Noise or Squeaking:

The VECELO bed frame features an upgraded design with square steel slats and EVA non-slip strips to reduce friction and prevent noise. If you experience squeaking:

- Ensure all bolts and screws are securely tightened. Loose connections are a common cause of noise.
- Verify that the mattress is properly seated on the slats and not rubbing against the frame edges.
- Check the anti-slip foot pads are correctly installed and making full contact with the floor.

Mattress Sliding:
