6. MAINTENANCE

The resin material of the shed is designed for effortless cleaning and low maintenance. To keep your shed in optimal condition:

- Regularly wipe down surfaces with a damp cloth and mild soap to remove dirt and debris.
- Avoid using abrasive cleaners or harsh chemicals, as these can damage the resin.
- Ensure the roof is clear of excessive snow or heavy objects to prevent structural strain.
- Check the door hinges and locking mechanisms periodically for smooth operation and lubricate if necessary.

7. TROUBLESHOOTING

If you encounter any issues with your YITAHOME storage shed, consider the following common solutions:

- **Door Alignment:** If doors do not close properly, check that the shed is on a level surface. Minor adjustments to hinges or base screws may be needed.
- **Lid Operation:** If the lid is stiff or does not open/close smoothly, inspect the hinges for any obstructions or damage. Ensure the lid is properly seated on its tracks.
- **Water Accumulation:** While designed to be waterproof, ensure the shed is not placed in an area prone to standing water. Verify the sloping roof is clear for proper drainage.
- **Stability Issues:** If the shed feels unstable, re-check all assembly connections and ensure all screws are tightened. Confirm the base is level and firm.
