenient control. Featuring 100W total power and 9000lm brightness, these lights offer 16 million color options, including a 2700K warm white, perfect for various applications from ambient lighting to festive decorations. With smart app control, voice command compatibility, and durable waterproof construction, your lighting possibilities are limitless.

What's in the Box

Your Ustellar RGBW Flood Light Outdoor package includes the following components:

- 6 x Floodlights
- 1 x Power adapter
- 7 x Ground Sticks
- 7 x Screws
- 7 x Screws Washers
- 1 x L Shaped Hex Key Wrench
- 1 x User Manual

Setup

The Ustellar floodlight system features a convenient plug & play design, allowing you to connect all 6 smart floodlights to a single adapter and power them from one socket. The cable length between each light is 10ft (3m), providing a total length of 60ft (18m) for flexible outdoor placement.

Installation Options:

- **Ground Installation:** Attach the provided ground sticks to the floodlights and firmly insert them into the ground in your desired locations.
- **Wall Mounted Installation:** Use the included screws and washers to securely mount the floodlights to a wall or other suitable surface. Ensure the mounting surface can support the weight of the lights and that wiring is safely routed.

Operating Instructions

Smart Control via Smart Life APP

Control your Ustellar floodlights from anywhere using the Smart Life APP. This app allows for comprehensive management of your lighting system:

- **Remote Control:** Turn lights on/off, adjust brightness, and change colors from your smartphone.
- **Smart Schedules:** Set automated schedules for your lights to turn on/off, aligning with your daily routine or specific events. The memory function ensures your last settings are retained.
- **Voice Control:** The colored spotlights are compatible with Amazon Alexa and Google Assistant. Use simple voice commands to control your lights (e.g., "Alexa, turn on the floodlights," "Hey Google, dim the lights").
- **WiFi Requirement:** Please note that the smart control features only work with 2.4Ghz WiFi networks.

Vibrant RGBW Colors

Choose from 16 million vibrant RGB colors to create the perfect ambiance for any occasion. Additionally, a 2700K warm white option is available for daily use, providing a comfortable and inviting glow. These lights are suitable for both indoor and outdoor applications, including uplighting, stage lighting, wall washing, and landscape illumination.

Customizable Modes & Music Sync

With a built-in IC chip, you can customize the color and brightness of each individual light, allowing for dynamic and personalized lighting effects. Explore multiple preset magic lighting modes, including:

- Flowing
- Rainbow
- Chasing
- Dazzling effects
- And more!

The Ustellar smart RGB floodlights also support three music modes, syncing the colors of the six floodlights with the rhythm and beats of your music, creating an immersive atmosphere for parties and gatherings.

Customize Color and Brightness of Each Flood Light

Image: A smartphone screen displaying the Ustellar app interface, allowing users to individually customize the color and brightness settings for each of the six floodlights in the system.

Image: An outdoor evening scene with people gathered, enjoying music. Ustellar floodlights are visible on the ground, casting colorful light that appears to be synchronized with the music, enhancing the party atmosphere.

Maintenance

The Ustellar floodlights are designed for durability and long-term performance in outdoor environments. They feature an excellent IP66 waterproof rating, making them suitable for use in rainy conditions. The anti-glare frosted glass cover protects your eyes, while high-quality thermal conductive materials ensure efficient heat dissipation and a long service life.

To maintain optimal performance:

- Regularly clean the frosted glass cover with a soft, damp cloth to remove dirt and debris that may obstruct light output.
- Inspect cables and connections periodically for any signs of wear or damage. Ensure all connections remain secure.
- Avoid using harsh chemicals or abrasive materials for cleaning, as these can damage the light's finish or glass.

Image: A Ustellar floodlight positioned in lush green grass, with water droplets visible, emphasizing its IP66 waterproof performance and suitability for outdoor use in various weather conditions.

Troubleshooting

If you encounter issues with your Ustellar RGBW Flood Light system, please refer to the following common troubleshooting steps:

- **Lights not turning on:** Ensure the power adapter is securely plugged into a working outlet. Check all cable connections between the lights and the adapter.
- **App connectivity issues:** Verify that your smartphone is connected to a 2.4Ghz WiFi network. Ensure the Smart Life APP is updated to the latest version. Try restarting your router and the floodlight system.
- **Individual lights not working:** Check the cable connection to the specific light. If multiple lights are connected in series, a faulty connection or light could affect subsequent lights. Isolate the issue by testing lights individually if possible.
- **Voice control not responding:** Confirm that your Alexa or Google Assistant device is properly linked to your Smart Life APP account and that the floodlights are recognized. Check your internet connection.
- **Colors or modes not changing:** Ensure the app has full control permissions. If using a remote

(not included with this specific model but mentioned in some reviews), ensure it's pointed directly at the light's sensor.

If problems persist after following these steps, please contact Ustellar customer support for further assistance.

Specifications

Feature	Detail
Brand	USTELLAR
Model Number	UT88876
Wattage	100 watts (Total)
Brightness	9000 Lumen
Light Color	Warm White (2700K), RGB (16 Million Colors)
Water Resistance Level	IP66 Waterproof
Control Method	App (Smart Life APP), Voice (Alexa, Google Assistant)
Connectivity Protocol	Wi-Fi (2.4Ghz only)
Number of Light Sources	6
Cable Length (between lights)	10ft (3m)
Total Cable Length	60ft (18m)
Material	Plastic, Glass (frosted)
Installation Type	Wall Mounted / In Ground
Product Dimensions	13.58"L x 9.84"W x 5.31"H
Item Weight	8.29 pounds (3.77 Kilograms)

Warranty and Support

The Ustellar RGBW Flood Light system comes with a Limited Warranty. For specific details regarding the warranty period and coverage, please refer to the warranty information provided at the time of purchase or contact Ustellar customer service.
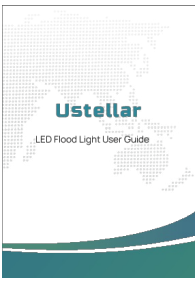

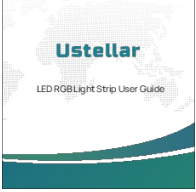

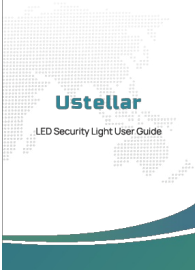

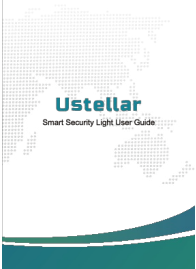

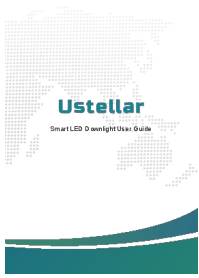

Customer Support:

For any questions, technical assistance, or warranty claims, please contact Ustellar customer support through the following channels:

- **Online Support:** Visit the official Ustellar website for FAQs, troubleshooting guides, and contact forms.
- **Email Support:** Refer to your product packaging or the Ustellar website for the dedicated customer support email address.

Please have your product model number (UT88876) and purchase information ready when contacting support to ensure efficient service.
