

## HOOOWOOO 42 inch Fire Pit Table

# HOOOWOOO 42-inch Gray Wicker Propane Fire Table User Manual

Model: 42 inch Fire Pit Table (ASIN: B0CFHD3FWM)

### IMPORTANT SAFETY INFORMATION

Please read and understand all instructions and safety warnings before assembling, operating, or servicing this fire table. Failure to follow these instructions could result in property damage, bodily injury, or death.

- **Outdoor Use Only:** This fire table is designed for outdoor use only. Do not use indoors or in an enclosed area.
- **Clearance:** Maintain a minimum clearance of 36 inches (91 cm) from the top and sides to any combustible materials.
- **Propane Gas Only:** Use only liquid propane (LP) gas. Do not use natural gas or any other fuel.
- **Propane Tank:** Use a standard 20 lb (9 kg) propane cylinder (not included). Ensure the tank is securely placed and connected.
- **Ventilation:** Ensure adequate ventilation around the fire table.
- **Children and Pets:** Keep children and pets away from the fire table at all times, especially during operation.
- **Never Leave Unattended:** Do not leave the fire table unattended while in operation.
- **Gas Leaks:** If you smell gas, immediately turn off the gas supply at the tank, extinguish any open flames, and evacuate the area. Do not attempt to light the fire table until the leak is found and corrected.
- **Hot Surfaces:** The fire table surfaces will be hot during and after use. Allow to cool completely before touching or moving.

### SETUP INSTRUCTIONS

Follow these steps to properly set up your HOOOWOOO fire table.

## 1. Unpacking and Inspection

Carefully remove all components from the packaging. Inspect all parts for any damage. If any parts are missing or damaged, do not proceed with assembly and contact customer support.

## 2. Assembly

Place the fire table in your desired outdoor location, ensuring it is on a level, non-combustible surface and meets all clearance requirements. The main body of the fire table comes pre-assembled. You will need to place the burner unit and lava rocks.

*Image: The HOOOWOOO fire table shown with the flame active and with the lid covering the burner, converting it into a regular table.*

## 3. Lava Rock Placement

Carefully distribute the provided lava rocks evenly over the burner pan. Do not cover the igniter electrode or the burner holes. Ensure the lava rocks are dry before first use to prevent popping.

## 4. Propane Tank Connection

1. Ensure the propane tank valve is in the OFF position.

2. Connect the regulator hose from the fire table to the propane tank valve. Hand-tighten firmly. Do not use tools.
3. Check all connections for leaks using a soapy water solution. Apply soapy water to the connections; if bubbles appear, there is a leak. Tighten connections or replace parts as necessary.
4. Place the propane tank securely inside the designated compartment within the fire table.

## Gas fire pit

### • product details

#### table top with lid

cover the lid to use as a table

#### lava rocks

Maximum heat output reaches 50000 BTU

#### ceramic tile tabletop

rust and heat resistant

#### control panel

Electronic ignitor and control valve are safe and easy to operate

#### free dust cover

Work with standard 20lbs liquefied petroleum gas  
**(not included)**

## OPERATING INSTRUCTIONS

Follow these steps to safely ignite and operate your fire table.

### 1. Before Lighting

- Ensure the area around the fire table is clear of combustible materials.
- Verify all gas connections are secure and there are no leaks.
- Open the propane tank valve slowly.

### 2. Ignition Procedure

1. Locate the control panel on the side of the fire table.
2. Push and turn the control knob counter-clockwise to the "LOW" position.
3. While holding the control knob in, press the igniter button repeatedly until the burner ignites.
4. Once ignited, continue to hold the control knob in for 10-15 seconds to allow the thermocouple to heat up. Release the knob.
5. If the burner does not light within 15 seconds, turn the control knob to "OFF", wait 5 minutes for gas to dissipate, and repeat the ignition procedure.

### 3. Flame Adjustment

Once the burner is lit, you can adjust the flame height by turning the control knob between the "LOW" and "HIGH" positions.

### 4. Shut-Down Procedure

1. Turn the control knob clockwise to the "OFF" position.
2. Close the valve on the propane tank completely.
3. Allow the fire table to cool completely before covering or moving.

## MAINTENANCE

Regular maintenance ensures the longevity and safe operation of your fire table.

### 1. Cleaning

- **Exterior Surfaces:** Clean the wicker and ceramic tabletop with a soft cloth and mild soapy water. Rinse thoroughly and dry completely. Do not use abrasive cleaners or harsh chemicals.
- **Burner and Lava Rocks:** Ensure the fire table is completely cool. Remove the lava rocks and gently brush any debris from the burner ports. Clean lava rocks by rinsing with water and allowing them to dry completely before placing them back.
- **PE Rattan:** The PE rattan material is UV resistant and easy to clean, designed for all-weather outdoor use.

Image: A detailed view of the high-quality PE Rattan material, emphasizing its UV resistance, ease of cleaning, and suitability for all weather conditions.

### 2. Storage

- When not in use, especially during inclement weather or off-season, cover the fire table with the provided dust cover to protect it from elements.
- Disconnect the propane tank and store it in a well-ventilated outdoor area, away from direct sunlight and heat sources. Do not store a propane tank indoors.

## TROUBLESHOOTING

Refer to this section for common issues and their solutions.

Problem	Possible Cause	Solution
Burner will not light	No gas flow; Igniter not sparking; Air in gas line; Low propane tank.	Check propane tank valve is open; Ensure igniter electrode is clean and properly positioned; Purge air from gas line by repeating ignition steps; Check propane tank level.
Low flame or irregular flame	Low gas pressure; Partially closed tank valve; Obstruction in burner ports; Over-filling protection device activated.	Ensure propane tank valve is fully open; Clean burner ports; Reset over-filling device by closing tank valve, disconnecting, waiting 5 minutes, then reconnecting and opening slowly.
Smell of gas	Gas leak.	Immediately turn off gas at the tank. Perform a leak test with soapy water on all connections. If leak persists, do not use and contact qualified service personnel.

## SPECIFICATIONS

Key technical details for the HOOOWOOO 42-inch Gray Wicker Propane Fire Table.

- **Heat Output:** Maximum 50,000 BTU
- **Fuel Type:** Liquefied Petroleum Gas (Propane)
- **Material:** Stainless Steel (burner), PE Rattan (exterior), Ceramic Tile (tabletop)
- **Product Dimensions (D x W x H):** 42.13" x 25.98" x 25.2"
- **Color:** Gray Wicker
- **Ignition System:** Electronic Igniter
- **Propane Tank Compatibility:** Standard 20 lbs (not included)
