

## SelePow VP06+

# SelePow VP06+ Electric Mason Jar Vacuum Sealer User Manual

Model: VP06+

## 1. INTRODUCTION

---

Thank you for choosing the SelePow VP06+ Electric Mason Jar Vacuum Sealer. This manual provides essential information for the safe and efficient operation, maintenance, and troubleshooting of your device. Please read this manual thoroughly before first use and retain it for future reference.

## 2. PRODUCT OVERVIEW AND PACKAGE CONTENTS

---

The SelePow VP06+ is a cordless, handheld electric vacuum sealer designed for Mason jars, offering an efficient method for food preservation. It is compatible with both wide-mouth and regular-mouth Mason jars.

### Package Contents:

- 1 x SelePow VP06+ Electric Mason Jar Vacuum Sealer Unit
- 1 x Wide-Mouth Sealer Attachment
- 1 x Regular-Mouth Sealer Attachment
- 5 x Wide-Mouth Mason Jar Lids (metal flat lids)
- 5 x Regular-Mouth Mason Jar Lids (metal flat lids)
- 1 x Lid Opener
- 1 x Type-C Charging Cable

### 3. SAFETY INSTRUCTIONS

---

- Read all instructions before using the appliance.

- Do not immerse the main unit in water or other liquids. Clean with a damp cloth only.
- Keep out of reach of children. This appliance is not a toy.
- Use only the provided Type-C charging cable for charging.
- Do not attempt to open or repair the appliance yourself. Contact customer support for assistance.
- Ensure the Mason jar and lid are clean and dry before sealing.
- Do not vacuum seal liquids that are boiling hot. Allow them to cool first.

## 4. SETUP

---

### 4.1 Initial Charging

Before first use, fully charge the vacuum sealer. Connect the provided Type-C charging cable to the charging port on the unit and a suitable USB power source. The LED digital display will indicate the charging status.

### 4.2 Attaching the Sealer

The VP06+ comes with two sealer attachments: one for wide-mouth Mason jars and one for regular-mouth Mason jars. Select the appropriate attachment for your jar size. Ensure the silicone ring inside the attachment is properly seated and free from debris.

# Meet All Your Sealing Needs

The image displays the IBB VP06+ vacuum sealer unit in the center. Surrounding it are eight circular images, each with a red text label indicating a category of items that can be sealed:

- Vegetables:** A bag of fresh vegetables like broccoli and carrots.
- Jam:** Several jars of strawberry jam.
- Canning:** Various canned goods including soups, beans, and meats.
- Nuts:** A jar filled with almonds.
- Snacks:** A jar of colorful candies.
- Salad:** A jar of layered salad.
- Fruit:** A jar of fruit and yogurt.

Image: A visual representation of the two different sealer attachments, indicating their respective diameters for regular (2.76 inches) and wide (3.39 inches) mouth Mason jars. It also shows how to check for a perfectly fitted silicone ring.

Image: This image displays the product dimensions (4.25 inches L x 4.25 inches W x 3.74 inches H) and details of the LED digital display, which shows working time, battery level, and charging status. It also points out the Type-C charging port and power buttons.

## 5. OPERATING INSTRUCTIONS

Follow these steps to vacuum seal your Mason jars:

- 1. Prepare the Jar:** Wipe the rim of the Mason jar and the metal lid with a dry cloth to ensure they are clean and dry. For solid foods, leave approximately 0.5 inches of space from the top. For soft foods, leave about 1 inch of space.
- 2. Place the Lid:** Position the metal flat lid onto the Mason jar.
- 3. Position the Sealer:** Align the electric Mason jar sealer with the mouth of the Mason jar and press it down firmly to create a seal.
- 4. Start Sealing:** Click the power button once to start the vacuuming process. The LED display will show the working time. For optimal sealing, a vacuuming time of 20 seconds or more is recommended. The device will automatically stop when the vacuum is complete.

- Remove Sealer:** Once the sealing process is complete (or if you manually stop it), the display will show the current battery level. Carefully lift the sealer upwards to remove it from the jar.
- Check Seal:** Test the seal by attempting to lift the lid. If properly sealed, the lid should be firmly attached and not easily removed.

KEEP FOOD FRESH 5X LONGER					
					
	Dried Goods	Fruits	Jams	Salad	Pickles
Conventional Food Storage	5-10 Days	3-7 Days	4-10 Days	1-3 Days	3-5 Days
SelePow Vacuum Sealer	20-45 Days	8-30 Days	10-40 Days	4-7 Days	6-15 Days

Image: A five-step visual guide demonstrating the process of vacuum sealing a Mason jar: 1. Prepare jar and lid, 2. Place sealer on jar, 3. Start vacuuming, 4. Remove sealer, 5. Open lid with opener.

### Important Usage Tips:

- Always ensure the silicone ring inside the sealer attachment is perfectly fitted before use.
- The rim of the Mason jar and the lid must be completely dry for an effective seal.
- Leave adequate headspace in the jar: approximately 0.5 inches for solid foods and 1 inch for soft foods.

Image: A visual guide illustrating key usage tips: checking the silicone ring, ensuring the jar rim is dry, and maintaining proper headspace for solid (0.5 inches) and soft (1 inch) foods.

## 6. MAINTENANCE AND CLEANING

### 6.1 Cleaning the Unit

To clean the main vacuum sealer unit, wipe its exterior with a soft, damp cloth. Do not immerse the unit in water or place it under running water. Ensure the unit is completely dry before storing or recharging.

### 6.2 Cleaning Attachments and Lids

The wide-mouth and regular-mouth sealer attachments, as well as the Mason jar lids, can be washed with warm, soapy water. Rinse thoroughly and allow them to air dry completely before reassembly or storage. Regularly inspect the silicone rings for any signs of wear or damage; replace if necessary to ensure effective sealing.

## 7. TROUBLESHOOTING

---

### 7.1 Device Not Turning On or Charging

- Ensure the device is fully charged. Connect it to a power source using the Type-C cable.
- Check the charging cable and adapter for damage. Try a different cable or adapter if available.

### 7.2 Jar Not Sealing Properly

- **Dryness:** Ensure the rim of the Mason jar and the metal lid are completely dry and free from any food particles or moisture.
- **Lid Placement:** Verify that the metal lid is centered and flat on the jar.
- **Sealer Placement:** Make sure the vacuum sealer attachment is pressed down firmly and evenly onto the jar.
- **Silicone Ring:** Check the silicone ring inside the sealer attachment for proper seating, cleanliness, and any signs of damage or wear. A damaged ring can prevent a proper seal.
- **Headspace:** Ensure adequate headspace is left in the jar (0.5-1 inch depending on food type). Overfilling can interfere with sealing.
- **Vacuum Duration:** Allow the sealer to operate for the recommended duration (20-40 seconds) for a strong seal.

### 7.3 Weak Vacuum

- Ensure the battery is sufficiently charged. A low battery can result in reduced vacuum power.
- Check for any obstructions in the vacuum port of the sealer.

## 8. SPECIFICATIONS

---

Feature	Specification
Brand	SelePow
Model	VP06+
Material	ABS
Color	Black
Product Dimensions	4.25"L x 4.25"W x 3.74"H
Item Weight	12.32 ounces
Power Source	Cordless Electric
Operation Mode	Auto Stop
Wattage	5 watts

Battery Type	1 Lithium Ion battery (included)
