## 5. SETUP INSTRUCTIONS

The UGREEN USB 3.0 Hub is designed for simple plug-and-play operation. No additional drivers or software installation is required for most operating systems.

- 1. Connect the Hub to Your Host Device:** Insert the USB-A connector of the hub's integrated cable into an available USB-A port on your laptop, desktop PC, game console (e.g., Xbox, PS5), or other compatible host device.
- 2. Verify Connection:** A small LED indicator on the hub will illuminate, confirming a successful connection.
- 3. Connect Peripherals:** Plug your USB devices (e.g., mouse, keyboard, flash drive, printer, external hard drive) into the four available USB 3.0 ports on the hub.

## 8. TROUBLESHOOTING

- **Device Not Recognized:**

Ensure the hub is securely plugged into a functioning USB-A port on your host device. Try connecting the hub to a different USB-A port or a different host device to rule out port-specific issues. Verify that the peripheral device itself is working correctly by connecting it directly to your host device.

- **Slow Data Transfer:**

While the hub supports USB 3.0 speeds, the actual transfer rate can be limited by the slowest component in the chain (e.g., a USB 2.0 device, the host device's USB port, or the storage device itself). Ensure all connected devices and the host port support USB 3.0 for optimal performance.

- **Insufficient Power for Certain Devices:**

The UGREEN USB 3.0 Hub is a bus-powered hub, meaning it draws power directly from the host device's USB port. Some high-power-consumption devices (e.g., certain external hard drives, wireless headphone receivers, or multiple power-hungry devices simultaneously) may require more power than a bus-powered hub can provide. If you experience intermittent connections or device malfunctions with such peripherals, consider using a self-powered USB hub (one with an external power adapter) or connecting the high-power device directly to your host device.

- **LED Indicator Not On:**

If the LED indicator on the hub does not light up, ensure the hub's USB-A connector is fully inserted into the host device's USB port. Try a different USB port on your host device.

## 9. MAINTENANCE

- Keep the hub clean and free from dust. Use a soft, dry cloth for cleaning.
- Avoid exposing the hub to extreme temperatures, humidity, or direct sunlight.
- Do not attempt to disassemble or repair the device yourself. Contact customer support if issues arise.
- Store the hub in a safe place when not in use to prevent physical damage.
