To ensure safe use and prevent injury or damage, please adhere to the following safety guidelines:

- Always follow assembly instructions carefully to prevent parts from falling off.
- Do not exceed the maximum weight capacity of **838 pounds (380 kg)**. Overloading the bed frame can lead to structural failure and injury.
- Be cautious around the **7-inch (17.8 cm) clearance space** to prevent objects from getting stuck or causing injury.
- Keep the bed frame dry to prevent slipping hazards and preserve the wood finish.
- Ensure all connections are securely tightened before use and periodically check for looseness.
- Do not allow children to play on or under the bed frame without supervision.

4. SETUP AND ASSEMBLY

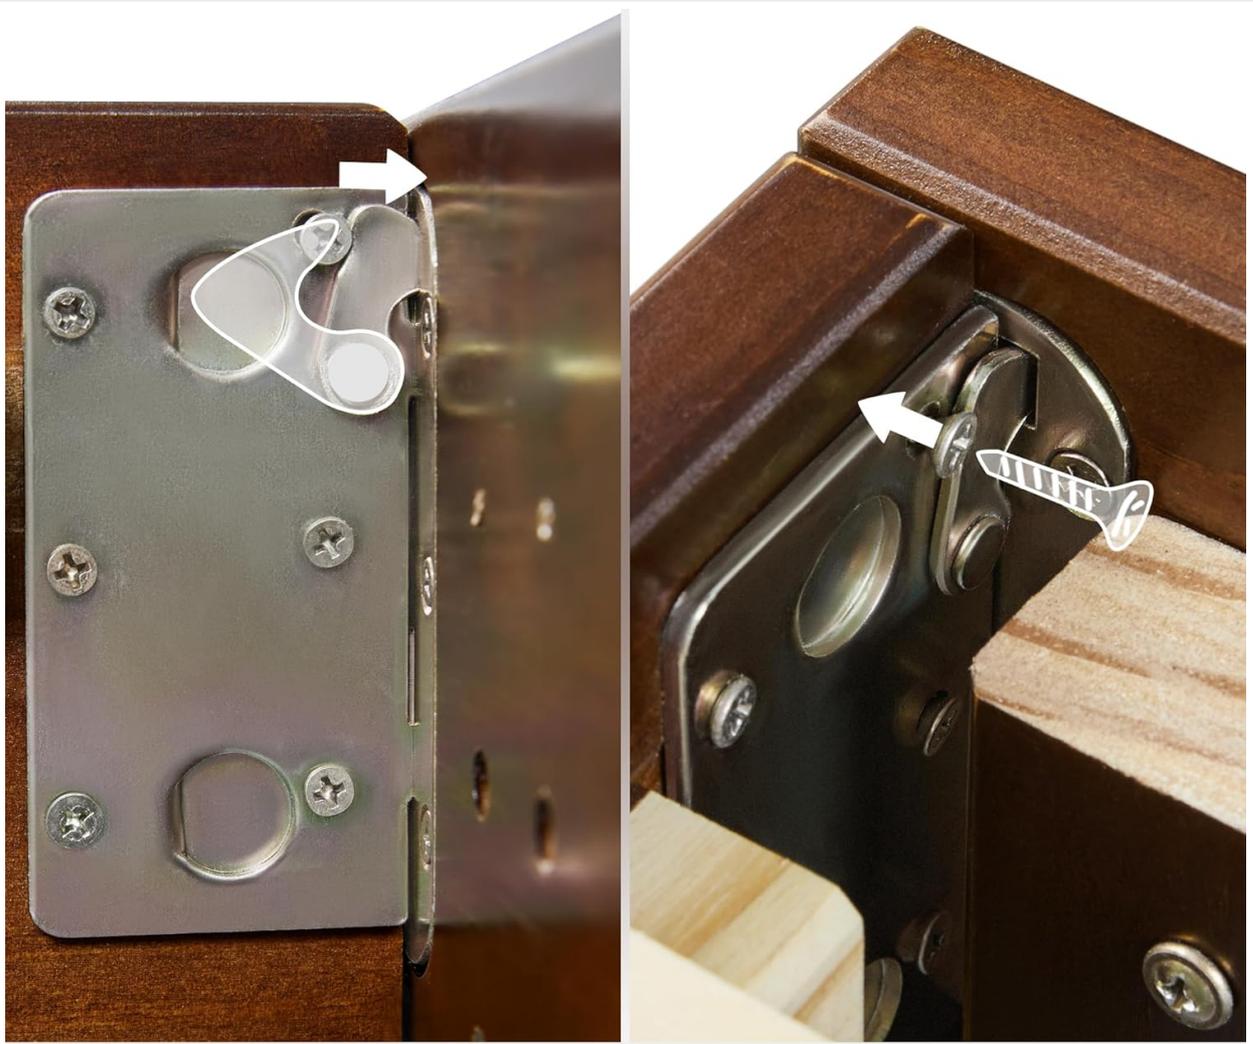

Follow these steps carefully to assemble your Yaheetech bed frame. It is recommended to have two people for assembly.

4.1 Unpacking and Preparation

1. Open the packaging and carefully remove all components.
2. Lay out all parts on a clean, soft surface (e.g., a carpet or blanket) to prevent scratches.
3. Identify each part by comparing it with the components list.

4.2 Frame Assembly

1. Attach the side rails to the head and foot rails using the provided hardware. Ensure the pre-assembled easy-lock connectors are properly aligned and secured.

Easy-to-lock connectors provide enhanced stability and safety.

2. Install the center support beam and its legs. These provide crucial support for the mattress.
3. Unroll the wooden slats. The slats are connected with cloth strips for easy and quick installation. Place them evenly across the frame.

This diagram demonstrates the slat-style design, showing how the wooden slats are laid out and secured onto the bed frame. Insets highlight the pre-drilled holes and dowel pins for alignment, simplifying the assembly process.

4. Secure the slats to the frame using the provided screws. Ensure each slat is firmly attached to prevent movement and noise.

4.3 Finalizing Assembly

1. Double-check all screws and connections to ensure they are tight and secure.
2. Place your mattress directly onto the assembled slats. No box spring is required.

5. OPERATING INSTRUCTIONS

The Yaheetech Platform Bed Frame is designed for straightforward use. Simply place your queen-sized mattress directly onto the wooden slats. The sturdy construction and 28 wooden slats provide excellent support, eliminating the need for a box spring.

Ensure the total weight on the bed frame, including mattress and occupants, does not exceed the maximum weight capacity of **838 pounds (380 kg)**.

6. MAINTENANCE

To maintain the appearance and longevity of your bed frame:

- Wipe with a dry or damp cloth to clean. Avoid harsh chemicals or abrasive cleaners.
- Periodically check all screws and connections for tightness and re-tighten if necessary.
- Avoid exposing the wood to excessive moisture or direct sunlight to prevent warping or fading.

7. TROUBLESHOOTING

If you encounter any issues with your bed frame, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Squeaking or Noise	Loose connections or slats rubbing.	Tighten all screws and bolts. Ensure slats are properly seated and secured. Apply felt pads if rubbing persists.
Bed Frame Feels Unstable	Improper assembly or uneven floor.	Review assembly steps to ensure all parts are correctly installed and tightened. Check if the floor is level; use shims under legs if necessary.
Slats Sagging or Breaking	Exceeded weight capacity or uneven weight distribution.	Ensure total weight does not exceed 838 lbs. Distribute weight evenly. Replace damaged slats if necessary.
