Note: The efficient packaging of this Ready-To-Assemble (RTA) vanity may result in separate deliveries for different components. Clear instructions and numbered parts are provided to ensure straightforward assembly. Some users have noted that the bottom drawer may require modification to accommodate the P-trap plumbing, and a new drain might be

needed to fit the P-trap properly. Please consult a professional plumber if you are unsure about plumbing installations.

Maintenance

Regular cleaning and proper care will ensure the longevity and appearance of your eclife bathroom vanity.

- **Cleaning the Cabinet:** The cabinet is made from selected MDF board with a painted finish, making it easy to clean and maintain. Use a soft, damp cloth with mild soap and water. Avoid abrasive cleaners or harsh chemicals that could damage the finish.
- **Cleaning the Sink:** The SMC (Sheet Molding Compound) sink is lightweight and shatter-resistant. Clean with non-abrasive bathroom cleaners and a soft sponge or cloth. Rinse thoroughly after cleaning.
- **Cleaning the Faucet:** The matte black faucet should be cleaned with a soft cloth and mild soap. Avoid harsh chemicals or abrasive materials that can scratch the finish. Fingerprints are less visible on the matte black finish

compared to polished surfaces.

- **Preventing Water Damage:** Always wipe away standing water from the vanity surface and inside drawers to prevent moisture damage.

Troubleshooting

If you encounter any issues with your vanity, please refer to the following common solutions:

- **Drawers not closing smoothly:** Check the soft-close mechanisms for any obstructions. Ensure the drawer slides are properly aligned and free of debris.
- **Sink not draining properly:** Verify that the push-down drain is in the open position. Check for any clogs in the drain or P-trap.
- **Leaks around plumbing:** Tighten all plumbing connections, including the faucet, drain, and supply lines. If leaks persist, professional assistance may be required.
- **Water spots on faucet:** Use a soft, dry cloth to wipe the faucet after each use to prevent water spots, especially in hard water areas.
