6. MAINTENANCE

Regular maintenance helps prolong the life and appearance of your bed frame.

- **Cleaning:** For the upholstered linen fabric, gently vacuum with an upholstery attachment or wipe with a damp cloth. Avoid harsh chemicals.
- **Frame Inspection:** Periodically check all bolts and fasteners to ensure they are tight. Re-tighten if necessary.
- **Electrical Components:** Keep the charging station and LED lights free from dust. Ensure all cables are securely connected and not pinched. Unplug the power strip before cleaning or if not in use for extended periods.

7. TROUBLESHOOTING

If you encounter issues with your bed frame, refer to the following common solutions:

Problem	Possible Cause	Solution
LED lights not working	Loose connection, remote battery dead, power strip unplugged.	Check all cable connections. Replace remote battery. Ensure power strip is plugged in.
Charging station not providing power	Power strip unplugged, circuit breaker tripped.	Ensure power strip is plugged into a functional wall outlet. Check your home's circuit breaker.
Bed frame squeaks or feels unstable	Loose fasteners, uneven assembly.	Re-tighten all bolts and screws. Ensure the bed frame is on a level surface.
Mattress slides on frame	Mattress not properly seated, embedded design not utilized.	Ensure the mattress is fully within the embedded frame design.

If problems persist, please contact HAUOMS customer support for further assistance.
