## 5. MAINTENANCE AND CARE

---

### 5.1 Corduroy Velvet Fabric Care

The bed frame is upholstered in beige corduroy velvet (100% Polyester).

- **Regular Cleaning:** Gently vacuum the fabric regularly using an upholstery attachment to remove dust and loose particles.
- **Spot Cleaning:** For spills, blot immediately with a clean, dry cloth. Do not rub. For stubborn stains, use a mild fabric cleaner specifically designed for velvet or polyester, testing on an inconspicuous area first. Follow the cleaner's instructions carefully.
- **Avoid:** Do not use harsh chemicals, abrasive cleaners, or excessive moisture, as these can damage the fabric. Keep the bed away from direct sunlight to prevent fading.

## 5.2 Mattress Care (AUDACE Mattress)

The AUDACE mattress is a hybrid mattress with pocket springs and high-resilience foam.

- **Rotation:** Rotate the mattress head-to-foot every 3-6 months to ensure even wear and prolong its lifespan. This mattress does not require flipping.
- **Protection:** Use a mattress protector to shield against spills, stains, and allergens.
- **Cleaning:** Spot clean any stains on the mattress cover with a mild detergent and a damp cloth. Allow to air dry completely. Do not saturate the mattress.
- **Ventilation:** Ensure good air circulation around the mattress by occasionally removing bedding.

## 5.3 Frame Care

- Periodically check all bolts and screws and tighten them if necessary to maintain stability.
- Wipe down wooden or metal parts with a soft, damp cloth.

# 6. TROUBLESHOOTING

## 6.1 Squeaking Noises

- **Cause:** Loose connections or friction between parts.
- **Solution:** Tighten all assembly bolts and screws. If squeaking persists, apply a small amount of silicone lubricant to contact points between metal or wood components.

## 6.2 Storage Mechanism Stiffness

- **Cause:** New mechanism, uneven weight distribution, or obstruction.
- **Solution:** The hydraulic lift may be stiff initially; it will ease with use. Ensure the mattress is centered. Check for any items obstructing the mechanism's movement. Do not force the mechanism.

### 6.3 Mattress Sagging

- **Cause:** Normal wear over time, or improper support.
- **Solution:** Ensure the mattress is rotated regularly (head-to-foot). Verify that the slatted base is intact and providing even support.
