- **Wood Parts:** Wipe with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners.
- **Metal Parts:** Wipe with a soft, dry cloth.

6.2 General Care

- Periodically check all bolts and screws to ensure they are tight. Retighten as needed to maintain the bed frame's stability and prevent noise.

- Avoid exposing the bed frame to direct sunlight or extreme temperature changes, which can affect the fabric and wood finish.
- Do not drag the bed frame when moving it; lift it to prevent damage to the legs and frame structure.

7. Troubleshooting

7.1 Bed Frame is Squeaking or Noisy

- **Solution:** Check all bolts and screws. Tighten any loose connections. Ensure the EVA silent strip is correctly positioned between the slats and the metal frame.

7.2 Drawers Do Not Slide Smoothly or Stay Closed

- **Solution:** Verify that the drawer wheels are clean and free of debris. Ensure the drawers are assembled correctly and the locking mechanism is engaging properly. Check for any obstructions under the bed.

7.3 Charging Station Not Working

- **Solution:** Ensure the bed frame's power cord is securely plugged into a functional wall outlet. Test the outlet with another device. Check if the device you are trying to charge is working correctly. If issues persist, contact customer support.
