› UGREEN Magnetic Phone Holder for Tesla Model 3 & Y (Model 35010) - User Manual

UGREEN 35010

UGREEN Magnetic Phone Holder for Tesla Model 3 & Y

MODEL: 35010 - USER MANUAL

1. Introduction

Thank you for choosing the UGREEN Magnetic Phone Holder, specifically designed for Tesla Model 3 and Model Y vehicles. This holder provides a secure and convenient way to mount your smartphone, enhancing your driving experience by keeping your device accessible for navigation and communication. Its design integrates seamlessly with the Tesla's central touchscreen, offering both stability and flexibility.

2. What's in the Box

Please ensure all components are present before proceeding with installation:

- UGREEN Magnetic Phone Holder (Model 35010)
- Metal Rings (x2) for non-MagSafe compatible devices

3. Setup Instructions

Follow these steps to properly install your UGREEN Magnetic Phone Holder:

1. **Assemble the Holder:** Attach the magnetic head to the main clamp unit. Ensure it is securely fastened.
2. **Position the Holder:** Carefully place the clamp onto the edge of your Tesla's central touchscreen. The holder is designed to fit snugly on the corners of the screen.
3. **Secure the Clamp:** Rotate the adjustable knob(s) on the back of the clamp to tighten it onto the screen. Tighten until the holder is firm and does not move, but avoid over-tightening to prevent damage

to the screen. The triangular structure design ensures super stable and no shaking hold.

4. Prepare Your Phone:

- **For MagSafe Compatible iPhones (iPhone 12 series and newer):** Your phone can directly attach to the magnetic head.
- **For Other Phones or Cases:** Use the provided metal rings. Peel off the adhesive backing from a metal ring and center it on the back of your phone or phone case. Press firmly to ensure a strong bond. This will enable magnetic attachment.

5. Attach Your Phone: Gently bring your phone close to the magnetic head of the holder. The magnets will snap it securely into place.

4. Operating Instructions

The UGREEN Magnetic Phone Holder is designed for ease of use and optimal viewing during your drive.

- **One-Handed Operation:** The strong N52 magnets allow for quick and easy attachment and detachment of your phone with a single hand, ensuring minimal distraction while driving.
- **Adjustable Viewing Angle:** The holder features a flexible 360° ball joint. Simply rotate your phone to achieve your preferred viewing angle, whether in portrait or landscape orientation, for navigation or other applications.
- **Full Signal Strength:** The design of this phone mount ensures it will not interfere with your mobile phone's signal, allowing for normal and fluent use of navigation and other functions.

5. Maintenance

To ensure the longevity and optimal performance of your UGREEN Phone Holder, follow these simple maintenance guidelines:

- **Cleaning:** Wipe the holder with a soft, damp cloth to remove dust or smudges. Avoid using harsh chemicals or abrasive cleaners, as these can damage the material.
- **Inspection:** Periodically check the adjustable knobs and the clamp for any signs of loosening. Retighten as necessary to maintain a secure grip on your Tesla screen.
- **Storage:** If removing the holder for an extended period, store it in a clean, dry place away from direct sunlight and extreme temperatures.

6. Troubleshooting

If you encounter any issues with your UGREEN Magnetic Phone Holder, please refer to the following common solutions:

Problem	Possible Cause	Solution
Phone does not attach securely.	Not MagSafe compatible; metal ring not properly installed; weak magnetic connection.	Ensure your phone is MagSafe compatible or has a correctly installed metal ring. Check for any obstructions between the phone and the holder.
Holder feels loose on the Tesla screen.	Adjustable knobs are not tightened sufficiently.	Rotate the adjustable knobs on the back of the clamp clockwise until the holder is firmly secured to the screen.
Phone signal interference.	Unlikely, as the holder is designed to avoid this.	This product is designed not to affect mobile phone signals. If you experience interference, it is likely due to external factors or your phone's location.

7. Specifications
