

Anker A1654

Anker MagGo Power Bank (Model A1654) Instruction Manual

BRAND: ANKER | MODEL: A1654

INTRODUCTION

Thank you for choosing the Anker MagGo Power Bank. This portable charger is designed to provide efficient and convenient power for your compatible devices. Featuring Qi2 certification for 15W wireless charging, a 10,000mAh battery capacity, an informative smart display, and a versatile foldable stand, it ensures your devices stay powered on the go.

Key Features:

- **Qi2 Certified Charging:** Enjoy 15W wireless charging for fast, secure, and efficient power delivery.
- **10,000mAh Capacity:** Provides ample power to charge your iPhone 15 Pro approximately 1.8 times.
- **Informative Smart Display:** Monitor battery percentages, remaining usage time, and full recharge times directly on the device.
- **Foldable Stand:** Integrated stand allows for hands-free viewing while charging.
- **USB-C Connectivity:** Supports both input and output via USB-C for versatile charging options.

PRODUCT OVERVIEW

ANKER

The World's

NO.1

Mobile Charging Brand*

Doubly Fast in a Snap

2X Faster*

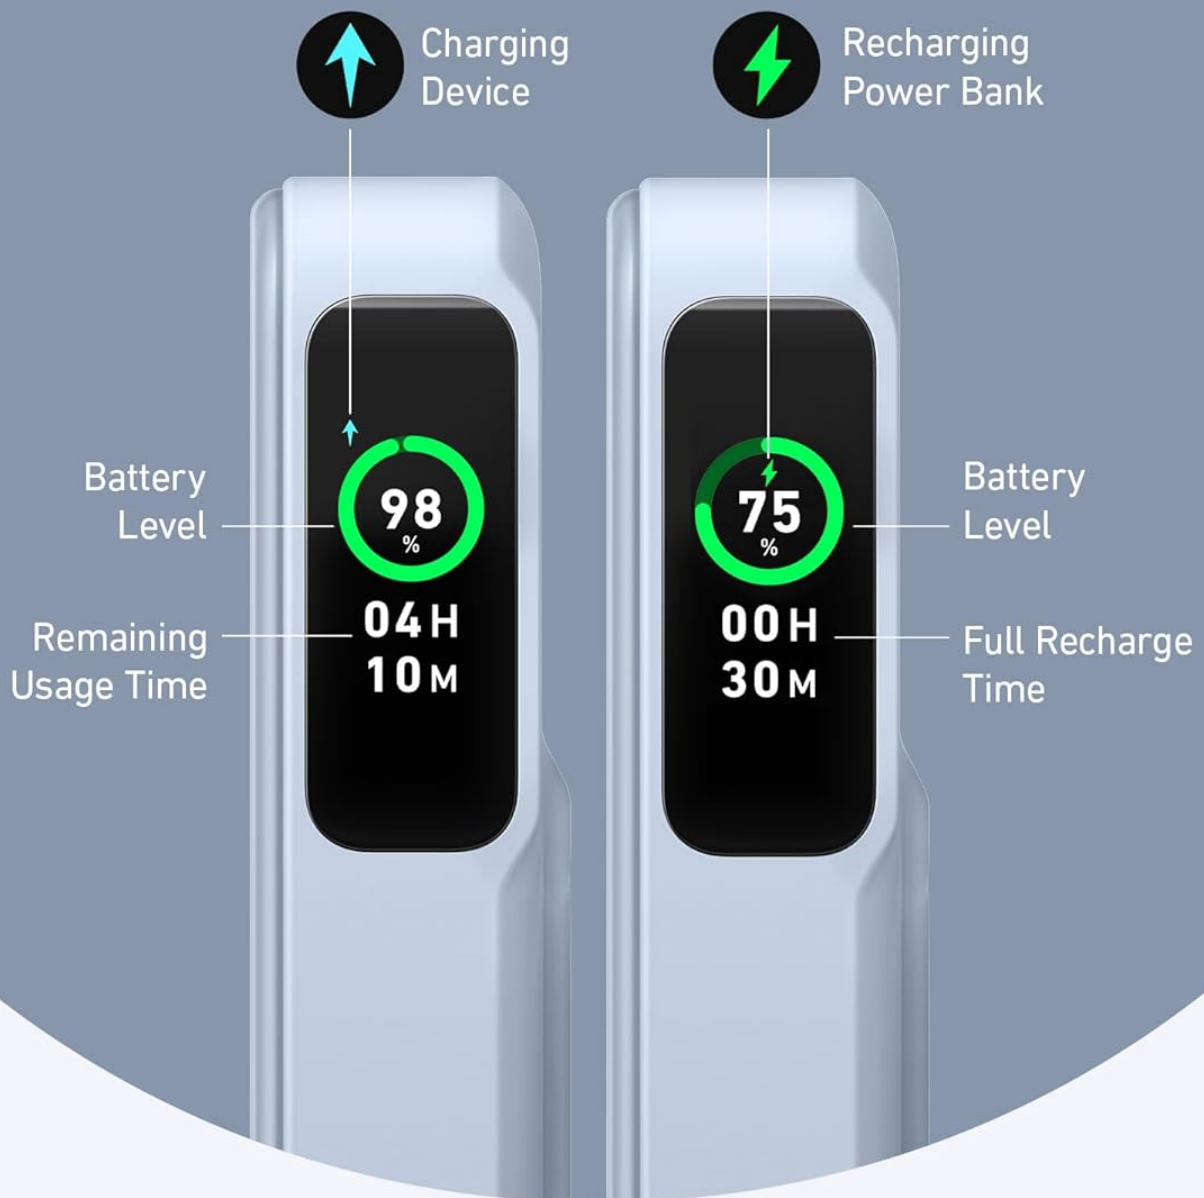

Wireless PowerIQ | **15W Wireless Charging**

*15W wireless fast charging is exclusive to iPhone models. Data based on internal testing, charging an iPhone 17 Pro from 0 to 25% compared with a 7.5W wireless charger.

Reach 60% for iPhone 15 in 30 Minutes

The Anker MagGo Power Bank connected to an iPhone via a USB-C cable, demonstrating 27W USB-C fast charging. The image notes 'Reach 60% for iPhone 15 in 30 Minutes'.

Always-On Protection

Officially Certified

An image showcasing the 'Always-On Protection' and 'Officially Certified' status of the Anker MagGo Power Bank. It highlights ActiveShield 2.0, which monitors temperature over 3,000,000 times per day.

SETUP

1. **Initial Charge:** Before first use, fully charge your Anker MagGo Power Bank using a USB-C cable and a compatible wall adapter (not included). The smart display will indicate the charging progress.
2. **Power On:** Press the power button once to activate the power bank and view the smart display.

OPERATING INSTRUCTIONS

Wireless Charging:

- Align your MagSafe-compatible iPhone (iPhone 12 series or later) with the magnetic charging surface on the power bank. The magnets will snap into place, and charging will begin automatically.
- The smart display will show the charging status and estimated time to full charge for your device.

Wired Charging:

- Connect your device to the USB-C port on the power bank using a compatible USB-C to USB-C cable (included).
- The power bank's USB-C port supports both input (for recharging the power bank) and output (for charging other devices).

Using the Foldable Stand:

- Gently pull out the integrated stand from the back of the power bank.
- Position your iPhone on the power bank in either portrait or landscape mode for hands-free viewing while it charges.

Smart Display:

- The smart display provides real-time information on the power bank's battery level, remaining usage time when charging a device, and the estimated time to fully recharge the power bank itself.

MAINTENANCE

- Keep the power bank away from liquids, extreme heat, and direct sunlight.
- Clean the device with a soft, dry cloth. Avoid using harsh chemicals or abrasive materials.
- Store in a cool, dry place when not in use.

TROUBLESHOOTING

Device Not Charging:

- Ensure the power bank is sufficiently charged.
- For wireless charging, verify proper alignment of your iPhone with the magnetic surface.
- For wired charging, check that the USB-C cable is securely connected to both the power bank and your device.
- If using a phone case, ensure it is MagSafe compatible for wireless charging. Non-magnetic cases may interfere.

Charging Stops at 80%:

- Your iPhone may stop charging at 80% to protect the battery. This can happen if it gets too warm during charging as part of iOS 17's thermal control strategy. Charging will resume once the device cools down. Moving your iPhone to a cooler area may help.

Smart Display Not Working:

- Press the power button to activate the display.
- Ensure the power bank has some charge. If completely depleted, it may take a few minutes of charging before the display activates.

SPECIFICATIONS
