4.3 Pass-Through Charging

The Kuulaa Portable Charger supports pass-through charging. This means you can charge your mobile phone while the power bank itself is being recharged. Simply connect the power bank to a power source and then plug your phone into the power bank. Both devices will charge simultaneously.

5. Maintenance

To ensure the longevity and optimal performance of your power bank, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to clean the exterior of the power bank. Avoid using harsh chemicals or abrasive materials.

- **Storage:** Store the power bank in a cool, dry place away from direct sunlight and extreme temperatures.
- **Avoid Liquids:** Do not expose the power bank to water or other liquids.
- **Regular Use:** If not used for extended periods, charge and discharge the power bank at least once every three months to maintain battery health.

6. Troubleshooting

If you encounter any issues with your Kuulaa Portable Charger, please refer to the following common problems and solutions:

| Problem | Possible Cause | Solution |
|--|---|--|
| Power bank not charging | Charging cable or adapter faulty; power bank fully charged; loose connection. | Check cable and adapter; ensure secure connection; if fully charged, LEDs will be solid. |
| Device not charging from power bank | Power bank depleted; device not USB-C compatible; loose connection; device charging port issue. | Recharge power bank; confirm device has a USB-C port; ensure secure connection; try charging device with another source. |
| Slow charging | Low power input source; device drawing high power; cable quality. | Use a higher-output USB adapter for recharging the power bank; ensure the device is not heavily in use while charging. |
| Power bank gets warm during use/charging | Normal operation; excessive load. | Slight warmth is normal. If it becomes excessively hot, disconnect immediately and contact support. |
