## PWERAN PR-AMSPHS-1T27

# PWERAN Filtered Handheld Shower Head Instruction Manual

Model: PR-AMSPHS-1T27

## INTRODUCTION

---

This manual provides comprehensive instructions for the PWERAN Filtered Handheld Shower Head, Model PR-AMSPHS-1T27. This product is designed to enhance your showering experience by providing high-pressure water flow, multiple spray modes, and an integrated water filtration system. Please read this manual thoroughly before installation and use to ensure proper function and longevity of your shower head.

## SAFETY INFORMATION

- Read all instructions carefully before attempting installation or operation.
- Ensure all connections are securely tightened to prevent leaks and water damage.
- Do not use harsh chemical or abrasive cleaners on the shower head, as this may damage the finish or internal components.
- Keep small parts and tools out of reach of children during installation.
- Ensure the water supply is turned off before beginning installation or maintenance.

## PACKAGE CONTENTS

Verify that all components are present in the package:

- 1 x PWERAN Filtered Handheld Shower Head
- 1 x 18-Stage Filter Cartridge (pre-installed or separate)
- 1 x Angle-Adjustable Bracket
- 1 x Stainless Steel Hose (60 inches)

- 1 x Spare Washer
- 1 x Additional Teflon Tape
- 1 x Complete Installation Instructions (this manual)

<b>Model Number</b>	PR-AMSPHS-1T27
<b>Material</b>	Acrylonitrile Butadiene Styrene (ABS)
<b>Finish Type</b>	Painted
<b>Installation Type</b>	Wall Mounted
<b>Flow Rate</b>	1.8 Gallons Per Minute (GPM)
<b>Number of Spray Settings</b>	4
<b>Hose Length</b>	60 Inches
<b>Item Weight</b>	8.4 ounces
<b>Product Dimensions</b>	9"L x 3"W
<b>UPC</b>	763971374364

## SETUP AND INSTALLATION

The PWERAN Filtered Handheld Shower Head is designed for easy DIY installation, typically taking only a few minutes. A universal G1/2 thread interface ensures compatibility with most standard shower arms. No professional plumbing assistance is usually required.

## Installation Steps:

1. **Prepare Shower Arm:** Ensure your existing shower arm is clean and free of debris. Turn off the main water supply to your shower.
2. **Apply Teflon Tape:** Wrap the threads of your shower arm with the provided Teflon tape (clockwise direction, 3-5 wraps).
3. **Attach Bracket:** Screw the angle-adjustable bracket onto the shower arm. Hand-tighten first, then use a wrench if necessary, being careful not to overtighten.
4. **Connect Hose:** Attach one end of the stainless steel hose to the bracket and the other end to the handheld shower head. Ensure washers are properly seated in both connections.
5. **Insert Filter Cartridge:** If not pre-installed, unscrew the handle of the shower head and insert the 18-stage filter cartridge. Screw the handle back on securely.
6. **Test for Leaks:** Turn on the main water supply and check all connections for any leaks. Tighten gently if necessary.

## OPERATING INSTRUCTIONS

---

Your PWERAN shower head offers multiple features for a customized showering experience.

### Spray Modes:

The shower head features four distinct spray settings, easily switchable to suit your preference:

- **Full-Body Rainfall Mode:** A gentle, wide coverage spray for a relaxing shower.
- **Powerful Mixed Mode:** Combines different spray patterns for an invigorating experience.
- **Spray Massage Mode:** Concentrated streams for a targeted massage effect. Note: This mode may produce a cooler mist due to rapid water evaporation, which can be refreshing in warm weather.
- **Power Wash Mode:** A strong, focused jet ideal for cleaning the shower area, pets, or specific body parts.

Image: Illustrations of the four available spray modes: Spray, Mix, Rainfall, and Powerful Wash Jet.

### **One-Touch ON/OFF Switch:**

A convenient button on the shower head allows you to pause the water flow instantly. This feature is useful for conserving water while lathering, shampooing, or when bathing children or pets, eliminating the need to adjust the main water controls.

## ON/OFF Pause Button

No longer need to control the water heater switch to turn the water on and off during a shower.

No longer worry about finding the water heater switch with eyes full of foam while shampooing.

No need to stand up to turn off the switch when bathing pets or children.

## ADDITIONAL INFORMATION

## DIMENSIONS

Premium ABS  
Material

Lightweight

Standard G1/2 inch  
Thread

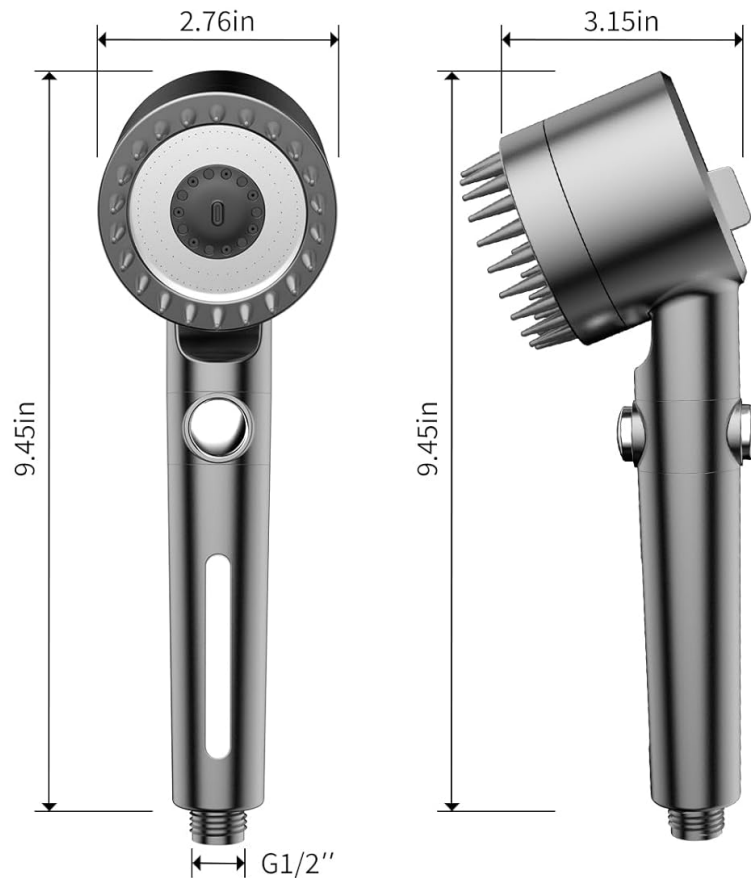

Image: A close-up view of the ON/OFF pause button located on the shower head handle.

### Pressure Adjustment:

The shower head includes a pressure control function, allowing you to adjust the water intensity to your preference, ensuring a consistent experience regardless of local water pressure variations.

### MAINTENANCE

#### Filter Cartridge Replacement:

The integrated 18-stage filtration system helps remove chlorine and impurities from your water, improving water quality and protecting skin and hair. For optimal performance, the filter cartridge should be replaced every 4-6 months, depending on your local water quality and usage frequency.

To purchase a replacement filter cartridge, please refer to the product listing or search for ASIN:[B0CPV542QG](#).

## THE NEW ERA OF SHOWERING:

CHLORINE-FREE, PURE, AND HEALTHY

### Improve Water Quality:

Effectively removes impurities for clearer shower water.

### Reduce Harmful Substances:

Lowers chlorine and chemicals, preventing dry skin and allergies.

### Protect Skin and Hair:

Nourishes skin and hair for a healthier shower experience.

Image: A cutaway view illustrating the various layers of the 18-stage filter cartridge within the shower head handle.

### Cleaning the Shower Head:

To maintain optimal spray performance and prevent mineral buildup, regularly clean the nozzles of your shower head. Gently rub the silicone nozzles to dislodge any deposits. For more stubborn buildup, you may use a soft cloth with a mild descaling solution or a mixture of white vinegar and water. Avoid abrasive brushes or harsh chemicals.

### TROUBLESHOOTING

Problem	Possible Cause	Solution
Low Water Pressure	Clogged filter cartridge; Mineral buildup in nozzles; Partially closed water supply valve.	Replace filter cartridge; Clean shower head nozzles; Ensure water supply valve is fully open.
Leaks at Connections	Loose connections; Worn or improperly seated washers; Insufficient Teflon tape.	Tighten connections (hand-tighten plus a quarter turn with a wrench); Inspect and reseal/replace washers; Reapply Teflon tape.

Difficulty Switching Modes	Mineral buildup in the spray mode mechanism.	Soak the shower head in a descaling solution (e.g., vinegar) to dissolve mineral deposits.
