INTRODUCTION

Thank you for choosing awatrue AT2 Kids Wired Headphones. These headphones are designed with children's safety and comfort in mind, featuring volume-limiting technology and a durable, foldable design. This manual provides essential information for proper setup, operation, and maintenance to ensure a safe and enjoyable listening experience.

Figure 1: awatrue AT2 Kids Wired Headphones

SETUP

1. Adjusting the Headband

The headphones feature an adjustable headband to ensure a comfortable and secure fit for various head sizes. Gently slide the earcups up or down along the headband until they rest comfortably over the ears. The headband is designed to be flexible and durable.

Figure 2: Adjustable and Foldable Design for Comfort

2. Folding for Storage

For convenient storage and portability, the headphones can be folded. Gently fold the earcups inwards towards the headband. This compact design helps protect the headphones during travel.

Figure 3: Foldable Design for Easy Storage

3. Connecting to a Device

The awatru AT2 headphones connect via a standard 3.5mm audio jack. Insert the 3.5mm plug firmly into the audio port of your device. For newer iPhones and iPads that lack a 3.5mm jack, a separate adapter (not included) is required.

Figure 4: 3.5mm Jack Compatibility

4. Identifying Left and Right

Each earcup is marked with an 'L' for left and 'R' for right to ensure correct orientation for optimal sound experience.

OPERATING INSTRUCTIONS

1. Volume Control

The headphones feature built-in volume limiting technology with two settings: 85dB and 94dB. Use the slide button on the inline control to select the desired maximum volume level. The 85dB setting is recommended for extended listening to protect young ears, while 94dB can be used for environments with more background noise.

85dB Safe Mode
Design for kids, Protect kids' hearing

Limited to **<85 dB**
Protect kids' hearing

Limited to **<94 dB**
Enjoy your journey

The advertisement features a large pair of blue and orange headphones. In the center of the headband is a soccer ball-shaped control knob with a volume slider and buttons, labeled with '94dB' and '85dB'. A soundwave graphic is overlaid on the headphones. Below the main image are two inset photos: one of a young boy wearing the headphones and looking up, and another of a young girl wearing the headphones and reading a book. The background is a bright blue sky with clouds and a soccer ball.

2. Using the Built-in Microphone

The integrated microphone allows for clear communication during online learning, video calls, or gaming. Ensure the microphone is positioned appropriately for optimal voice pickup.

3. Shared Audio Jack

The awatruer AT2 headphones include a shared audio jack, allowing another pair of headphones to connect directly to them. This enables two users to listen to the same audio source simultaneously without needing a separate splitter. When sharing, it is recommended to use the 94dB mode for a balanced listening experience.

MAINTENANCE

1. Cleaning

The earmuffs are made from soft cortex material for comfort and hygiene. They can be safely wiped down with disinfecting wipes for cleaning. Ensure the headphones are dry before next use.

2. Durability

The headphones are constructed with tough PP material and a flexible headband designed to withstand typical child use. The headband has been tested for durability, enduring over 3,000 stretches.

Figure 8: Headband Flexibility and Durability

TROUBLESHOOTING

1. No Sound or Intermittent Audio

Ensure the 3.5mm audio plug is fully inserted into the device's headphone jack. Check the volume settings on both the headphones (using the inline control) and the connected device. Test with another device to rule out device-specific issues.

2. Compatibility with Newer Devices

For Apple devices such as newer iPhones and iPads that do not have a 3.5mm headphone jack, a specific adapter (e.g., Lightning to 3.5mm adapter) is required. This adapter is not included with the headphones.

SPECIFICATIONS

Feature	Detail
Model Name	AT2
Connectivity Technology	Wired
