SETUP AND INSTALLATION

Follow these steps to install the replacement parts. Always ensure the robot vacuum is powered off and unplugged before performing any maintenance.

1. Main Roller Brush Installation

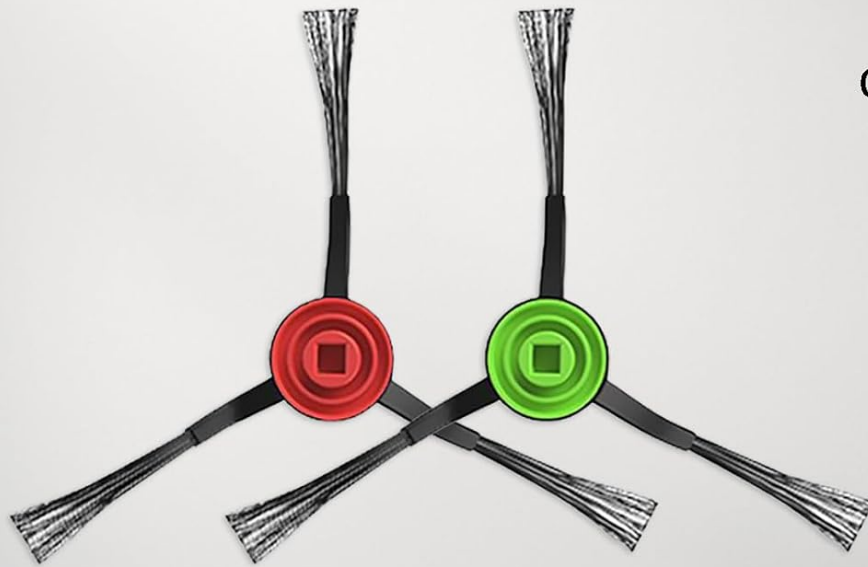

1. Turn the robot vacuum upside down.
2. Locate the brush guard and unlatch it.
3. Remove the old main roller brush.
4. Insert the new main roller brush, ensuring it clicks into place.
5. Close and latch the brush guard.

2. Side Brush Installation

1. Turn the robot vacuum upside down.
2. Using a screwdriver, remove the screw holding the old side brush.
3. Remove the old side brush.
4. Align the new side brush with the post and press it down firmly until it clicks into place.
5. Secure with the screw.

3. HEPA Filter Replacement

1. Open the dustbin compartment on your robot vacuum.
2. Remove the dustbin.
3. Locate the filter frame within the dustbin and remove the old HEPA filter.
4. Insert the new HEPA filter into the filter frame, ensuring a snug fit.
5. Reinsert the dustbin into the robot vacuum.

OPERATING CONSIDERATIONS

While these accessories do not directly control the robot vacuum's operation, their proper installation and maintenance are critical for the vacuum's effective functioning. Ensure all parts are securely installed before operating the robot vacuum.

- **Main Roller Brush:** A clean main brush ensures efficient debris pickup from various floor types.
- **Side Brushes:** These brushes are essential for sweeping debris from edges and corners into the vacuum's path.
- **HEPA Filter:** A clean filter maintains strong suction power and prevents dust and allergens from recirculating into the air.
- **Dust Bag:** A properly installed dust bag in the self-emptying station ensures hygienic and efficient disposal of collected debris.

Maintenance and Replacement Schedule

To ensure your robot vacuum maintains optimal performance and cleaning efficiency, we recommend adhering to the following replacement schedule:

Component	Recommended Replacement Frequency	Notes
Main Roller Brush	Every 3-6 months	Inspect regularly for tangled hair or debris. Clean as needed.
Side Brushes	Every 3-6 months	Replace if bristles are bent or worn.
HEPA Filters	Every 2-3 months	Tap clean regularly to remove dust. Do not wash.
Dust Bags	As needed (approx. every 30 dustbin empties)	Replace when the self-emptying station indicates it's full.

Note: Actual replacement frequency may vary based on usage intensity, pet hair presence, and environmental conditions.

Troubleshooting

This section addresses common issues related to the replacement accessories. For issues with the robot vacuum itself, please refer to its original user manual.

Problem	Possible Cause	Solution
Reduced suction power after filter replacement.	Filter not seated correctly or dustbin not fully closed.	Ensure the HEPA filter is properly inserted into the dustbin and the dustbin is securely closed in the vacuum.
Side brushes falling off during cleaning.	Side brush not securely screwed in or worn mounting post.	Ensure the side brush screw is tightened. If the mounting post is damaged, contact lonvac support.
Main brush making unusual noise or not rotating.	Debris tangled in brush or brush not installed correctly.	Remove the main brush and clear any tangled hair or debris. Reinstall, ensuring it clicks into place.
Self-emptying station not emptying dustbin.	Dust bag full or not installed correctly.	Replace the dust bag if full. Ensure the new dust bag is fully inserted and the station lid is closed.
