JJC MSG-P1

JJC MSG-P1 Magnetic Phone Camera Grip with Wireless Shutter Remote User Manual

Model: MSG-P1 | Brand: JJC

1. Introduction

This manual provides detailed instructions for the safe and effective use of your JJC MSG-P1 Magnetic Phone Camera Grip with Wireless Shutter Remote. Please read this manual thoroughly before using the product to ensure optimal performance and to prevent damage.
The JJC MSG-P1 is designed to enhance your mobile photography and videography experience by providing a comfortable grip, stable handling, and remote shutter control for both iPhone and Android smartphones.

2. Package Contents

Verify that all items listed below are included in your package:

- Magnetic Phone Grip x1
- Wireless Remote x1
- Type-C Cable x1
- Phone Lanyard x1
- Safety String x1
- 3M Adhesive Metal Ring x1
- Clear Protective Film x1
- Wet Cleaning Wipe x1

Image: All components included in the JJC MSG-P1 package, laid out on a surface. These include the magnetic phone grip, wireless remote, Type-C cable, phone lanyard, safety string, 3M adhesive metal ring, clear protective film, and wet cleaning wipe.

3. Setup Guide

3.1 Attaching the Phone Grip

1. **For MagSafe Compatible Phones (iPhone 12 series and newer, or MagSafe cases):**
   Align the magnetic phone grip with the MagSafe area on the back of your phone or MagSafe-compatible case. The strong magnets will securely snap the grip into place.

Image: A hand holding an iPhone with the black JJC Magnetic Phone Grip securely attached to its back via MagSafe. The grip is positioned for comfortable one-handed use.

2. **For Other Phones (Android or non-MagSafe iPhones):**
   Use the included 3M adhesive metal ring. Clean the back of your phone or case with the wet cleaning wipe, apply the clear protective film, then firmly attach the metal ring to the desired position on your phone/case. Ensure the ring is centered for optimal magnetic connection. Once the ring is attached, the magnetic phone grip can be snapped onto it.

Image: An illustration showing how the JJC Magnetic Phone Grip attaches to MagSafe-compatible iPhones directly, and how it attaches to other smartphones using the included adhesive metal ring.

3.2 Pairing the Wireless Remote

1. Remove the wireless remote from the phone grip. It is magnetically held in place.
2. Ensure Bluetooth is enabled on your smartphone.
3. Press and hold the switch button on the remote for 2-3 seconds until the indicator light intermittently flashes.
4. On your smartphone, navigate to Bluetooth settings and look for "MSG-P1" or "PhoneShutter" in the list of available devices.
5. Select "MSG-P1" or "PhoneShutter" to pair. The indicator light on the remote will turn blue when successfully connected.
6. If pairing is unsuccessful, clear any previous pairing information for "MSG-P1" or "PhoneShutter" on your phone and retry the process.

4. Operating Instructions

4.1 Using as a Phone Grip

Once attached, hold your smartphone with the grip. The ergonomic design provides a comfortable and stable hold, similar to a traditional camera, reducing shake during photo or video capture.

4.2 Using the Wireless Remote

With the remote paired, open your smartphone's camera application. Press the button on the remote to trigger the shutter for photos or to start/stop video recording. The remote functions up to 32.8 feet (10 meters) away.

4.3 Using as a Phone Stand

The phone grip features a foldable design that allows it to function as a tabletop stand. You can easily rotate your phone from landscape to portrait orientation while it is on the stand, providing versatility for viewing content, video calls, or live streaming hands-free.

4.4 Attaching to a Tripod

The bottom of the phone grip includes a 1/4" tripod screw thread. This allows you to mount the grip directly onto any standard tripod or monopod, further enhancing stability for professional-grade shots.

5. Maintenance

- Keep the device clean and free from dust and moisture.
- Avoid exposing the device to extreme temperatures or direct sunlight for prolonged periods.
- Clean the magnetic surfaces periodically to ensure a strong connection.
- The wireless remote is rechargeable via the included Type-C cable. Ensure it is charged regularly for uninterrupted use.

6. Troubleshooting

Problem	Possible Cause	Solution

Problem	Possible Cause	Solution
Phone grip not attaching securely.	Weak magnetic connection or incorrect placement.	Ensure your phone/case is MagSafe compatible or the metal ring is correctly installed. Clean magnetic surfaces.
Wireless remote not pairing.	Bluetooth not enabled, remote not in pairing mode, or previous pairing conflict.	Enable Bluetooth on your phone. Press and hold remote button for 2-3 seconds to enter pairing mode. Clear previous "MSG-P1" or "PhoneShutter" pairings from your phone's Bluetooth list and retry.
Remote turns off after long press.	This is a design feature to prevent accidental activation and save battery.	To re-pair, press and hold the switch button for 2-3 seconds until the indicator light intermittently flashes.
Remote not taking photos/videos.	Camera app not open, remote not paired, or remote battery low.	Ensure camera app is open and active. Verify remote is paired (blue light). Charge the remote using the Type-C cable.
