

## Chofit ID208 BT

# Chofit Compatible with ID208 BT Smartwatch Bands User Manual

Model: ID208 BT Compatible Bands

## INTRODUCTION

---

This manual provides instructions for the installation, maintenance, and specifications of your Chofit replacement silicone watch bands. These bands are designed for compatibility with ID208 BT smartwatches, including models from ENOMIR, Aeac, Konitee, FACOI, and VRPEFIT. Please ensure your smartwatch model is listed for proper fitment.

## SETUP AND INSTALLATION

---

### 1. Unpacking

Carefully remove the watch bands from their packaging. Inspect them for any visible damage.

### 2. Attaching the Watch Band

These bands feature a quick-release mechanism for easy installation. Locate the small pin on the back of each band segment. To attach:

1. Slide the quick-release pin inward.
2. Align one end of the pin with the lug hole on your smartwatch.
3. Release the pin, ensuring it securely snaps into the opposite lug hole.
4. Gently pull on the band to confirm it is firmly attached.

Figure 1: Illustration of the quick-release pin for band attachment.

### 3. Adjusting the Band Size

The silicone bands are designed with multiple adjustment holes and a traditional tang buckle to fit various wrist sizes. Adjust the band to a comfortable fit that is snug but not too tight, allowing for proper sensor function on your smartwatch.

Figure 2: The buckle and adjustment holes for securing the band.

## OPERATING (WEARING INSTRUCTIONS)

---

Once installed, wear your smartwatch as you would any other watch. Ensure the band is comfortably secured to prevent excessive movement during activities, which could affect sensor readings or cause discomfort. The silicone material is suitable for daily wear, sports, and other activities.

## MAINTENANCE AND CARE

---

### Cleaning Your Bands

To maintain the appearance and hygiene of your silicone watch bands:

- Wipe the bands regularly with a soft, damp cloth.
- For deeper cleaning, use mild soap and water. Rinse thoroughly to remove all soap residue.
- Allow the bands to air dry completely before reattaching them to your smartwatch or wearing them.
- Avoid harsh chemicals or abrasive cleaners, as these can damage the silicone material or fade the patterns.

### General Care Tips

- Avoid prolonged exposure to direct sunlight or extreme temperatures, which can degrade silicone over time.
- While durable, avoid sharp objects that could cut or puncture the band.

## TROUBLESHOOTING

---

### Band Does Not Fit My Smartwatch

These Chofit bands are specifically designed for ID208 BT compatible smartwatches, including ENOMIR, Aeac, Konitee, FACOI, and VRPEFIT models. They are **not compatible** with Veryfit ID208 & Veryfit ID208 Plus. Please verify your smartwatch model number to ensure compatibility. If your model is listed and the band still does not fit, ensure the quick-release pins are correctly aligned and fully engaged in the lug holes.

### Discomfort or Skin Irritation

Ensure the band is not worn too tightly. Clean the band regularly as per the maintenance instructions to prevent buildup of sweat or debris that could cause irritation. If irritation persists, discontinue use and consult a healthcare professional.

## SPECIFICATIONS

---

Feature	Detail
Product Type	Replacement Smartwatch Band
Material	Soft Silicone
Clasp Type	Tang Buckle (Stainless Steel)
Compatibility	ID208 BT Smartwatches (ENOMIR, Aeac, Konitee, FACOI, VRPEFIT). <i>Not compatible with Veryfit ID208 &amp; Veryfit ID208 Plus.</i>
