› Petgravity Cat Cleaning Brush Pet Hair Removal Comb with Water Tank, Pet Cotton Tissue for Pet Cleaning Blue User Manual

Petgravity B0CGV2YVFH

Petgravity Cat Cleaning Brush User Manual

Model: B0CGV2YVFH

1. PRODUCT OVERVIEW

The Petgravity Cat Cleaning Brush is an innovative grooming tool designed to simplify pet care, especially for cats and dogs who may be apprehensive about traditional bathing. This multi-functional brush combines hair removal with cleaning capabilities, utilizing a built-in water tank and disposable cotton tissues to provide a gentle yet effective grooming experience.

2. KEY FEATURES

- **Cleaning While Grooming:** Unique conical bristles penetrate deep into the coat for effective undercoat grooming without scratching. Combines hair removal and fur cleaning in one motion, removing loose hair, reducing knots, and cleaning dust and stains.
- **Floating Hair and Static Reduction:** Premium silicone material and streamlined design massage your pet, increasing blood circulation and making fur soft and shiny. Wipes moisten pet hair to prevent floating hair and static generation, reducing allergies and improving pet comfort.
- **Multifunction 3-in-1 Brush:** The silicone pad can be wrapped with pet cotton tissues for daily cleaning and care, freeing timid pets from the fear of bathing. Can be used with pet leave-in serum (not included).
- **Durable Pet Cotton Tissue:** Thick, soft, and gentle premium cloth cotton tissues designed specifically for dogs and cats, superior to baby wipes.
- **Versatile Grooming:** Use with the cleaning brush to remove dust and stains from pet hair while removing loose fur. Can also be used to wipe the pet's face, around the eyes, ears, paws, etc.

3. COMPONENTS

The Petgravity Cat Cleaning Brush system includes:

- Pet Cleaning Brush with integrated water tank and massage pad.
- Pet Cotton Tissues (100 pieces).

Note: Pet leave-in serum is not included and must be purchased separately.

4. SETUP AND ASSEMBLY

Follow these steps to prepare your Petgravity Cat Cleaning Brush for use:

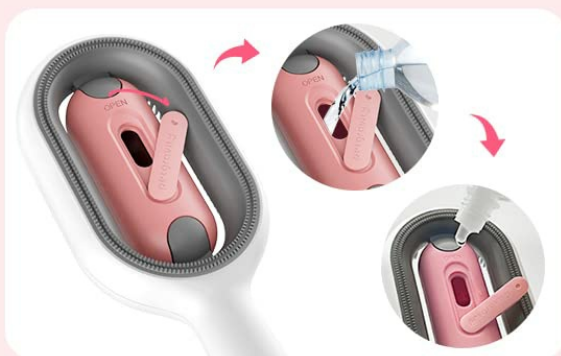

1. Fill the Water Tank:

Open the water tank cover on the back of the brush. Fill it with approximately 20ml of clean water. For

enhanced cleaning and conditioning, you may add about 2ml of pet leave-in essence (not included) to the water. Securely fasten the water tank cover.

Use Instructions

This product **does not include** leave-in essence and cotton tissue.

Open the water tank cover on the back, fill it with about 20ml of clean water (adding 2ml of pet leave-in essence will be better), and fasten the water tank cover.

Open the massage pad from the top, wrap the cotton tissue around the massage pad, rotate upwards to fasten it. Press the massage pad lightly to accelerate the water discharge.

Horizontal combing can clean the hair.

Tilt the comb teeth and press down firmly to remove floating hair.

Image 3: Step-by-step visual guide for filling the water tank and attaching the cotton tissue.

2. Attach the Cotton Tissue:

Open the massage pad from the top of the brush. Take one pet cotton tissue and wrap it around the massage pad. Fasten the tissue upwards to secure it in place.

5. OPERATING INSTRUCTIONS

The Petgravity Cat Cleaning Brush offers versatile modes for different grooming needs:

5.1. Massage Cleaning Mode (Wet Use)

This mode is ideal for cleaning and preventing flying hair, especially for pets who dislike bathing. After filling the

water tank and attaching the cotton tissue:

- Press the massage pad lightly to accelerate water discharge and moisten the cotton tissue.
- Use the comb parallel to your pet's body. Gently comb through their fur. The moistened tissue will help clean dust and stains while the bristles detangle and remove loose hair.
- This mode is suitable for both long-haired and short-haired pets.

Image 4: Demonstrates the difference between dry and wet grooming using the Petgravity brush, highlighting the effectiveness of the wet cleaning mode.

5.2. Hair Removal Mode (Dry Use)

For effective removal of floating hair and detangling, use the brush without actively discharging water (though the tissue can still be attached for static reduction):

- Tilt the comb to form a 30-45 degree angle with your pet's body.
- Gently brush through the fur. The angled bristles are designed to effectively capture and remove loose hair.
- This mode is highly effective for reducing shedding and preventing hair knots.

Use on body, paws, bum and more

Thick & Strong tissue. Size: 2.56×7.87 inches

Image 5: Illustrates the versatility of the brush for use on various parts of a pet's body, including the main coat, paws, and hindquarters.

5.3. Cleaning Other Surfaces

The brush can also be used to remove pet hair from household items:

- Use the brush to easily remove floating hair from cat litter, sofas, clothes, and pet beds.

Image 6: Shows the brush's effectiveness in removing pet hair from various surfaces like clothing, carpets, and pet bedding.

6. MAINTENANCE AND CARE

- **After Each Use:** Remove the used cotton tissue and discard it.
- **Cleaning the Brush:** The silicone massage pad and bristles can be rinsed with water to remove any remaining hair or debris. Ensure the water tank is empty before rinsing the entire brush. Allow the brush to air dry completely before storing.
- **Storage:** Store the brush in a cool, dry place, away from direct sunlight and out of reach of children.

7. TROUBLESHOOTING

If you encounter any issues with your Petgravity Cat Cleaning Brush, please refer to the following common solutions:

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Water not discharging from tank.	Water tank cap not securely fastened, or massage pad not pressed.	Ensure the water tank cap is fully closed. Lightly press the massage pad to initiate water flow. Check if the water outlet is blocked.
Hair not effectively removed.	Incorrect brushing angle or technique.	For hair removal, tilt the comb to a 30-45 degree angle with the pet's body. Ensure the cotton tissue is properly attached if using the wet mode.
Cotton tissue not staying in place.	Tissue not wrapped or fastened correctly.	Ensure the cotton tissue is wrapped securely around the massage pad and fastened upwards as shown in the setup instructions.
