Troubleshooting

Problem	Possible Cause	Solution
Bed frame is squeaking.	Loose connections or improperly installed slats.	Ensure all screws and bolts are tightened. Check that all wooden slats are properly seated and secured with the Velcro fixings.
Charging station not working.	Power cord not plugged in, outlet issue, or device incompatibility.	Verify the bed frame's power cord is securely plugged into a working wall outlet. Test the wall outlet with another device. Ensure your device's power requirements are within the charging station's specifications (110V/12A AC, 5V/2A USB).
Headboard storage panel does not close properly.	Obstruction in the compartment or hinge issue.	Check for any items obstructing the closing path of the headboard panel. Inspect the hinges for any damage or misalignment.
