Instruction Manual for McbeAn Vacuum Cleaner Parts Accessories

Model: jiangxiuyingying | Brand: McbeAn

INTRODUCTION

This instruction manual provides essential information for the installation, maintenance, and troubleshooting of your McbeAn Vacuum Cleaner Parts Accessories. These parts are designed to be compatible with MOOSOO Robot models RT30, RT40, RT50, R3, and R4, ensuring your robot vacuum continues to operate efficiently. Please read this manual carefully before installing or replacing any components.

PRODUCT OVERVIEW

The accessory set includes various components crucial for the optimal performance of your MOOSOO robot vacuum. The specific components in this set (Set B) are designed for direct replacement and easy installation.

Image: A comprehensive view of the replacement kit, featuring a main roller brush, four rectangular HEPA filters, three sets of side brushes, and two blue microfiber mop pads.

The kit typically includes:

- **Main Brush:** A central roller brush designed for deep cleaning.
- **HEPA Filters:** High-efficiency particulate air filters to capture fine dust and allergens.
- **Side Brushes:** Multi-arm brushes that sweep debris from edges and corners into the vacuum's path.
- **Mop Pads:** Microfiber pads for wet mopping functions (if applicable to your specific robot model).

INSTALLATION GUIDE

Before beginning any installation, ensure your robot vacuum is powered off and unplugged from its charging base to prevent accidental activation.

1. Replacing Side Brushes

1. Turn the robot vacuum upside down to access the underside.
2. Locate the side brushes. Each brush is typically held in place by a single screw.
3. Using a screwdriver, carefully remove the screw holding the old side brush.
4. Remove the old side brush.
5. Align the new side brush with the corresponding post and press it down firmly.
6. Secure the new side brush with the screw. Repeat for all side brushes.

2. Replacing HEPA Filters

1. Open the dustbin compartment on your robot vacuum. This is usually located on the top or side of the robot.
2. Remove the dustbin from the robot.
3. Locate the filter housing within the dustbin.
4. Carefully remove the old HEPA filter. Dispose of it properly.
5. Insert the new HEPA filter into the filter housing, ensuring it fits snugly.
6. Close the filter housing and reinsert the dustbin into the robot vacuum.

3. Replacing Main Brush

1. Turn the robot vacuum upside down.
2. Locate the main brush cover, usually secured by two tabs or screws.
3. Release the tabs or unscrew the screws to open the main brush cover.
4. Lift out the old main brush. Clean any debris from the brush compartment.
5. Insert the new main brush, ensuring the ends align with the corresponding slots in the robot.
6. Close the main brush cover and secure it.

4. Attaching Mop Pads

1. If your robot model supports mopping, locate the mop pad attachment plate.
2. Attach the new mop pad to the plate, typically using hook-and-loop fasteners or by sliding it into grooves.
3. Ensure the pad is securely attached before reattaching the plate to the robot.

MAINTENANCE

Regular maintenance of your vacuum cleaner parts ensures optimal performance and extends the lifespan of your robot vacuum.

- **Side Brushes:** Check side brushes regularly for tangled hair or debris. If bristles are bent or worn, replace them. Clean them with a small brush or cloth.
- **Main Brush:** Remove the main brush periodically and clean any hair or debris wrapped around it. Use the cleaning tool provided with your robot (if any) to cut and remove tangled hair.
- **HEPA Filters:** Tap the filter gently over a trash can to remove loose dust. Do not wash HEPA filters with water, as this can damage the filter material. Replace filters every 1-3 months depending on usage and pet presence.
- **Mop Pads:** After each use, remove and wash the mop pads. They can typically be hand-washed or machine-washed with mild detergent. Allow them to air dry completely before reattaching.

TROUBLESHOOTING

If you encounter issues after replacing parts, refer to the following common solutions:

Problem	Possible Cause	Solution
Side brush not spinning.	Tangled hair or debris; incorrect installation.	Remove the side brush and clean any obstructions. Reinstall, ensuring it clicks into place or is screwed in correctly.
Vacuum suction seems weak.	Clogged HEPA filter; main brush tangled.	Clean or replace the HEPA filter. Remove and clean the main brush.

Problem	Possible Cause	Solution
Robot leaves streaks when mopping.	Dirty mop pad; insufficient water.	Wash or replace the mop pad. Ensure the water tank (if applicable) is filled.

SPECIFICATIONS

Key specifications for the McbeAn Vacuum Cleaner Parts Accessories (Set B):

Item Weight: 1.76 ounces

Package Dimensions: 1.18 x 0.79 x 0.39 inches

Manufacturer: jiangxiuyingying

Country of Origin: China

Item Model Number: jiangxiuyingying

Number of Pieces: Varies by set (Set B includes multiple components)
