## **HMHAMA Conga 2290 (Compatible Accessories)**

# **Instruction Manual: HMHAMA Replacement Side Brushes**

Compatible with Cecotec Conga 2290 Robot Vacuum Cleaner

---

## **1. PRODUCT OVERVIEW**

---

This package contains 8 gray side brushes designed as replacement accessories for the Cecotec Conga 2290 Robot Vacuum Cleaner. These brushes are essential for effective cleaning, reaching into corners and along edges to dislodge dirt and debris.

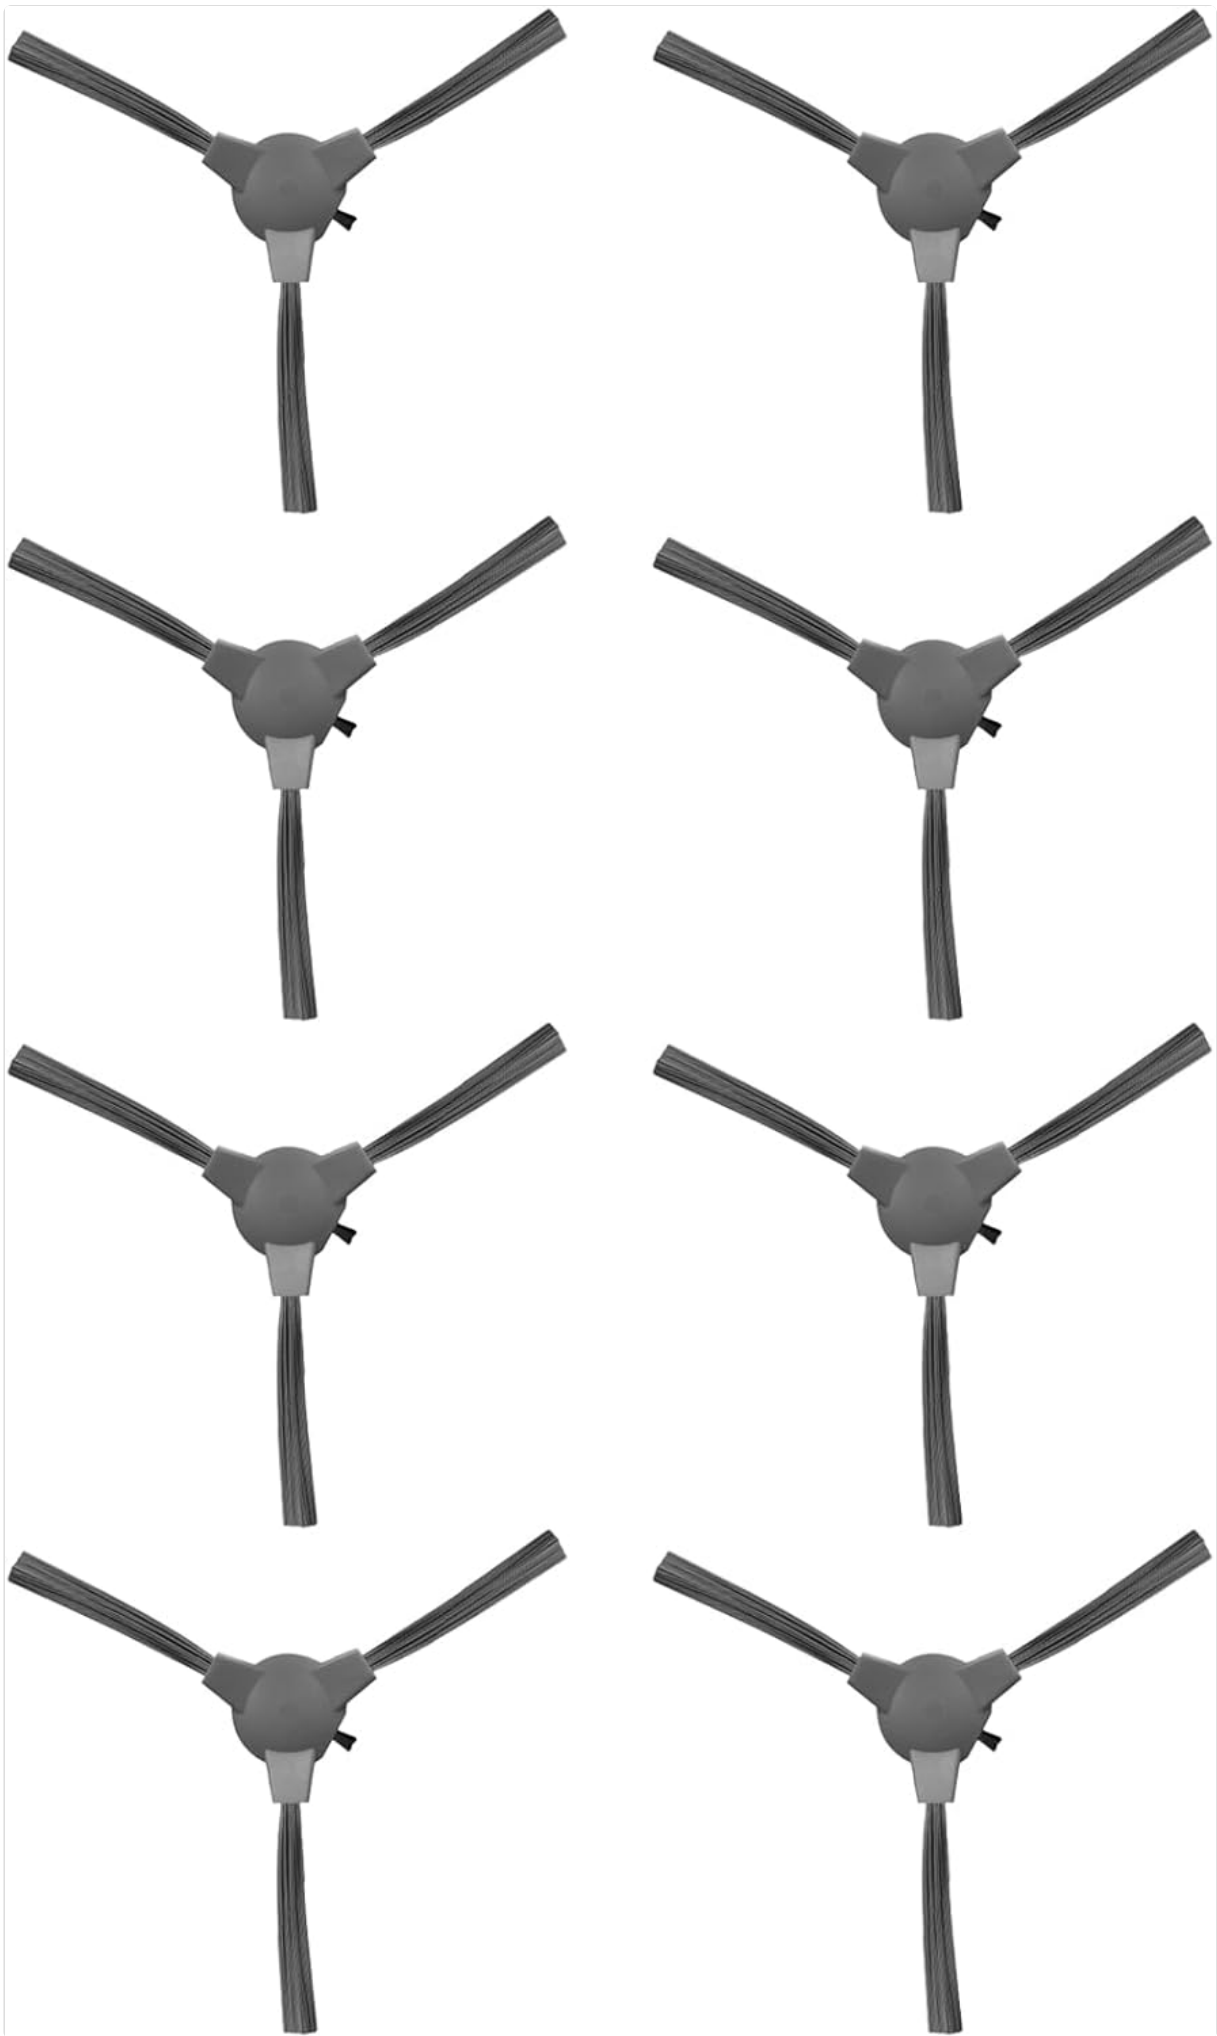

Figure 1: Contents of the HMMAMA Replacement Side Brushes package. Eight individual gray side brushes are shown,

each with three flexible arms extending from a central hub, designed to sweep debris into the vacuum's path.

Each brush features three arms, engineered to sweep dust and debris from hard-to-reach areas directly into the vacuum's suction path, ensuring thorough cleaning performance.

## 2. COMPATIBILITY

---

These replacement side brushes are specifically designed to be compatible with the following robot vacuum cleaner model:

- **Cecotec Conga 2290 Robot Vacuum Cleaner**

Please verify your vacuum cleaner's model number to ensure proper fit and function before installation.

## 3. INSTALLATION GUIDE

---

Follow these steps to replace the side brushes on your Cecotec Conga 2290 robot vacuum cleaner:

1. **Power Off:** Ensure your robot vacuum cleaner is powered off and disconnected from its charging base before beginning any maintenance.
2. **Flip Over:** Carefully turn the robot vacuum cleaner upside down to expose the underside where the brushes are located.
3. **Locate Brushes:** Identify the existing side brushes. There are typically two side brushes on the Cecotec Conga 2290.
4. **Remove Old Brushes:** Gently pull the old side brushes straight up to detach them from their posts. They are usually held in place by friction or a simple clip mechanism. *(Refer to your vacuum cleaner's original manual for specific removal instructions if needed.)*
5. **Install New Brushes:** Align the new replacement side brushes with the corresponding posts on the vacuum cleaner. Push them down firmly until they click into place or are securely seated. Ensure the brushes are oriented correctly.
6. **Verify Installation:** Gently tug on the newly installed brushes to confirm they are securely attached and can rotate freely.
7. **Resume Operation:** Flip the vacuum cleaner back over and power it on.

It is recommended to replace both side brushes simultaneously for balanced cleaning performance.

## 4. MAINTENANCE AND REPLACEMENT FREQUENCY

---

To ensure optimal cleaning performance and extend the lifespan of your robot vacuum cleaner, regular maintenance of the side brushes is crucial.

- **Regular Cleaning:** Periodically check the side brushes for tangled hair, threads, or debris. Use scissors or a cleaning tool to carefully remove any obstructions.
- **Replacement Recommendation:** It is recommended to replace the side brushes every **2-3 months**, or more frequently depending on usage and environment (e.g., homes with pets). Worn or damaged brushes can reduce cleaning efficiency.
- **Bent Brushes:** If the side brushes become bent or curled during transportation or use, soak them in warm water for a few minutes. This can help restore them to their original shape without affecting their quality or performance.

## 5. TROUBLESHOOTING

---

Here are some common issues and solutions related to the side brushes:

- **Brushes not spinning:**
  - Check for tangled hair or debris around the brush base. Clean thoroughly.
  - Ensure the brushes are correctly installed and fully seated on their posts.
  - If the issue persists, the vacuum cleaner's brush motor might require service (refer to your vacuum's original manual).
- **Reduced cleaning performance:**
  - The brushes may be worn out. Replace them with new ones.
  - Ensure other vacuum components (main brush, filter, dustbin) are also clean and functioning correctly.
- **Brushes are bent/deformed:**
  - Soak the brushes in warm water for a few minutes to help them regain their shape.

## 6. SPECIFICATIONS

---

Attribute	Detail
Product Name	Replacement Side Brushes
Brand	HMHAMA
Compatible Model	Cecotec Conga 2290 Robot Vacuum Cleaner
Quantity	8 pieces
Color	Gray
Material	Plastic, Nylon
