Maintenance

Proper care and maintenance will ensure the longevity of your remote control.

Cleaning

- Wipe the remote control with a soft, dry cloth.
- For stubborn dirt, slightly dampen the cloth with water or a mild, non-abrasive cleaner.
- Do not use harsh chemicals, solvents, or abrasive cleaning pads, as these can damage the remote's surface or internal components.

Battery Replacement

Replace batteries when the remote control becomes unresponsive or its range decreases significantly. Always replace both batteries at the same time with new AAA alkaline batteries. Do not mix old and new batteries, or different types of batteries.

Troubleshooting

If you experience issues with your remote control, refer to the following common solutions:

- **Remote not responding:**
  - Ensure the batteries are inserted correctly with the correct polarity (+/-).
  - Replace old batteries with new ones.
  - Make sure there are no obstructions between the remote control and the TV's infrared receiver.
  - Confirm you are within the effective operating range (up to 10 meters).
- **Specific buttons not working:**
  - Clean the remote control, especially around the unresponsive buttons, to remove any dirt or debris that might be interfering with button presses.
  - If only certain buttons are affected, and cleaning does not help, the remote may be damaged.
- **No programming required:** This remote control is designed to work immediately with compatible QILIVE TVs upon battery insertion. If it does not work, double-check compatibility with your specific QILIVE TV model against the list provided in the Introduction section.
