4. SETUP AND INSTALLATION

The LG WW120NNC Water Purifier is designed for wall-mount installation. An installation kit is included with your purchase.

- 1. Site Selection:** Choose a clean, dry, and well-ventilated location near a potable water source and an electrical outlet. Ensure the wall is strong enough to support the purifier's weight when full.
- 2. Professional Installation:** It is highly recommended that installation be performed by an authorized LG service technician to ensure proper setup and optimal performance.
- 3. Water Connection:** The technician will connect the purifier to your cold water supply using the provided installation kit. Ensure all connections are secure to prevent leaks.

- 4. Power Connection:** Once the water connections are secure, plug the power cord into a grounded electrical outlet.
- 5. Initial Flush:** Before first use, the system will undergo an initial flush cycle to remove any manufacturing residues. Follow the technician's instructions for this process.

5. OPERATING INSTRUCTIONS

Operating your LG WW120NNC Water Purifier is straightforward:

- Power On:** Ensure the purifier is plugged in and the power switch (if present) is turned on. The digital display will illuminate.
- Water Dispensing:** Place a clean container under the water outlet. Press the dispense button or lever to release purified water. Release to stop.
- Digital Display Indicators:**
 - UV Nano:** Indicates when the in-tank UV sterilization is active.
 - Power:** Shows the power status of the unit.
 - Tank Full:** Illuminates when the 8-liter stainless steel tank is full of purified water.
- Automatic Operation:** The purifier automatically fills the tank and performs purification cycles as needed.
- Digital Sterilizing Care:** This feature automatically sterilizes the internal components to maintain hygiene. Refer to the display for its operational status.

6. MAINTENANCE

Regular maintenance ensures the longevity and optimal performance of your water purifier.

- Filter Replacement:** Filters have a limited lifespan. The purifier may indicate when filters need replacement. Contact authorized service for filter replacement to ensure genuine parts and proper installation.
- Tank Cleaning:** Although the stainless steel tank features In-Tank UV Nano sterilization, periodic manual cleaning by a service technician is recommended to maintain optimal hygiene.
- Exterior Cleaning:** Wipe the exterior of the purifier with a soft, damp cloth. Do not use abrasive cleaners or solvents.
- Service Schedule:** Adhere to the recommended service schedule provided by LG for routine checks and maintenance.

7. TROUBLESHOOTING

If you encounter issues with your water purifier, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
No water dispensed	No power; water supply off; tank empty; clogged filter.	Check power connection; ensure water supply is on; wait for tank to fill; contact service for filter check.
Slow water flow	Low water pressure; partially clogged filter.	Check household water pressure; contact service for filter inspection/replacement.
Unusual taste/odor	Expired filters; new filter installation residue.	Replace filters if due; flush system as per initial setup instructions. If problem persists, contact service.
Leakage	Loose connections; damaged component.	Immediately turn off water supply and power. Contact authorized service.

If the problem persists after attempting these solutions, please contact LG customer support.
