- **Close Window (Long Press):** Closes the active window.
- **Charging Port:** Micro USB port for recharging the device.
- **Light Hole:** Location of the laser emitter.

Setup Guide

1. Charging the Presenter

Before initial use, fully charge the presentation clicker. A full charge typically takes approximately one hour and provides power for over one week of use.

- Connect the provided Micro USB charging cable to the charging port on the side of the presenter.
- Connect the other end of the cable to a USB power source (e.g., computer USB port, USB wall adapter).
- The charging indicator light will illuminate (refer to "Low Power Indicator" section for details).
- Once fully charged, disconnect the cable.

Figure 2: The presentation clicker being charged via its Micro USB port, connected to a laptop.

2. Connecting the USB Receiver

The USB receiver is stored magnetically within the presentation clicker for convenience and to prevent loss.

- Gently pull out the USB receiver from the bottom end of the presentation clicker.
- Insert the USB receiver into an available USB port on your computer (laptop or desktop).
- The system will automatically detect and install the necessary drivers. No manual driver installation is required.

Figure 3: The magnetic storage for the USB receiver, demonstrating its removal and insertion into a computer's USB port.

3. Powering On/Off

- Locate the "Switch on/off" button on the side of the clicker.
- Slide the switch to the "ON" position to power on the device.
- Slide the switch to the "OFF" position when not in use to conserve battery life.

4. System and Software Compatibility

The DinoFire X17 is widely compatible with various operating systems and presentation software.

- **Supported Systems:** Windows 2003, XP, Windows Vista, Windows 7, 8, 10, Linux, Android, Mac OS.
- **Supported Software:** Keynote, Prezi, MS Word, Excel, PowerPoint, ACD See, website browsers, iWork,

Google Slides, etc.

OPERATING INSTRUCTIONS

Basic Presentation Control

- **Next Slide:** Press the "Page Down" (▼) button.
- **Previous Slide:** Press the "Page Up" (▲) button.
- **Start/Exit Full Screen:** Press and hold the "Page Up" (▲) button.
- **Black Screen:** Press and hold the "Page Down" (▼) button to toggle a black screen.

Using the Laser Pointer

The integrated red laser pointer allows you to highlight specific content on your screen or projection.

- Press and hold the "Pointer Button" (red dot icon) to activate the laser.
- Release the button to turn off the laser.
- The laser has a range of up to 300 feet (91 meters).
- **Caution:** Do not point the laser directly at people's eyes or at highly reflective surfaces.

MAINTENANCE

Charging Guidelines

- Charge the device when the low power indicator flashes continuously.
- Avoid overcharging by disconnecting the cable once fully charged.
- Use the provided Micro USB cable or a certified equivalent for charging.

USB Receiver Storage

Always store the USB receiver inside the magnetic compartment of the clicker when not in use to prevent loss and damage.

Cleaning

Wipe the device with a soft, dry cloth. Do not use liquid cleaners or abrasive materials.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Device not responding.	Low battery; USB receiver not connected; Device is off.	Charge the device; Ensure USB receiver is securely plugged in; Turn on the device.
Laser pointer not working.	Low battery; Laser button not pressed correctly.	Charge the device; Press and hold the laser button firmly.
Short control range.	Obstructions; Interference; Low battery.	Ensure clear line of sight to the receiver; Move away from sources of interference; Charge the device.
Hyperlink function not working.	Software specific issue; Hyperlink not properly selected.	Ensure the hyperlink is active and selected (single press ENTER) before attempting to open (double press ENTER). Check software settings.

Low Power Indicator

The device features a low power indicator to alert you when charging is needed. When the indicator flashes continuously, please charge the device. The device will enter auto-sleep mode after approximately 5 minutes of inactivity to save energy.
