5. Setup and Installation

Follow these steps for easy installation of your floating wall shelves.

1. **Choose Location:** Select a suitable wall location. Ensure there are no hidden electrical wires or plumbing in the drilling area.

2. **Mark Holes:** Hold the metal bracket against the wall at the desired height and use a pencil to mark the drilling points for the screws. Use a level to ensure the marks are perfectly horizontal.
3. **Drill Holes:** Drill pilot holes at the marked points. For solid walls, use a drill bit appropriate for the wall anchors. For drywall with studs, drill directly into the studs. If drilling into drywall without studs, insert the plastic wall anchors into the drilled holes.
4. **Attach Bracket:** Secure the metal bracket to the wall using the provided screws. Ensure it is firmly attached and level.
5. **Mount Shelf:** Slide the shelf onto the metal rods of the bracket. The shelf should fit snugly and securely.
