APLOS F30

APLOS F30 Zoom LED Flashlight User Manual

Model: F30

1. INTRODUCTION

Thank you for choosing the APLOS F30 Zoom LED Flashlight. This manual provides essential information for the safe and efficient operation, maintenance, and troubleshooting of your device. Please read it thoroughly before use and retain it for future reference.

Figure 1: APLOS F30 Zoom LED Flashlight and USB-C cable.

2. SAFETY INFORMATION

- Do not shine the flashlight directly into eyes. The high lumen output can cause temporary vision impairment or permanent eye damage.
- Keep out of reach of children.
- Do not disassemble the flashlight, as this may void the warranty and cause damage.
- Use only the specified battery type and charging methods.

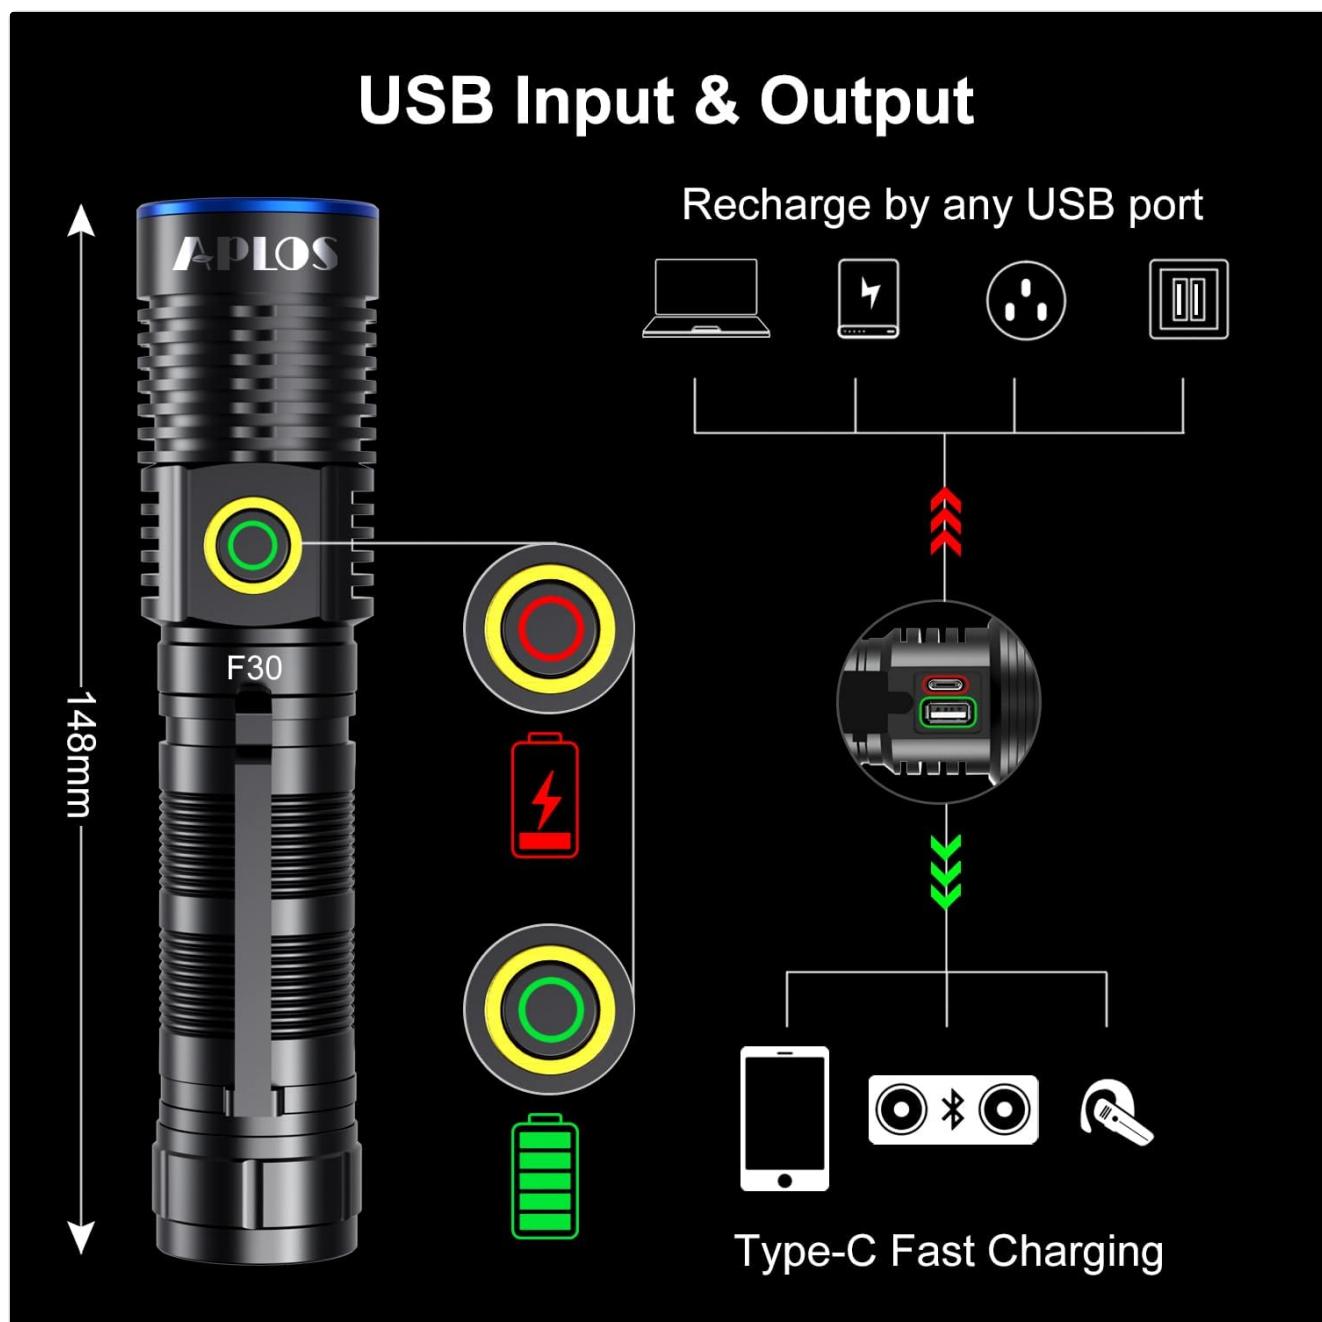

- Avoid exposing the flashlight to extreme temperatures or direct sunlight for prolonged periods.
- While the flashlight is rated IPX6 water-resistant, it is not suitable for diving or prolonged submersion.

3. PACKAGE CONTENTS

- APLOS F30 Zoom LED Flashlight
- Rechargeable Lithium-Ion Battery (pre-installed or separate)
- USB-C Charging Cable
- Wrist Lanyard
- User Manual

4. PRODUCT OVERVIEW

The APLOS F30 features a durable aluminum body, a side-mounted power button with indicator, a zoomable head, and USB-C input/output ports.

5. SETUP

5.1 Initial Charging

1. Before first use, fully charge the flashlight.
2. Locate the USB-C charging port on the side of the flashlight.
3. Connect the provided USB-C cable to the flashlight and the other end to a USB power source (e.g., wall adapter, computer, power bank).
4. The indicator light on the power button will show charging status (typically red for charging, green for fully charged).

6. OPERATING INSTRUCTIONS

6.1 Power On/Off

- Press the side power button once to turn the flashlight ON.
- Press the side power button once again to turn the flashlight OFF.

6.2 Changing Light Modes

With the flashlight ON, single-press the power button to cycle through the main lighting modes:

- High
- Medium
- Low

To activate Strobe mode, double-click the power button quickly from any ON state.

6.3 Adjustable Focus (Zoom)

The APLOS F30 features an adjustable head for changing the beam focus:

- **Floodlight:** Pull the flashlight head back to widen the beam for broad area illumination.
- **Spotlight:** Push the flashlight head forward to narrow the beam for long-distance, focused illumination.

6.4 Stepless Dimming

For precise brightness control, the flashlight supports stepless dimming:

- With the flashlight ON, press and hold the power button. The brightness will gradually dim from 100% to 20%.
- Release the button at your desired brightness level.
- Press and hold the button again to gradually brighten the light from 20% back to 100%.

After turning on the light, long-press for seamless dimming from

100% to 20%

Figure 5: Stepless dimming operation.

6.5 Power Bank Function

The APLOS F30 can function as a power bank to charge other devices:

1. Ensure the flashlight has sufficient battery charge.
2. Connect your device (e.g., smartphone, tablet) to the USB-A output port on the flashlight using an appropriate charging cable.
3. The flashlight will begin charging your device.

7. CHARGING

The flashlight is equipped with a rechargeable battery and a USB-C charging port.

7.1 Charging Indicator

- **Red Light:** Indicates the battery is charging.
- **Green Light:** Indicates the battery is fully charged.

Figure 6: Charging and power bank functionality with indicator lights.

8. MAINTENANCE

8.1 Cleaning

- Wipe the flashlight with a clean, soft cloth.
- Do not use abrasive cleaners or solvents.

8.2 Storage

- Store the flashlight in a cool, dry place away from direct sunlight.
- If storing for an extended period, charge the battery every 3-6 months to maintain battery health.

9. TROUBLESHOOTING

Problem	Possible Cause	Solution
Flashlight does not turn on.	Low battery.	Charge the battery fully.
Flashlight does not turn on.	Battery not properly installed.	Ensure the battery is correctly inserted with the positive (+) end facing the head of the flashlight.
Light output is dim.	Low battery.	Charge the battery fully.
Light output is dim.	Lens is dirty.	Clean the lens with a soft cloth.
Cannot charge external device.	Flashlight battery is low.	Charge the flashlight battery.
Cannot charge external device.	Incorrect cable or port used.	Ensure using the USB-A output port and a compatible cable for your device.
