2. SETUP AND INSTALLATION

2.1 Unpacking

Carefully unpack the refrigerator. Ensure all packaging materials are removed. Check for any damage during transit. Keep the user manual and warranty card for future reference.

2.2 Placement

Place the refrigerator on a firm, level surface away from direct sunlight, heat sources, and moisture. Ensure adequate ventilation around the unit. This is a freestanding installation type.

2.3 Power Connection

Connect the refrigerator to a dedicated 230V power outlet. The unit features Stabilizer-Free Operation (220V - 240V) and Auto Connect to Home Inverter for uninterrupted cooling during power cuts.

5. TROUBLESHOOTING

If you encounter any issues with your Haier refrigerator, please refer to the following general troubleshooting tips before contacting customer service:

- **No Power:** Check if the power cord is securely plugged into the outlet and if the circuit breaker has tripped.
- **Insufficient Cooling:** Ensure the door is properly closed. Check if the temperature settings are appropriate for the contents. Avoid overloading the refrigerator.
- **Unusual Noises:** Some operational noises are normal (e.g., compressor hum, refrigerant flow). If the noise is excessive or unusual, ensure the refrigerator is level and not touching any walls or cabinets.
- **Water Leakage:** Check if the drain hole is clogged or if the water collection tray is properly positioned.

For persistent issues, please contact Haier customer support.
