## PHILIPS S9974/55

# Philips S9000 Wet & Dry Electric Shaver User Manual (Model S9974/55)

Model: S9974/55 | Brand: PHILIPS

## INTRODUCTION

---

This manual provides essential instructions for the safe and effective use of your Philips S9000 Wet & Dry Electric Shaver, model S9974/55. Please read this manual thoroughly before first use and retain it for future reference. The Philips S9000 shaver is designed to provide a close and comfortable shave, featuring SkinIQ technology for personalized skin comfort and Dual SteelPrecision blades for efficient hair removal. It is suitable for both wet and dry shaving.

## IMPORTANT SAFETY INFORMATION

---

**WARNING:** To reduce the risk of injury, fire, electric shock, or damage to the product, always follow basic safety precautions.

- Avoid direct contact with the shaver blades to prevent cuts.
- Regularly clean the appliance to prevent bacterial growth and maintain hygiene.
- Do not allow the appliance to come into contact with water while charging. Ensure the shaver is completely dry before connecting it to the charger.
- This appliance is not intended for use by persons with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- Children should be supervised to ensure that they do not play with the appliance.
- Only use the charger supplied with the product.

## PACKAGE CONTENTS

---

Verify that all items are present in your package:

- Philips S9000 Electric Shaver (Model S9974/55)

- Charging Stand
- Power Adapter/Charger
- Quick Clean Pod
- Integrated Pop-up Trimmer / Detachable Beard Trimmer (if applicable to model)
- Travel Case
- User Manual (this document)

## SETUP

### 1. Charging the Shaver

1. Ensure the shaver is dry before charging.
2. Connect the power adapter to the charging stand or directly to the shaver (if applicable).
3. Plug the adapter into a wall outlet.
4. Place the shaver in the charging stand or connect it directly. The battery indicator on the shaver will show charging progress.
5. A full charge takes approximately 1 hour and provides up to 60 minutes of shaving time. A 5-minute quick charge provides enough power for one shave.

## 2. Initial Use

Before the first shave, it is recommended to fully charge the shaver. Your skin may need 2-3 weeks to adapt to a new shaving system.

## OPERATING INSTRUCTIONS

---

### 1. Shaving

The Philips S9000 shaver can be used for both dry and wet shaving, with or without foam/gel.

- **Dry Shaving:** For best results, shave before washing your face.
  - **Wet Shaving:** Apply shaving foam or gel to your skin.
1. Press the on/off button to switch on the shaver.
  2. Move the shaver in small, circular motions over your skin.
  3. Apply gentle pressure. The integrated Pressure Guard sensor will provide feedback via a light indicator if you are applying too much or too little pressure, helping to protect your skin while achieving a close shave.
  4. The 360-degree flexible heads adapt to the contours of your face, ensuring maximum skin contact and a thorough shave, even in difficult areas like the neck and upper lip.

# SkinIQ

déetecte,  
guide et  
s'adapte  
à vous

Image 2: A man using the Philips S9000 shaver, demonstrating its ergonomic design and how it adapts to facial contours. The SkinIQ technology detects, guides, and adapts to your shaving style.

Pression toujours optimale grâce au capteur Pressure Guard

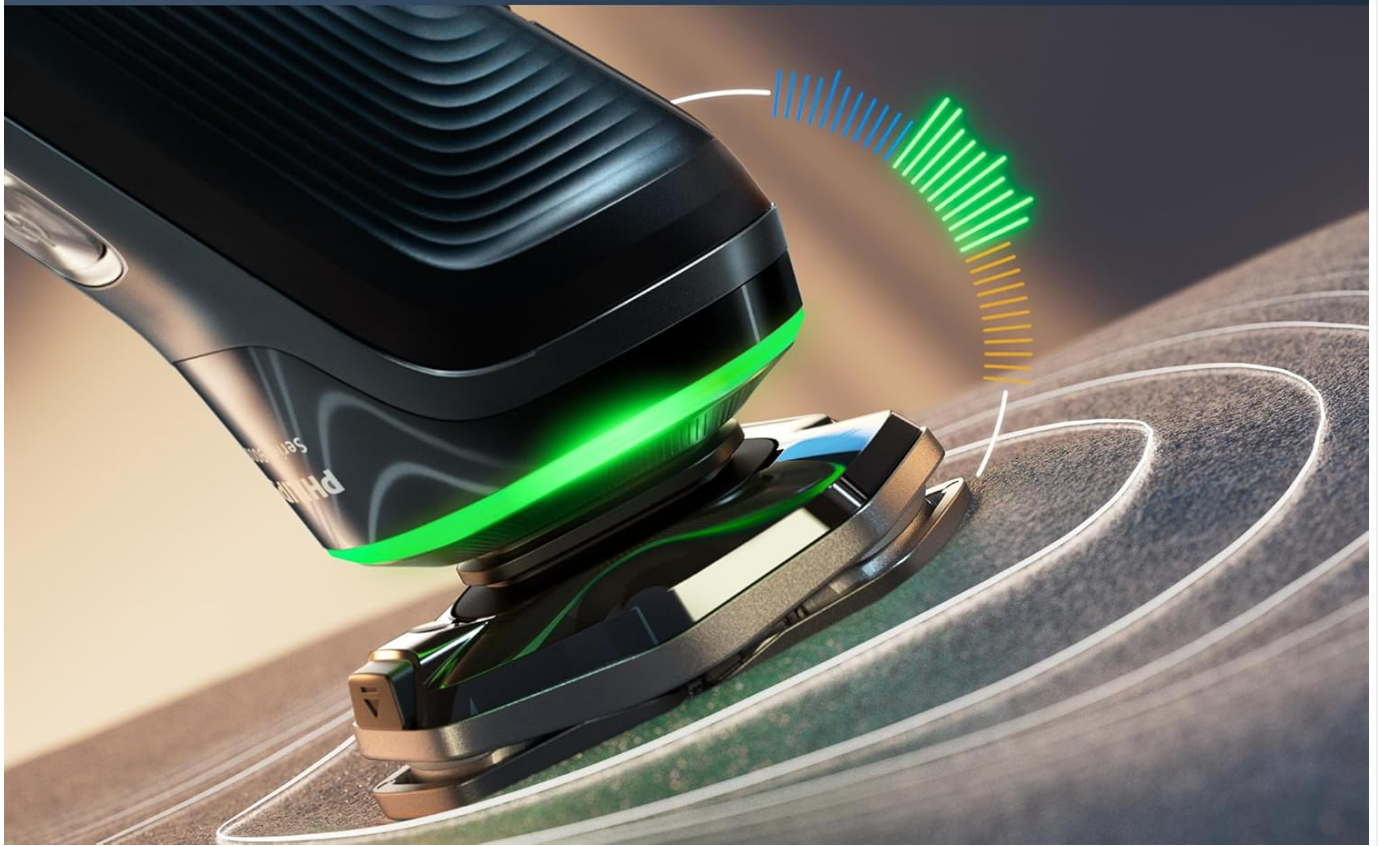

Image 3: Close-up of the shaver head showing the Pressure Guard sensor light, which indicates optimal pressure for shaving.

S'adapte à tous les contours de votre visage grâce aux **têtes flexibles 360-D**

Image 4: The shaver head demonstrating its 360-degree flexible movement, designed to follow every curve of the face for a close shave.

### Systeme Lift & Cut

Notre système Lift & Cut soulève et guide les poils de manière optimale, vous permettant ainsi de les couper à 0,000 mm sans vous couper

### Lames Dual SteelPrecision

Les 72 lames auto-affûtées Dual SteelPrecision hautes performances rasent de près en réalisant jusqu'à 150 000 coupes par minute.

### Capteur Pressure Guard

Les capteurs avancés du rasoir détectent la pression que vous exercez et vous indiquent lorsque vous appuyez trop fort ou trop peu

Image 5: Detailed view of the shaver's technology: the Lift & Cut system lifts hairs for a closer shave, Dual SteelPrecision blades provide efficient cutting, and the Pressure Guard sensor ensures optimal pressure.

## 2. Using the Pop-up Trimmer / Beard Trimmer

Use the integrated pop-up trimmer or detachable beard trimmer (if included) to trim sideburns, mustache, or define beard lines.

- Activate the trimmer by sliding the switch or attaching the accessory.
- Move the trimmer gently against the direction of hair growth for precise styling.

## MAINTENANCE AND CLEANING

Regular cleaning ensures optimal performance and hygiene of your shaver.

### 1. Daily Cleaning (After Each Use)

1. Switch off the shaver.
2. Open the shaving head unit by pressing the release button.
3. Rinse the shaving head unit thoroughly under warm running water.
4. Shake off excess water and allow the shaving head to air dry.
5. Close the shaving head unit.

### 2. Deep Cleaning with Quick Clean Pod

For a thorough cleaning and lubrication, use the Quick Clean Pod.

1. Place the Quick Clean Pod on a flat surface.
2. Insert the shaver into the Quick Clean Pod with the shaving head facing down.
3. Press the power button on the shaver to start the cleaning cycle. The cleaning process takes approximately 1 minute.

4. After cleaning, remove the shaver and rinse the shaving head under running water.
5. Replace the cleaning cartridge in the Quick Clean Pod when indicated or after approximately 30 cleaning cycles.

Image 6: The Philips S9000 shaver placed in its Quick Clean Pod, illustrating the automated cleaning process that takes approximately one minute.

### 3. Replacing Shaving Heads

For optimal shaving performance, replace the shaving heads every two years. Replacement heads are available from Philips retailers or online.

1. Switch off the shaver and disconnect it from the power supply.
2. Open the shaving head unit.
3. Remove the retaining ring by turning it counter-clockwise.
4. Remove the old shaving heads.
5. Insert the new shaving heads, ensuring they click into place.
6. Replace the retaining ring and turn it clockwise to secure.
7. Close the shaving head unit.

## TROUBLESHOOTING

---

Problem	Possible Cause	Solution
Shaver does not turn on.	Battery is empty.	Charge the shaver for at least 5 minutes.
Shaver does not shave effectively.	Shaving heads are dirty or worn out.	Clean the shaving heads thoroughly or replace them if they are older than two years.
Skin irritation after shaving.	Applying too much pressure or skin not adapted.	Use lighter pressure (monitor Pressure Guard light). Allow 2-3 weeks for skin to adapt. Consider wet shaving with foam/gel.
Shaver stops during use.	Battery is low.	Recharge the shaver.
