> KAFTKO Water Tank Replacement for Ecovacs Deebot Ozmo T5, T8, T9, N5, N8 Series - Instruction Manual

KAFTKO Ecovacs Deebot Ozmo T5, T8, T9, N5, N8, DX33, DX55, DX93, DV63, DV65, DV66, DJ65 Series

KAFTKO Water Tank Replacement for Ecovacs Deebot Ozmo T5, T8, T9, N5, N8 Series

Instruction Manual

1. INTRODUCTION AND PRODUCT OVERVIEW

This manual provides comprehensive instructions for the KAFTKO replacement water tank, designed for use with Ecovacs Deebot Ozmo T5, T8, T9, N5, N8, DX33, DX55, DX93, DV63, DV65, DV66, and DJ65 series robotic vacuum cleaners. This replacement part ensures your robotic vacuum can continue its mopping functions effectively.

Key Features:

- Direct replacement for original water tanks, ensuring compatibility and proper fit.
- Facilitates the mopping function of your Ecovacs Deebot Ozmo vacuum cleaner.
- Constructed from durable, environmentally friendly materials for reliable performance.
- Designed for easy removal and replacement, simplifying maintenance.

Figure 1: Overview of the KAFTKO Replacement Water Tank.

2. SAFETY INFORMATION

Please read all safety instructions before installing or operating the water tank. Failure to follow these instructions may result in damage to the product or your robotic vacuum cleaner.

- Ensure the robotic vacuum cleaner is powered off and unplugged from its charging base before installation or removal of the water tank.
- Use only clean water or manufacturer-approved cleaning solutions in the water tank. Do not use corrosive liquids or harsh chemicals.
- Keep the water tank and its components out of reach of children and pets.
- Inspect the water tank for any damage before each use. Do not use if cracks or leaks are present.

3. PACKAGE CONTENTS

Verify that all items are present and in good condition upon opening the package.

- 1 x KAFTKO Replacement Water Tank

4. SETUP AND INSTALLATION

Follow these steps to properly install the replacement water tank into your Ecovacs Deebot Ozmo robotic vacuum cleaner.

1. **Prepare the Vacuum Cleaner:** Turn off your Ecovacs Deebot Ozmo vacuum cleaner and disconnect it from its charging station. Place the vacuum upside down on a clean, soft surface to access the underside.
2. **Remove the Old Water Tank (if applicable):** Locate the existing water tank. Depending on your model, it may slide out or have release clips. Gently press any release buttons or tabs and slide the old tank out.
3. **Inspect the New Water Tank:** Before installation, visually inspect the KAFTKO replacement water tank for any signs of damage.
4. **Install the New Water Tank:** Align the new water tank with the slot on your robotic vacuum cleaner. Gently slide it into place until you hear a click or feel it securely seated. Ensure it is flush with the vacuum's body.

Figure 3: Close-up of the water tank's blue filling cap.

5. OPERATING INSTRUCTIONS

Once the water tank is installed, follow these steps to prepare your vacuum for mopping.

1. **Fill the Water Tank:** Open the blue cap on the water tank (refer to Figure 3). Carefully fill the tank with clean tap water. Do not overfill. If using a cleaning solution, ensure it is compatible with your Ecovacs Deebot model and dilute according to the solution's instructions. Close the cap securely.
2. **Attach Mopping Pad (if applicable):** If your vacuum model uses a mopping pad, attach it to the designated area on the underside of the water tank or vacuum.
3. **Start Cleaning:** Place the vacuum cleaner back on the floor. Turn on the vacuum and select the mopping mode or a combined vacuuming and mopping mode through the app or control panel.

6. MAINTENANCE

Regular maintenance ensures optimal performance and extends the lifespan of your water tank.

- **Empty After Each Use:** After each mopping cycle, remove the water tank and empty any remaining water. This prevents stagnant water and potential odor buildup.

- **Rinse the Tank:** Rinse the inside of the water tank with clean water. You can use a mild detergent if necessary, but ensure it is thoroughly rinsed afterward.
- **Clean the Water Outlet:** Periodically check the water outlet nozzles on the tank for blockages. Use a small brush or toothpick to clear any debris.
- **Air Dry:** Allow the water tank to air dry completely before re-installing it or storing it.
- **Storage:** Store the water tank in a cool, dry place away from direct sunlight when not in use for extended periods.

7. TROUBLESHOOTING

If you encounter issues with your water tank, refer to the following common problems and solutions.

| Problem | Possible Cause | Solution |
|------------------------------------|---|---|
| Water not dispensing. | Water tank empty, clogged nozzles, or incorrect installation. | Refill water tank. Clean nozzles. Reinstall tank securely. |
| Water tank leaking. | Cap not closed properly, tank damaged, or incorrect installation. | Ensure cap is sealed. Inspect tank for cracks; replace if damaged. Reinstall tank correctly. |
| Vacuum not recognizing water tank. | Tank not fully inserted, or connection issues. | Remove and reinsert the water tank firmly until it clicks into place. Ensure no debris is blocking the connection points. |

8. SPECIFICATIONS

Technical specifications for the KAFTKO Replacement Water Tank.

- **Compatibility:** Ecovacs Deebot Ozmo T5, T8, T9, N5, N8, DX33, DX55, DX93, DV63, DV65, DV66, DJ65 Series
- **Material:** Environmentally friendly filterable materials
- **Dimensions:** Approximately 250mm (length) x 100mm (width) x 52mm (height)
- **Weight:** Approximately 0.035 ounces (0.99 grams)
