## AC Infinity CTR69Q

# AC Infinity Controller 69 PRO+ User Manual

Model: CTR69Q | Brand: AC Infinity

## INTRODUCTION

---

The AC Infinity Controller 69 PRO+ is a smart environmental controller designed to provide advanced control over your grow environment. This manual provides detailed instructions for setting up, operating, and maintaining your controller to ensure optimal performance.

## PRODUCT OVERVIEW

The Controller 69 PRO+ integrates with AC Infinity's UIS devices to create a comprehensive environmental control system. It allows for precise management of temperature, humidity, and VPD (Vapor Pressure Deficit) within your grow space.

# AC INFINITY ECOSYSTEM

Designed to control up to eight UIS devices to create and automate your grow system with app control.

**CLOUDRAY Series**  
Circulation Clip-on Fans

**CLOUDLINE Series**  
Inline Exhaust Fans

**IONFRAME Series**  
LED Grow Lights

**UIS Control Plug**

## Key Features

- Control up to eight devices, each with independent programming.
- Automate devices based on temperature, humidity, and VPD.
- Includes grow cycles, scheduling, timers, minimum levels, and custom transitions.
- Bluetooth and WiFi connectivity for app control, advanced programs, alarms, notifications, and climate data viewing.
- Thermal-alloy probe for accurate temperature, humidity, and VPD measurements.
- Power-failure memory retains settings and resumes programs automatically.

## SETUP

Follow these steps to set up your AC Infinity Controller 69 PRO+:

1. **Mounting:** Securely mount the controller in a suitable location within your grow space. The unit is lightweight and

can be mounted on a wall or tent pole.

2. **Connect Devices:** Plug your AC Infinity UIS devices (fans, lights, humidifiers, etc.) into the designated ports on the back of the controller. The controller supports up to eight devices.
3. **Connect Sensor:** Plug the thermal-alloy probe into the sensor port. Ensure it is placed in a central location to accurately measure environmental conditions.
4. **Power On:** Connect the controller to a power source. The display will illuminate.
5. **App Pairing:** Download the AC Infinity app from the App Store or Google Play. Open the app and follow the on-screen instructions to pair your controller via Bluetooth or WiFi. This unlocks advanced programming and monitoring features.

## OPERATING THE CONTROLLER

The Controller 69 PRO+ offers both on-device and app-based control for comprehensive environmental management.

## On-Device Control

Use the physical buttons on the controller to navigate menus and adjust settings directly. The bright LCD display provides clear information on current conditions and active programs.

- **Menu Button:** Access various settings and programming options.
- **Link Button:** Manage connected devices and their individual settings.
- **Up/Down Arrows:** Adjust values and navigate through options.

## App Control (Bluetooth + WiFi)

The AC Infinity app provides advanced control and monitoring capabilities:

- **Remote Monitoring:** View real-time temperature, humidity, and VPD data from anywhere.
- **Advanced Programming:** Create complex grow cycles, schedules, and automation rules.
- **Notifications:** Receive alerts for critical environmental changes or device status.
- **Data Logging:** Access historical climate data for analysis and optimization.

# APP CONTROL & DATA

Download the AC Infinity app to unlock advance programs, monitor climate data, set notifications, and remotely control your grow devices over Bluetooth or WiFi.

## MAINTENANCE

---

To ensure the longevity and accuracy of your Controller 69 PRO+ and its sensor, follow these maintenance guidelines:

- **Cleaning:** Regularly wipe the controller's display and body with a soft, dry cloth. Avoid using abrasive cleaners or solvents.
- **Sensor Care:** Keep the thermal-alloy probe clean and free of dust or debris. Do not submerge the probe in liquid.
- **Firmware Updates:** Periodically check the AC Infinity app for available firmware updates for your controller. Updates can improve performance and add new features.
- **Cable Management:** Ensure all cables are neatly organized and not under strain to prevent damage to the ports or cables.

## TROUBLESHOOTING

---

If you encounter issues with your Controller 69 PRO+, refer to the following common troubleshooting tips:

- **Controller Not Responding:**
  - Check power connection.
  - Ensure all cables are securely plugged in.
  - Perform a soft reset by unplugging and re-plugging the power.
- **App Connectivity Issues:**
  - Ensure your mobile device is connected to a 2.4GHz WiFi network for initial setup.
  - Verify Bluetooth is enabled on your device.
  - Restart the app and/or your mobile device.
  - Check for app updates.
- **Inaccurate Sensor Readings:**
  - Clean the sensor probe.
  - Ensure the sensor is not directly exposed to light, heat sources, or excessive moisture.
  - Verify the sensor cable is not damaged.
- **Devices Not Responding:**
  - Check the connection of the device to the controller port.
  - Ensure the device itself is functioning correctly when connected directly to power (if applicable).
  - Verify the programming settings for the specific device in the controller or app.
