### Coolfiqu LP-2113

# Coolfiqu 6L Cool and Warm Mist Humidifier (Model LP-2113) User Manual

Your guide to a comfortable and healthy environment.

## 1. INTRODUCTION

---

Thank you for choosing the Coolfiqu 6L Cool and Warm Mist Humidifier, Model LP-2113. This device is designed to enhance your indoor air quality by providing both cool and warm mist options, suitable for various environments including bedrooms, large rooms, nurseries, offices, and for plant care. It features a large 6-liter capacity, top-fill design, essential oil diffusion, and intelligent controls for a quiet and efficient operation.

## 2. IMPORTANT SAFETY INSTRUCTIONS

Please read and follow all safety instructions before using this humidifier to prevent injury or damage to the device.

- Always place the humidifier on a firm, flat, waterproof surface away from walls and heat sources.
- **Before first use, remove the white foam from the base of the humidifier.** Failure to do so will prevent proper operation.
- Do not immerse the humidifier base in water or other liquids.
- Do not pour water into the mist outlet.
- Do not store more than the maximum water level indicated.
- Unplug the humidifier before filling, cleaning, or moving it.
- Keep out of reach of children and pets.

- The humidifier features an anti-dry burn function, which automatically shuts off the device and activates a red indicator light if the water level is too low.

### 3. PRODUCT COMPONENTS

Familiarize yourself with the main parts of your Coolfiqu humidifier:

- **Top Water Tank:** Main water reservoir with a 6-liter capacity.
- **Nozzle Cap:** Directs mist output, 360° rotatable.
- **Control Panel:** Digital display and touch buttons for settings.
- **Base Unit:** Houses the ultrasonic nebulizer, fan, and electronic components.
- **Essential Oil Diffuser Tray:** For adding essential oils.
- **Water Purification Device:** Inhibits bacteria growth in the water tank.
- **Filters:** For filtering impurities in water.

## Installation steps

**1** Tear off the tape

**2** Remove foam from the base

Align the nozzle cap with the humidifier cup lid, and then press them to assemble

Nozzle cap aligned with opposite side of humidifier cup lid

After that, place the assembled cup lid on the water tank

## 4. SETUP

Follow these steps for initial setup:

1. **Unpack:** Carefully remove all packaging materials from the box.
2. **Remove Foam:** Locate and remove the white foam from the base of the humidifier. This is critical for proper function.
3. **Assemble Nozzle Cap:** Align the nozzle cap with the humidifier cup lid and press them together to assemble.
4. **Place Humidifier:** Position the humidifier on a flat, stable surface.
5. **Fill Water Tank:** The top-fill design allows for easy refilling. Simply pour clean, cool water directly into the top opening of the water tank. Do not exceed the maximum water level indicated on the tank.
6. **Connect Power:** Plug the power cord into a suitable electrical outlet.

## TOP WATER TANK

### Filters:

Filtering impurities in water

### Water purification device:

Inhibits the growth of bacteria in the water tank and keeps it clean for a long time.

## LOWER BASE

Bottom of humidifier

Remove the sponge foam

Nebulizer tablets

Use a soft brush to wipe gently to prevent damage to the atomization function

**Do not put anything in the base!**

## 5. OPERATING INSTRUCTIONS

Your humidifier offers various settings for customized comfort.

### 5.1 Power On/Off

Press the power button on the control panel to turn the humidifier on or off.

### 5.2 Mist Adjustment

The humidifier features 3 levels of mist adjustment. Use the mist level button to cycle through low, medium, and high mist output settings. The smart sensor automatically regulates for optimal humidity.

### 5.3 Cool and Warm Mist Options

Switch between cool and warm mist with a single touch on the control panel. The cool mist helps alleviate dry room air, while the warm mist is ideal for moisturizing skin and easing discomfort.

### 5.4 Sleep Mode

Activate Sleep Mode for undisturbed rest. In this mode, the LED screen turns off, and the humidifier operates quietly, maintaining a steady humidity level throughout the night.

### 5.5 Essential Oil Diffuser

To use the essential oil diffuser function, locate the essential oil tray. Add a few drops of your preferred essential oil to the tray. Do not add essential oils directly into the water tank.

## Add a few drops of your favorite fragrance and let the freshness fill the whole house

Filter in the water tank

Add essential oils

### 5.6 360° Rotating Nozzle

Adjust the direction of the mist by rotating the nozzle cap to disperse humidity evenly in any direction.

## 6. MAINTENANCE AND CLEANING

Regular cleaning ensures optimal performance and extends the life of your humidifier.

### 6.1 Daily Maintenance

- Unplug the humidifier before refilling.
- Refill the water tank with fresh, clean water daily.

### 6.2 Weekly Cleaning

1. Unplug the humidifier and empty any remaining water from the tank and base.
2. Lift the water tank and wipe its interior with a damp cloth. The large 360° aperture makes cleaning easy.
3. Gently clean the atomizing sheet (nebulizer tablets) in the base with a soft brush to prevent damage.
4. Clean the filters and water purification device. To prevent clogging and ensure proper function, clean

the filters once a week.

5. Rinse all components thoroughly with clean water.
6. Allow all parts to air dry completely before reassembling.

## All-day lingering, hydrating comfort

## 7. TROUBLESHOOTING

If you encounter issues with your humidifier, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
No mist or low mist output	Low water level; Clogged nebulizer/filter; White foam not removed.	Refill water tank; Clean nebulizer and filters; Ensure white foam is removed from base.
Red indicator light is on	Water level is too low (Anti-dry burn activated).	Refill the water tank. The humidifier will resume operation.
Unusual noise	Humidifier not on a flat surface; Water tank not seated correctly.	Place on a flat, stable surface; Re-seat the water tank properly.

Problem	Possible Cause	Solution
Water leakage	Overfilled water tank; Clogged filters; Tank not properly sealed.	Do not exceed max water level; Clean filters weekly; Ensure tank is correctly assembled and sealed.

If the problem persists after attempting these solutions, please contact customer support.
