## 7. MAINTENANCE AND CARE

---

Proper care and maintenance will extend the life and appearance of your Bellemave vanity.

- **Cleaning the Cabinet:** Wipe the cabinet surfaces with a soft, damp cloth. Use a mild, non-abrasive cleaner if necessary. Avoid harsh chemicals, ammonia-based cleaners, or abrasive pads, as these can damage the painted finish.
- **Cleaning the Sink:** Clean the ceramic sink with a non-abrasive bathroom cleaner and a soft sponge or cloth. Rinse thoroughly after cleaning. Avoid using abrasive powders or steel wool, which can scratch the ceramic surface.
- **Spills:** Wipe up water spills and splashes immediately to prevent water damage or staining to the wood and finish.
- **Hardware:** Periodically check all screws and fasteners to ensure they are tight. Retighten if necessary, but do not overtighten.
- **Humidity:** Maintain proper ventilation in your bathroom to minimize humidity, which can affect wood products over time.

## 8. TROUBLESHOOTING

---

This section addresses common issues you might encounter.

- **Drawers not closing smoothly:** Check if the drawer slides are properly aligned and free of obstructions. Ensure the drawer is not overloaded.
- **Door not closing properly:** Inspect the hinges for proper installation and adjustment. Soft-closing hinges may need minor adjustments if the door is misaligned.
- **Water leaks around sink:** Verify that all plumbing connections are tight. Check the silicone sealant around the sink for any gaps or deterioration. Reapply sealant if necessary.
- **Vanity wobbles:** Ensure the vanity is placed on a level floor. Use shims under the legs if needed to stabilize the unit.
