TROUBLESHOOTING

- **Device Not Charging:**

- Ensure the charger is properly connected to the 18W QC3.0 adapter and a working power outlet.
- Verify that your device is correctly aligned on the charging pad. Magnetic alignment is crucial for iPhones.
- Remove any thick phone cases, metal attachments, or credit cards from your device, as these can interfere with wireless charging.
- Confirm your device is compatible with wireless charging and the specific charging pad (e.g., AirPods require a wireless charging case).

- **Slow Charging:**

- Ensure you are using the provided 18W QC3.0 adapter. Lower wattage adapters may result in slower charging speeds, especially when charging multiple devices.
- Avoid using the charger in environments with extreme temperatures.

- **Overheating:**

- If a device or the charger feels excessively hot, remove the device immediately. Ensure proper ventilation around the charger.
- Check for any foreign objects between the device and the charging pad.

- **Watch Not Charging in Upright Position:**

- Ensure the watch charging module is fully extended and locked into place.
- Confirm the Apple Watch is placed correctly on the module, allowing for magnetic connection.
