SETUP AND ASSEMBLY

The Eleanor bed frame is designed for hassle-free installation with a user-friendly assembly manual included in the packaging. It is recommended to have two adults for assembly.

A box spring is required for this bed frame to provide proper mattress support and enhance comfort and stability. Consider the following box spring options based on your mattress thickness and desired bed height:

- **Platform Beds:** Choose a 2" Ultra Low Profile Box Spring.
- **For Mattress Thickness Above 14":** Choose a 5" Low Profile Box Spring.
- **For Mattress Thickness Under 14":** Choose a 9" Standard Profile Box Spring.

USAGE GUIDELINES

The Eleanor bed frame is designed for standard bedroom use. Ensure your mattress is properly centered on the box spring and bed frame for even weight distribution and optimal support. Avoid jumping on the bed or applying excessive localized force, as this can compromise the frame's integrity. Regularly check all connections and fasteners to ensure they remain tight and secure.

MAINTENANCE AND CARE

Proper care will help maintain the appearance and longevity of your bed frame.

- **Upholstery Care:** The boucle fabric headboard should be dry cleaned only. Do not use liquid cleaners or

abrasive materials, as this may damage the fabric.

- **Metal Frame Care:** The gunmetal black metal frame can be wiped clean with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners.
- **Regular Inspection:** Periodically check all bolts and screws to ensure they are tight. Re-tighten if necessary to maintain stability.

TROUBLESHOOTING

If you encounter any issues with your bed frame, please refer to the following common solutions:

- **Squeaking Noises:** Squeaking can often be resolved by ensuring all assembly bolts and screws are securely tightened. Over time, connections may loosen, requiring re-tightening. Check the box spring and mattress for proper placement and fit.
- **Instability/Wobbling:** Verify that the bed frame is assembled on a flat, level surface. Re-check all connections

and ensure all support legs are making firm contact with the floor.
