

## BJPKPK TK22oz

# BJPKPK 22oz Insulated Water Bottle User Manual

Model: TK22oz

## INTRODUCTION

This manual provides instructions for the proper use and care of your BJPKPK 22oz Insulated Water Bottles. Please read this manual thoroughly before using the product to ensure optimal performance and longevity.

Your BJPKPK insulated water bottle is designed for daily use, keeping beverages cold for up to 24 hours or hot for up to 12 hours. It features 18/8 food-grade stainless steel construction, is BPA-free, and comes with multiple lid options for various activities.

## PACKAGE CONTENTS

Your BJPKPK 22oz Insulated Water Bottle package includes the following items:

- 2 x 22oz Insulated Stainless Steel Water Bottles
- 2 x Straw Lids
- 2 x Spout Lids
- 2 x Flex Lids
- 4 x Straws
- 2 x Straw Cleaning Brushes

## SETUP AND ASSEMBLY

---

- 1. Initial Cleaning:** Before first use, wash all parts of the water bottle and lids with warm, soapy water. Rinse thoroughly. The bottles are dishwasher safe, but hand washing is recommended for lids and straws to ensure longevity.
- 2. Lid Selection:** Choose the appropriate lid for your activity:
  - **Straw Lid:** Ideal for cold beverages and easy sipping on the go. Insert a straw into the lid's opening.
  - **Spout Lid:** Suitable for hot beverages, providing a controlled flow.
  - **Flex Lid:** A simple twist-off lid, convenient for carrying and quick sips.
- 3. Lid Attachment:** Ensure the silicone gasket is properly seated inside the chosen lid. Screw the lid onto the bottle clockwise until it is securely tightened to prevent leaks.

## OPERATING INSTRUCTIONS

1. **Filling the Bottle:** Unscrew the lid and fill the bottle with your desired beverage. Do not overfill; leave some space below the rim to prevent spills when attaching the lid.
2. **Temperature Retention:**
  - For **cold beverages**, the double-walled vacuum insulation keeps drinks cold for up to 24 hours. For best results, pre-chill the bottle with ice water before filling.
  - For **hot beverages**, the insulation keeps drinks hot for up to 12 hours. For best results, pre-heat the bottle with hot water (not boiling) before filling.
3. **Leak-Proof Design:** Ensure the lid is securely tightened and the straw (if using the straw lid) is properly folded down when not in use to maintain the leak-proof seal.
4. **Sweat-Free Exterior:** The double-wall design prevents condensation on the exterior, keeping your hands and bags dry.

## MAINTENANCE AND CARE

- **Cleaning the Bottle:** The stainless steel bottle is dishwasher safe. For thorough cleaning, especially after using sugary or acidic drinks, hand wash with warm, soapy water and a bottle brush.
- **Cleaning Lids and Straws:** Lids and straws should be hand washed. Use the provided straw brush to clean the inside of the straws. Ensure all components are completely dry before reassembly or storage to prevent odor or mold buildup.
- **Drying:** Allow all parts to air dry completely before storing. Storing with the lid off can help prevent odors.
- **Avoid Harsh Cleaners:** Do not use bleach or cleaners containing chlorine, as these can damage the stainless steel and seals.
- **Storage:** Store the bottle and lids in a clean, dry place.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
<b>Liquid is not staying hot/cold for advertised duration.</b>	Bottle not pre-chilled/pre-heated; lid not sealed properly; extreme ambient temperatures.	Pre-chill with ice water or pre-heat with hot water for 5-10 minutes before filling. Ensure lid is tightly screwed on. Avoid leaving in direct sunlight or extreme cold for extended periods.
<b>Lid is difficult to open or "sticks".</b>	Pressure buildup (especially with hot liquids); residue under gasket; lid overtightened.	For hot liquids, carefully release pressure by slightly unscrewing the lid. Clean the lid and gasket thoroughly to remove any residue. Do not overtighten. If stuck, try turning the bottle sideways over a sink and apply gentle, steady pressure while unscrewing.

Problem	Possible Cause	Solution
<b>Bottle leaks.</b>	Lid not tightened; gasket improperly seated or damaged; straw lid not closed.	Ensure lid is securely tightened. Check that the silicone gasket is correctly positioned and free from damage. If using a straw lid, ensure the straw is folded down completely.
<b>Unpleasant odor inside the bottle or lid.</b>	Improper cleaning; residue buildup; gasket absorbing odors.	Clean all parts thoroughly after each use. For persistent odors, soak the bottle and gasket in a solution of warm water and baking soda for several hours or overnight. Rinse well. Ensure all parts are completely dry before storage.
<b>Rattling sound from inside the bottle.</b>	Potential manufacturing defect or damage to the insulation layer.	If the bottle is new and exhibits this, contact BJPKPK customer support for assistance. This may indicate an issue with the vacuum seal.

## SPECIFICATIONS

Feature	Detail
<b>Brand</b>	BJPKPK
<b>Model Name</b>	TK22oz
<b>Capacity</b>	22 Fluid Ounces (650ml)
<b>Material</b>	18/8 Food-Grade Stainless Steel, Metal
