5. Troubleshooting

If you encounter any issues with your seat cushion, consider the following common solutions:

- **Cushion feels too firm/soft:** The cushion is designed with a specific density for support. Over time, it may adapt to your body. If discomfort persists, ensure proper placement.
- **Cushion slides:** Ensure the cushion is placed on a clean, dry surface. For smoother surfaces, a non-slip mat (not included) can be placed underneath.
- **Odor:** New products may have a slight odor upon unpacking. This is normal and should dissipate within a few days in a well-ventilated area.
