Safety Information

Your safety is paramount. Adhere to the following guidelines to prevent injury or damage to the product:

- **Professional Installation:** Installation and subsequent adjustments must be carried out only by qualified personnel.
- **Wall Fixing:** To avoid any risk of tipping, the bed unit must be securely fixed to a solid support (wall) using the supplied elements. Regular checks of these fixings are essential.
- **Wall Type:** The bed comes with plugs suitable for solid walls. If fixing to other surfaces (e.g., plasterboard, hollow walls), use appropriate plugs and screws adapted for that specific wall type.
- **Installation Surface:** The installation surface must be in good condition. The floor must be flat, smooth, and horizontal to ensure proper operation and stability.
- **Mattress Weight:** Do not exceed the maximum recommended mattress weight of 22 kg.
- **Bed Base Weight Capacity:** The bed base supports a maximum weight of 185 kg for the 140 x 200 cm bed. Do not exceed this limit.
- **Children and Pets:** Keep children and pets away from the bed during opening and closing operations.

Maintenance

- **Mechanism Check:** Regularly inspect the opening and closing mechanism for any signs of wear or damage. Ensure it operates smoothly and silently.
- **Wall Fixings:** Periodically check the wall fixings to ensure they remain secure. Tighten any loose screws if necessary. This is a critical safety check.
- **Bed Base:** Inspect the beech wood slats for any cracks or damage. Replace any damaged slats immediately to maintain proper mattress support.
- **Mattress Care:** Follow the care instructions provided by your mattress manufacturer. Ensure the mattress weight does not exceed 22 kg.
