## BXQ BXQ-BC01

# BXQ Bark Collar User Manual

Model: BXQ-BC01

## 1. INTRODUCTION

Thank you for choosing the BXQ Bark Collar. This device is designed to assist in training your dog to reduce excessive barking through humane and effective methods. It features multiple training modes, adjustable sensitivity, and smart anti-false triggering technology to ensure a safe and positive training experience for your pet. Please read this manual thoroughly before use to ensure proper operation and to maximize the benefits of this product.

## 2. SAFETY INFORMATION

- This device is intended for dog training purposes only. Do not use it on aggressive dogs or for any other purpose.
- Do not leave the collar on your dog for more than 12 hours per day. Prolonged wear can lead to skin irritation.
- Regularly check your dog's neck for any signs of irritation or sores. If irritation occurs, discontinue use and consult a veterinarian.
- Ensure the collar is fitted correctly. It should be snug enough for the contact points to touch the skin, but not so tight as to restrict breathing or cause discomfort.
- Keep the device out of reach of children.
- Do not attempt to disassemble or modify the collar. This will void the warranty and may cause damage or injury.

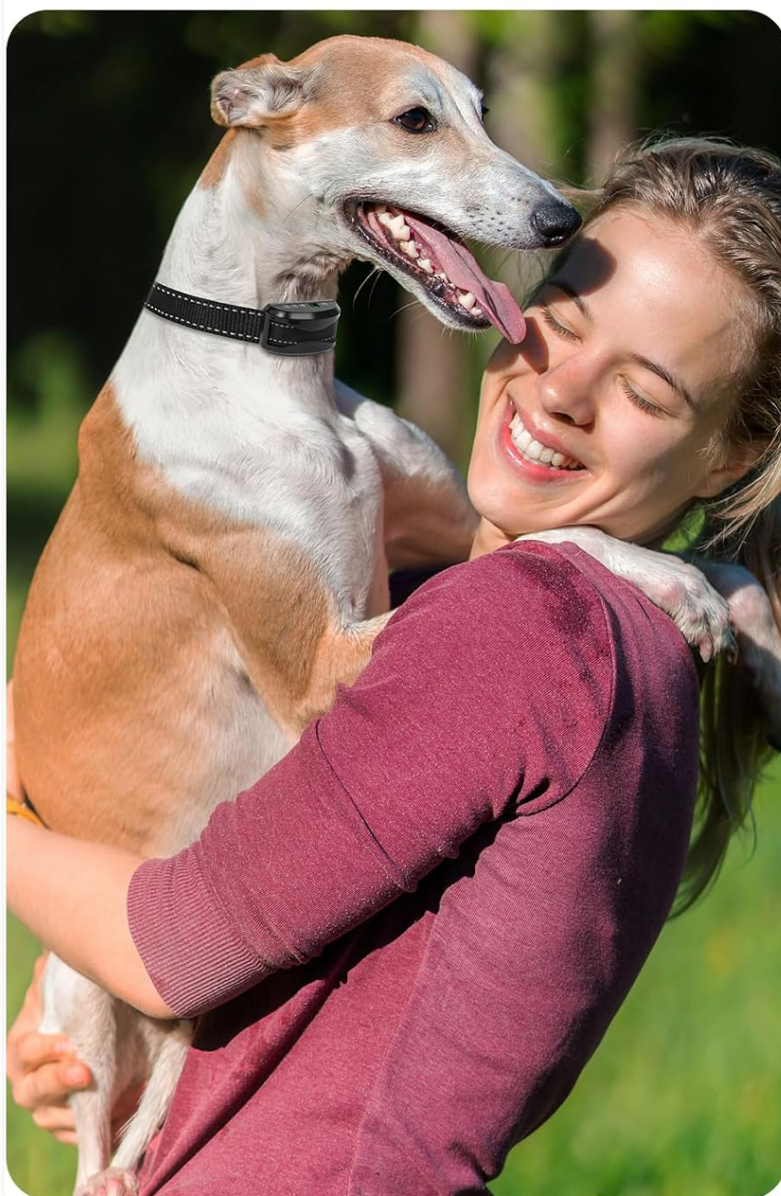

## 3. PACKAGE CONTENTS

- BXQ Bark Collar Device
- Adjustable Nylon Collar Strap
- USB Charging Cable
- User Manual (this document)
- Contact Points (short and long, if applicable)
- Test Light (if applicable)

#### 4. PRODUCT OVERVIEW

The BXQ Bark Collar features a compact design with an integrated display and control buttons. It is equipped with smart barking recognition technology to prevent false triggers.

## New Upgraded Design

**Smart Anti False Trigger**

**Beep Mode**

**Vibration Mode  
(7 Level)**

**Static Shock  
Mode (7 Level)**

**7 Sensitivity  
Levels**

**Auto-protection  
Mode**

**For dogs 8-120lbs**

Image: A dog being hugged by a person, with an infographic detailing the collar's features: Smart Anti False Trigger, Beep Mode, Vibration Mode (7 Level), Static Shock Mode (7 Level), 7 Sensitivity Levels, Auto-protection Mode, and suitability for dogs 8-120 lbs.

## Key Components:

- **Control Buttons:** Power, Mode, Sensitivity Adjustment.
- **LED Display:** Shows battery level, mode, and sensitivity settings.
- **Contact Points:** Deliver vibration or static correction.
- **USB Charging Port:** For recharging the internal battery.

## 5. SETUP

### 5.1 Charging the Collar

Before first use, fully charge the bark collar. Connect the USB charging cable to the collar's charging port and plug the other end into a USB power source (e.g., USB adapter, power bank, car charger, or laptop/PC). The LED display will indicate charging status. A full charge typically takes approximately 2 hours and provides up to 10-15 days of usage, depending on frequency of activation.

## Economical USB Charging

Built-in 300mAh lithium battery

**2 Hours**   
Quick Charge Time

**10 Days**   
Using Time

 **USB Adapter**     **Power Bank**     **Car Charger**     **Laptop/PC**

Image: A close-up of the collar's charging port with a USB cable connected, illustrating the 2-hour quick charge time and 10-day using time, along with compatible charging methods (USB Adapter, Power Bank, Car Charger, Laptop/PC).

## 5.2 Adjusting and Fitting the Collar

The collar strap is adjustable to fit dogs weighing 8-120 lbs with neck sizes ranging from 7-26 inches. Ensure the collar is properly sized for your dog.

1. Adjust the nylon strap to fit your dog's neck. The collar should be snug, allowing two fingers to fit comfortably between the strap and your dog's neck.
2. Position the collar so that the contact points are directly underneath your dog's throat, making good contact with the skin. For dogs with thick fur, you may need to trim the fur slightly to ensure proper contact.
3. Ensure the collar is not too loose, as this can lead to inconsistent activation or skin irritation from rubbing.

# Suitable for Most Size of Dogs

Suitable for Most Size of Dogs Adjustable Strap for Dogs(8-120lbs)

Soft and comfortable

23inch

## 6. OPERATING INSTRUCTIONS

### 6.1 Power On/Off

- To turn on: Press and hold the power button until the LED display lights up.
- To turn off: Press and hold the power button until the LED display turns off.

## 6.2 Training Modes

The BXQ Bark Collar offers 4 training modes with 7 adjustable levels for each, allowing you to customize the training experience for your dog. The modes are categorized into 'No Shock' and 'Shock' options.

**4 Humanized Training Modes**  
**Stop Barking More Scientific and Easier**

**No Shock: Modes**

- 1** **Beep**
- 2** + **Beep + Vibration** (7 Level)

**Shock Modes**

- 1** + **Beep + Shock** (7 Level)
- 2** + + **Beep + Vibration + Shock** (7 Level)

**Please set to Level 0 if you don't wanna shock your dog.**

Image: A golden retriever and a child, with an infographic detailing the four training modes: No Shock Modes (Beep, Beep + Vibration) and Shock Modes (Beep + Shock, Beep + Vibration + Shock), each with 7 levels. A warning advises setting to Level 0 if shock is not desired.

- **No Shock Modes:**
  - **Beep Only:** The collar emits an audible beep when barking is detected.
  - **Beep + Vibration:** The collar emits a beep followed by a vibration when barking is detected.
- **Shock Modes:**
  - **Beep + Static Shock:** The collar emits a beep followed by a static correction when barking is detected.
  - **Beep + Vibration + Static Shock:** The collar emits a beep, then vibration, then static correction when

barking is detected.

To switch between modes, press the 'Mode' button. The display will show the current mode. You can adjust the intensity of vibration and static shock (from 1 to 7 levels) using the sensitivity adjustment buttons.

Image: A close-up of the collar's control panel with a finger pressing a button, illustrating the 7 adjustable sensitivity levels. Levels 1-3 are for noisy environments, 4-5 for normal environments, and 6-7 for quiet environments.

### 6.3 Smart Anti-False Triggering

The BXQ Bark Collar incorporates an upgraded smart dog barking recognition chip. This technology helps to filter out irrelevant sounds such as other dogs barking, dog head shaking, or other environmental noises, ensuring that the collar only activates in response to your dog's actual barking. This prevents unnecessary corrections and promotes more effective training.

# Smart Anti False Triggering

Filter irrelevant sounds  
and prevent false triggering.

Dog's Head Shaking

Other Animal's Barking

Other Noise

Image: Two dogs, one barking, with a shield icon representing the smart anti-false triggering feature. Icons show examples of filtered sounds: dog's head shaking, other animal's barking, and other noise.

## 6.4 Automatic Anti-Barking & Protection Mode

The collar operates automatically once turned on. It detects your dog's barking and applies the selected correction. For your dog's safety, the collar features a built-in protection mode. If the collar triggers more than 7 times within a 30-second period, it will temporarily stop working for 2 minutes (the digital display will show "E"). This prevents over-correction. The collar will resume normal operation after 2 minutes or if the power button is pressed.

## 7. MAINTENANCE

### 7.1 Cleaning

Regularly clean the collar and contact points with a damp cloth. Ensure the device is dry before recharging or re-applying to your dog. Do not use harsh chemicals or abrasive cleaners.

### 7.2 Battery Care

To prolong battery life, avoid fully discharging the battery frequently. Recharge the collar when the low battery indicator appears on the display. Store the collar in a cool, dry place when not in use for extended periods.

### 7.3 Waterproofing

The BXQ Bark Collar is rated IP67 waterproof, meaning it is protected against immersion in water up to 1 meter for up to 30 minutes. This allows your dog to wear it during swimming, bathing, or playing in the rain. However, ensure the charging port cover is securely closed before exposing the collar to water.

Image: A dog playing in water with the collar on, illustrating its IP65 waterproof capability for bathing and raining conditions.

## 8. TROUBLESHOOTING

| Problem | Possible Cause | Solution |
|---------|----------------|----------|
|---------|----------------|----------|

| Problem                                            | Possible Cause                                                                          | Solution                                                                                                                                                        |
|----------------------------------------------------|-----------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Collar not turning on                              | Low battery; Device off.                                                                | Charge the collar; Press and hold power button to turn on.                                                                                                      |
| Collar not activating when dog barks               | Collar too loose; Fur obstructing contact; Sensitivity too low; Protection mode active. | Adjust collar fit; Trim fur; Increase sensitivity level; Wait for protection mode to reset or press power button.                                               |
| Collar activating without barking (false triggers) | Sensitivity too high; Environmental noise.                                              | Decrease sensitivity level; Ensure collar is not rubbing against other objects.                                                                                 |
| Battery not holding charge                         | Charging cable/adaptor faulty; Battery degradation.                                     | Try a different USB cable and adapter; Contact customer support if issue persists.                                                                              |
| Display shows "E"                                  | Protection mode activated.                                                              | The collar has activated more than 7 times in 30 seconds and is temporarily paused for 2 minutes. It will resume automatically or by pressing the power button. |

## 9. SPECIFICATIONS
