

ZOMAKE Boot Jack 212A

ZOMAKE Boot Jack Model 212A User Manual

Your guide to effortless boot removal.

1. INTRODUCTION

The ZOMAKE Boot Jack is designed to simplify the process of removing various types of boots and shoes. Its innovative design aims to provide convenience and ease, reducing the need to bend over or struggle with footwear removal.

This tool features a U-shaped groove with an anti-slip design and a precise tooth-like structure, making boot removal efficient. It is suitable for a range of footwear, from muddy outdoor boots to heavy work boots, promoting comfort and cleanliness.

2. PRODUCT FEATURES

- **U-shaped Groove Anti-slip Design:** Ensures a secure grip on the boot heel.
- **Anti-slip Tooth-like Structure:** Aids in removing mud and provides additional grip on the sole.
- **Reinforced Silicone Grip:** Protects footwear from damage during removal.
- **Durable Construction:** Made from high-quality plastic for long-lasting use.
- **Integrated Hanging Hole:** Allows for convenient storage.

ROBUST AND VERSATILE

It Can Be Used In A Varsity Of Outdoor Scenarios And Is A Great Helper In Your Life

[With holes] for easy hanging storage

3. SETUP

1. **Unpack:** Remove the ZOMAKE Boot Jack from its packaging.
2. **Placement:** Place the boot jack on a stable, flat surface. Ensure it does not wobble before use to prevent slipping during operation.

4. OPERATING INSTRUCTIONS

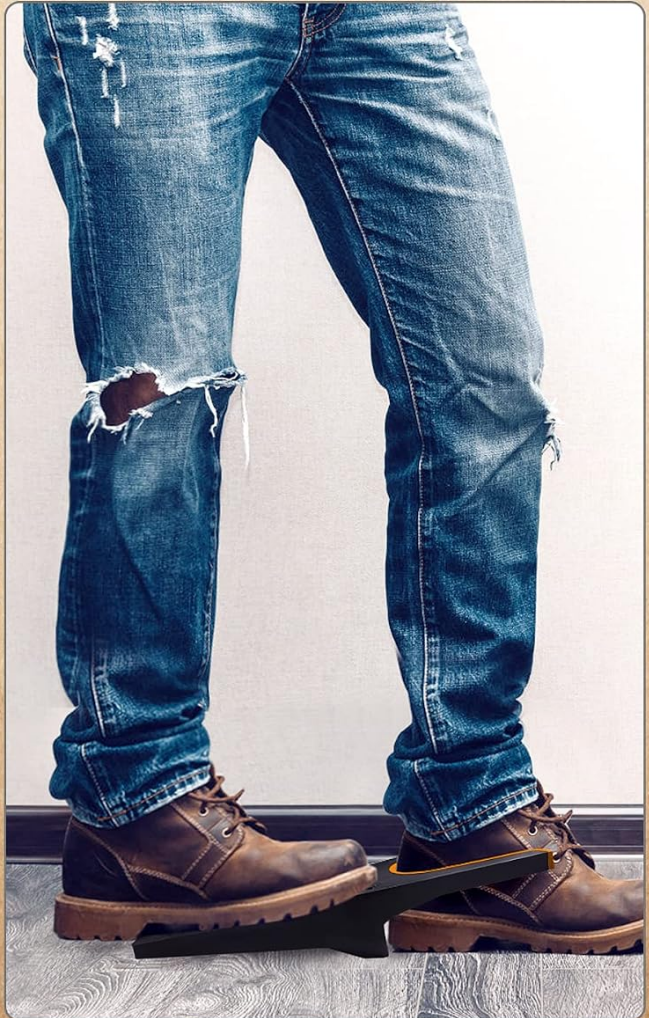

The ZOMAKE Boot Jack is designed for simple and effective boot removal. Follow these steps for optimal use:

1. **Position the Boot Jack:** Place the boot jack on a firm, level surface.
2. **Engage the Heel:** While standing, place the heel of the boot you wish to remove into the U-shaped opening of the boot jack. Ensure the heel is firmly seated.
3. **Apply Pressure:** Place your other foot on the flat, textured surface of the boot jack to hold it steady.

4. **Remove Boot:** Gently pull your foot upwards and out of the boot. The boot jack will hold the boot in place, allowing for easy removal without bending over.

5. **Maintain Balance:** Always maintain your balance during the boot removal process to prevent injury.

This tool is suitable for various footwear types, including cowboy boots, work boots, rain boots, snow boots, and other tight-fitting shoes. The rubber lining in the U-shaped opening helps protect your footwear from scratches or damage.

Tiring to take off your boots, you have to bend down and pull them off with your hands, sometimes they get dirty.

No need to bend down, free your hands and take off your boots easily.

5. APPLICATIONS

The ZOMAKE Boot Jack is beneficial for a wide range of users and situations:

- **Outdoor Enthusiasts:** Easily remove muddy boots after activities like hiking, cycling, or gardening, keeping dirt outside.
- **Farm and Garden Workers:** Essential for removing work boots after long hours in muddy or wet environments.
- **Household Use:** Convenient for quick boot removal when entering the home, especially during inclement weather, to maintain indoor cleanliness.
- **Individuals with Limited Mobility:** Simplifies boot removal for the elderly, pregnant women, or those with back pain, reducing the need to bend down.
- **Children:** Helps children remove their own boots independently.

6. MAINTENANCE

- **Cleaning:** Regularly scrape off any accumulated mud or debris from the boot jack, especially from the anti-slip teeth, to maintain its effectiveness. The plastic material allows for easy cleaning with a damp cloth or a Lysol wipe.
- **Storage:** Utilize the integrated hanging hole for convenient storage, keeping the boot jack clean and accessible.
- **Proper Use:** Do not use the boot jack for purposes other than removing shoes to prevent damage to the product.

7. TROUBLESHOOTING

- **Boot Getting Stuck:** If a boot becomes slightly stuck in the U-shaped opening, gently rock your foot or apply

slight upward pressure to release it. This can sometimes occur with certain boot materials or designs due to the secure grip.

- **Protecting Delicate Footwear:** For particularly thick boots or shoes made of special materials, handle gently during removal to prevent any potential scratches or marks. The reinforced silicone grip is designed to minimize this risk.
- **Slipping During Use:** Ensure the boot jack is placed on a stable, non-slip surface. If using on a very smooth floor, consider placing a non-slip mat underneath for added stability.

8. SPECIFICATIONS

Model Number	Boot Jack 212A
Product Dimensions	12.4 x 4.33 x 2.17 inches
